

CLEARING PERMIT

Granted under section 51E of the Environmental Protection Act 1986

PERMIT DETAILS

Area Permit Number:8211/2File Number:DWERVT1504Duration of Permit:31 March 2019 to 31 March 2021

PERMIT HOLDER

SBT Properties Trust

LAND ON WHICH CLEARING IS TO BE DONE

Lot 10 on Deposited Plan 30340, Mogumber Road West, Mogumber

AUTHORISED ACTIVITY

The Permit Holder shall not clear more than 0.31 hectares of native vegetation within the area cross-hatched yellow on attached Plan 8211/2.

CONDITIONS

1. Avoid, minimise and reduce the impacts and extent of clearing

In determining the amount of native vegetation to be cleared authorised under this Permit, the Permit Holder must have regard to the following principles, set out in order of preference: (a) avoid the clearing of native vegetation;

- (a) avoid the cleaning of hative vegetation,
- (b) minimise the amount of native vegetation to be cleared; and
- (c) reduce the impact of clearing on any environmental value.

2. Dieback and weed control

When undertaking any clearing authorised under this Permit, the Permit Holder must take the following steps to minimise the risk of the introduction and spread of *weeds* and *dieback*:

- (a) clean earth-moving machinery of soil and vegetation prior to entering and leaving the area to be cleared;
- (b) ensure that no dieback or weed-affected soil, *mulch, fill* or other material is brought into the area to be cleared; and
- (c) restrict the movement of machines and other vehicles to the limits of the areas to be cleared.

3. Flora Management

- (a) Prior to undertaking any clearing authorised under this Permit, the Permit Holder shall engage an *environmental specialist* to demarcate all *threatened flora* and *priority flora* individuals and the relevant *buffers*, located within the area cross-hatched yellow on attached Plan 8211/2.
- (b) The Permit Holder shall ensure that clearing of *threatened flora* is limited to 25 individuals of *Banksia mimica*.
- (c) The Permit Holder shall ensure that clearing of *priority flora* is limited to 25 individuals of *Banksia dallanneyi* subsp. *pollosta*.

4. Records must be kept

The Permit Holder must maintain the following records for activities done pursuant to this Permit: (a) In relation to the clearing of native vegetation authorised under this Permit:

- (i) the boundaries of clearing undertaken, recorded using a Global Positioning System (GPS) unit set to Geocentric Datum Australia 1994 (GDA94), expressing the geographical coordinates in Eastings and Northings or decimal degrees;
- (ii) the date(s) that clearing occurred;
- (iii) the size of the area cleared (in hectares);
- (iv) actions taken to avoid, minimise and reduce the impacts and extent of clearing in accordance with condition 1 of this Permit; and
- (v) actions taken to minimise the risk of the introduction and spread of *weeds* and *dieback* in accordance with condition 2 of this Permit.
- (b) In relation to flora management pursuant to condition 3 of this Permit:
 - (i) the name and location of each *threatened flora* and/or *priority flora* recorded using a Global Positioning System (GPS) unit set to Geocentric Datum Australia 1994 (GDA94), expressing the geographical coordinates in Eastings and Northings or decimal degrees;
 - (ii) actions taken to demarcate each *threatened flora* and/or *priority flora* recorded and the relevant *buffers*; and
 - (iii) the number of individuals of each threatened flora and/or priority flora cleared.

5. Reporting

- (a) The Permit Holder must provide to the *CEO* on or before 30 June of each year, a written report:(i) of records required under condition 4 of this Permit; and
 - (ii) concerning activities done by the Permit Holder under this Permit between 1 January to 31 December of the preceding calendar year.
- (b) If no clearing authorised under this Permit was undertaken between 1 January to 31 December of the preceding calendar year a written report confirming that no clearing under this permit has been carried out, must be provided to the *CEO* on or before 30 June of each year.
- (c) Prior to 31 December 2020, the Permit Holder must provide to the *CEO* a written report of records required under condition 4 of this Permit where these records have not already been provided under condition 5(a) of this Permit.

DEFINITIONS

The following meanings are given to terms used in this Permit:

buffer means 50 metres for *rare flora* and 10 metres for *priority flora*;

CEO means the Chief Executive Officer of the Department responsible for the administration of the clearing provisions under the *Environmental Protection Act 1986*;

dieback means the effect of *Phytophthora* species on native vegetation;

environmental specialist means a person who is engaged by the Permit Holder for the purpose of providing environmental advice, who holds a tertiary qualification in environmental science or equivalent, and has experience relevant to the type of environmental advice that an environmental specialist is required to provide under this Permit;

fill means material used to increase the ground level, or fill a hollow;

mulch means the use of organic matter, wood chips or rocks to slow the movement of water across the soil surface and to reduce evaporation;

priority flora means those plant taxa described as priority flora classes 1, 2, 3 or 4 in the *Department of Biodiversity, Conservation and Attractions' Threatened and Priority Flora List for Western Australia* (as amended);

threatened flora means those plant taxa listed as threatened flora under the *Biodiversity Conservation Act 2016*;

weed/s means any plant -

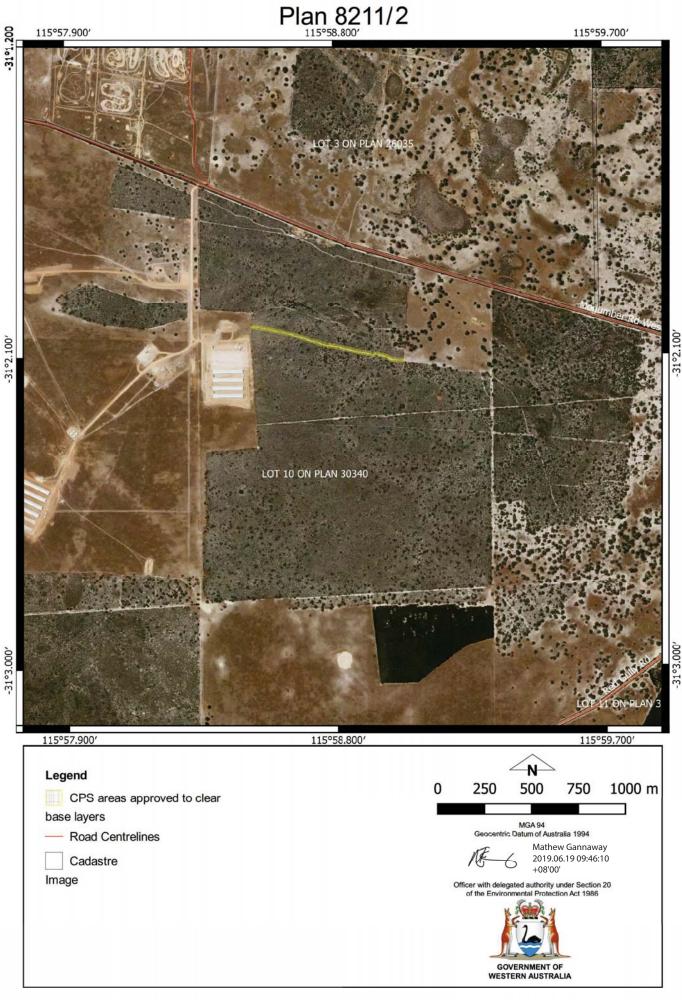

- (a) that is a declared pest under section 22 of the *Biosecurity and Agriculture Management Act 2007*; or
- (b) published in a Department of Biodiversity, Conservation and Attractions species-led ecological impact and invasiveness ranking summary, regardless of ranking; or
- (c) not indigenous to the area concerned.

Soil/Landform Type:

Three main soil types have been mapped in the application area (Schoknecht et al. 2004):

- Capitella 3 gentle slope Phase (Cp3b) subsystem is described as very gently inclined slopes, plain, some dunes; pale deep and gravelly deep sand.
- Capitella 5 dry Phase (Cp5a) subsystem is described as low dunes in sand filled drainage depressions, no shallow ground water influence; pale and yellow deep sands.
- Capitella 6 low dunes Phase (Cp6a) subsystem is described as plain with very low dunes; pale and yellow deep sands.

Comment

The local area considered in the assessment of this application is a 10 kilometre radius measured from the perimeter of the application area. The local area retains approximately 58 per cent native vegetation cover.

Figure 1 Application area in blue

3. Assessment of application against clearing principles

An administrative error has occurred regarding Permit Holder details for the clearing permit. A review of current environmental information reveals no new additional information. Therefore the assessment against the clearing principles has not changed and can be found in the Clearing Permit Decision Report CPS 8211/1.

Planning instruments and other relevant matters.

The application is for the clearing of 0.31 hectares of native vegetation for widening an access track.

No Aboriginal sites of significance have been mapped within the application area.
