	and/or	
	number of individual <b>trees</b> to be removed	
	Proposed method of clearing:	Dozer
	Purpose of clearing:	Expansion of mining operations and associated infrastructure
	Period within which clearing is proposed to be undertaken, e.g. May 2018 – June 2018	from <input type="text" value="October 2019"/> to <input type="text" value="2038"/>
	Final land use:	Mining and associated infrastructure
You must provide evidence that avoidance and mitigation options have been pursued to eliminate, reduce or otherwise mitigate the need for, and scale of, the proposed clearing of native vegetation.	Have alternatives that would avoid or minimise the need for clearing been considered and applied?	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No
	If yes, provide details:	Native vegetation clearing is constrained by the ore body and tenure boundaries. Mine expansion for the Mt Marion project has been strategically planned to optimise the geological model and minimise new clearing. Waste dumps are designed with multiple lift and in proximity to the pit areas. Clearing will be staged and existing cleared areas utilised where possible to minimise the requirement for additional clearing.
Refer to DWER's <a href="#">Clearing of native vegetation offsets procedure guideline</a> available on the DWER website, and the Environmental Protection Authority's (EPA) <a href="#">WA Environmental Offsets Policy and Guidelines</a> on the EPA website for further information.	Do you want to submit a clearing permit offset proposal with your application?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
	If yes, provide details, and complete and attach Appendix A of the <i>Clearing of native vegetation offsets procedure guideline</i> .
