

Department of Water and Environmental Regulation (DWER) Department of Mines, Industry Regulation and Safety (DMIRS)

Application for a clearing permit (purpose permit) Environmental Protection Act 1986, section 51E

FORM C2

Clearing of native vegetation is prohibited in Western Australia except where a clearing permit has been granted or an exemption applies. A person who causes or allows unauthorised clearing commits an offence.

CPS No.
Data ataura
Date stamp

Part 1: Assessment bilateral agre	ement						
The native vegetation clearing processes under Part V of the Environmental Protection Act 1986 (WA) (EP Act) have been accredited by the Commonwealth of Australia under the Environment Protection and Biodiversity Conservation Act	Do you want your proposed clearing action assessed in accordance with, or under, an EPBC Act Accredited Process such as the assessment bilateral agreement?						
		Yes	EPBC Number:				
	\boxtimes	No	Proceed to Part 2				
1999 (Cth) (EPBC Act) and can be assessed under an assessment bilateral agreement.	List the controlling provisions identified in the notification of the controlled action decision.						
To be assessed in this manner, the proposed clearing action must be referred to the Commonwealth under the EPBC Act and deemed a 'controlled action' prior to submitting this application form.							
For further information see Form Annex C7 and A guide to native vegetation clearing processes under the assessment bilateral agreement available at www.der.wa.gov.au/our- work/clearing-permits.							
		Form	Annex C7 is comple	ete and the required supporting information is attached.			

Part 2: Land details							
The location of the land where clearing is proposed must be accurately described.	Land description: volume and folio number, lot or location number(s), Crown lease or reserve number, pastoral lease number or mining tenement number of all properties.						
	The seabed for the proposal Disposal Area is located within the Peel Harvey Estuarine System (PHES) and the seabed tenure is on Unallocated Crown Land (UCL).						
	Coordinates of the Disposal Area are:						
	Corner 1 DNW 382533E	6395291N					
	Corner 2 DNE 382926E	6395243N					
	Corner 3 DSE 382910E	6395086N					
	Corner 4 DSW 382509E	6395138N

Part 4: Proposed clearing										
An aerial photograph and/or map with a north arrow must be attached, clearly marking the area proposed to be cleared or if you have the facilities, a digital	Total area of clearing proposed (hectares) Total area: 6.2 ha of aquatic vegetation and/or									
	number of individual trees to be removed									
map on a suitable portable digital	Proposed method of clearing:									
storage device of the area to clear as an ESRI shapefile with the following properties: Geometry type: Polygon shape Coordinate system: GDA 1994 (Geographic latitude/longitude) Datum: GDA 1994 (Geocentric Datum of Australia 1994). An ESRI shapefile must be provided if the application requires an assessment under an EPBC Act accredited process.	Sediments from the Murray and Serpentine River Channels will be dredged and deposited within the proposed Disposal Area. The deposited material may cause smothering of native aquatic vegetation.									
	Purpose of clearing:									
	DoT is proposing to undertake ongoing maintenance dredging of the Murry and Serpentine River Channels to maintain navigability. Sediments have accumulated within the River Entrance Channels affecting safe navigational access. DoT proposes to remove up to ~26,000 m³ of material via cutter-suction dredge. It is proposed material will be transported via floating pipeline to the in-estuarine disposal area located ~300 m northeast of the Rivers Entrance Channels. Aquatic vegetation is present within the Disposal Area and a Native Vegetation Clearing Purpose Permit is required for potential impacts to vegetation.									
	Period within which clearing is proposed to be undertaken, e.g. May 2018 – June 2018									
	from May 2019 to May 2029									
	Final land use:									
You must provide evidence that avoidance and mitigation options have been pursued to eliminate, reduce or otherwise mitigate the need for, and scale of, the proposed clearing of native vegetation.	Have alternatives that would avoid or minimise the need for clearing been considered and applied?									
	If yes, provide details:									
	Best management practice is to dispose dredged material within the estuarine system to avoid potential acid sulfate soil generation and waste generation.									
Refer to DWER's <u>Clearing of</u> <u>native vegetation offsets</u> <u>procedure quideline</u> available on the DWER website, and the Environmental Protection	Do you want to submit a clearing permit offset proposal									
	If yes, provide details, and complete and attach Appendix A of the <i>Clearing of native</i> vegetation offsets procedure guideline.									
Authority's (EPA) <u>WA</u> <u>Environmental Offsets Policy</u> <u>and Guidelines</u> on the EPA website for further information.
