Application for an amendment to a clearing permit

Environmental Protection Act 1986, section 51M

FORM C4

Clearing of native vegetation is prohibited in Western Australia except where a clearing permit has been granted or an exemption applies. A person who causes or allows unauthorised clearing commits an offence.

For further information on the stages of assessment for clearing permit applications (including amendments to existing permits), refer to the [Procedure: Native vegetation clearing permits](#) on DWER's website.

Part 1: Assessment bilateral agreement

If the amendment of a clearing permit will or is likely to impact on a matter of national environmental significance identified under the *Environment Protection and Biodiversity Conservation Act 1999* (Cth) (EPBC Act) the original application must have been assessed in accordance with the bilateral assessment, and a variation under the EPBC Act is required prior to submitting this amendment application form.

To be assessed in this manner, the proposed clearing action must be referred to the Commonwealth under the EPBC Act and deemed a '[controlled action](#)' prior to submitting this application form.

Further information is located in *Form Annex C7* and *A guide to native vegetation clearing processes under the Assessment bilateral agreement* available at www.der.wa.gov.au/our-work/clearing-permits.

Do you want your proposed clearing action assessed in accordance with, or under, an EPBC Act Accredited Process such as the assessment bilateral agreement?

☐ Yes EPBC number:

☒ No Proceed to Part 2

List the controlling provisions identified in the notification of the controlled action decision.

☐ *Form Annex C7* is complete and the required supporting information is attached.

Part 2: Clearing permit details

Amendments can only be made to active clearing permits.

Applications must be made more than 90 working days prior to the existing permit expiring to ensure there is adequate time to assess the amendment.

Part 4: Proposed amendments	
Additional information to support the assessment of your application to amend may be attached. Please ensure you have included the following as part of your application: - a photocopy of the granted clearing permit, with proposed changes highlighted, - and - payment of the prescribed fee. When providing details of the proposed change(s), if any additional clearing is proposed, include details of: - the proposed method of the clearing; - the purpose of the clearing; - the period within which the clearing is proposed to be undertaken (taking note of the published minimum assessment timeframes for DWER / DMIRS, as applicable); - and - the final land use.	Indicate the types of proposed change(s) to your clearing permit by selecting the relevant box(es): ☐ Extend the duration of the clearing permit. ☐ Vary / add / remove a permit condition relating to a matter other than the size or boundary of the area to be cleared. ☒ Amend the size of the area permitted to be cleared, or add / remove a land parcel on the clearing permit. ☐ Redescribe the boundary of the area authorised to be cleared <i>[for an area permit only]</i> ☐ Make a correction to the clearing permit. ☐ Other. Provide details of the proposed change(s), and the rationale for it / them. The Civil Contractors currently working on site has advise they require a larger area to practically and safely install the required stormwater pipe works required for the project. The current clearing permit approved area does not allow enough room for the excavation and trenching required. This is due to the steep slope incline of the area, the sandy conditions and the depth of the new services trench that need to be considered in the build. Currently a 4m corridor is allowed for in the current Clearing Permit but the contractor has requested at least 6m corridor to install the pipework in accordance with the works required. Note pipework is installed underground the intention is to restore vegetation back on top. Additional small area is also required for a Coldwater Break Tank and Pump location to upgrade hydraulic services to the site.
For an application to amend the size of the area permitted to be cleared, or add a land parcel to the clearing permit, you must have the authority of the landowner to access the land and undertake the clearing.	State the nature of the applicant's authority to access the land to be cleared. Evidence of authority can include e.g. a copy of the certificate of title or a letter of authority signed by the landowner or other person with authority to give legal land access permission. <i>[Attach evidence of authority. Note that a letter of authority must explicitly state the applicant has authority to clear on the land.]</i> Form Signed by the Shire of Broome. Ownership: Vesting Order to Shire of Broome.
Provide additional property details if required – if applying to extend the size of the area to be cleared into another land parcel.	Land description: volume and folio number, lot or location number(s), Crown lease or reserve number, pastoral lease number, or mining tenement number of all properties. Lot 1197 on Plan 213540, Minyirr and Lot 551 on Plan 409418, Minyirr (Shire of Broome)
You must provide evidence that avoidance and mitigation options have been pursued to eliminate, reduce or otherwise mitigate the need for, and scale of, the proposed clearing of native vegetation.	Have alternatives that would avoid or minimise the need for clearing been considered and applied? ☒ Yes ☐ No If yes, provide details: Various excavation options and revised engineering solutions has been investigated and conducted. But larger clearing area is still required for buildability due to the site restrictions.
Refer to DWER's Clearing of native vegetation offsets procedure guideline available on the DWER website, and the EPA's WA Environmental Offsets Policy and Guidelines on the EPA website for further information.	Do you want to submit a clearing permit offset proposal with your application? ☐ Yes ☒ No If yes, provide details, and complete and attach Appendix A of the <i>Clearing of native vegetation offsets procedure guideline</i>.
