Application for a clearing permit (purpose permit)

Environmental Protection Act 1986, section 51E

FORM C2

Clearing of native vegetation is prohibited in Western Australia except where a clearing permit has been granted or an exemption applies. A person who causes or allows unauthorised clearing commits an offence.

For further information on the stages of assessment for clearing permit applications, refer to the [Procedure: Native vegetation clearing permits](#) on DWER's website.

Part 1: Assessment bilateral agreement

The native vegetation clearing processes under Part V of the *Environmental Protection Act 1986* (WA) (EP Act) have been accredited by the Commonwealth of Australia under the *Environment Protection and Biodiversity Conservation Act 1999* (Cth) (EPBC Act) and can be assessed under an assessment bilateral agreement.

To be assessed in this manner, the proposed clearing action must be referred to the Commonwealth under the EPBC Act and deemed a 'controlled action' prior to submitting this application form.

For further information see *Form Annex C7* and *A guide to native vegetation clearing processes under the assessment bilateral agreement* available at www.der.wa.gov.au/our-work/clearing-permits.

Do you want your proposed clearing action assessed in accordance with, or under, an EPBC Act Accredited Process such as the assessment bilateral agreement?

☐ Yes EPBC Number:

☒ No Proceed to Part 2

List the controlling provisions identified in the notification of the controlled action decision.

☐ Form Annex C7 is complete and the required supporting information is attached.

Part 2: Land details

The location of the land where clearing is proposed must be accurately described.

Land description: volume and folio number, lot or location number(s), Crown lease or reserve number, pastoral lease number or mining tenement number of all properties.

Part 4: Proposed clearing	
<p>An aerial photograph and/or map with a north arrow must be attached, clearly marking the area proposed to be cleared</p> <p>or</p> <p>if you have the facilities, a digital map on a suitable portable digital storage device of the area to clear as an ESRI shapefile with the following properties:</p> <ul style="list-style-type: none"> • Geometry type: Polygon shape • Coordinate system: GDA 1994 (Geographic latitude/longitude) • Datum: GDA 1994 (Geocentric Datum of Australia 1994). <p>An ESRI shapefile must be provided if the application requires an assessment under an EPBC Act accredited process.</p>	<p>Total area of clearing proposed (hectares) 0.628 hectares</p> <p>and/or</p> <p>number of individual trees to be removed</p>
	Proposed method of clearing:
	Mechanical clearing
	<p>Purpose of clearing:</p> <p>To upgrade (including widening) the road</p>
	<p>Period within which clearing is proposed to be undertaken, e.g. May 2020 to June 2020 (taking note of the published assessment timeframes for DWER / DMIRS, as applicable)</p> <p>From July 2020 to July 2023</p>
	<p>Final land use:</p> <p>Road</p>
<p>You must provide evidence that avoidance and mitigation options have been pursued to eliminate, reduce or otherwise mitigate the need for, and scale of, the proposed clearing of native vegetation.</p>	<p>Have alternatives that would avoid or minimise the need for clearing been considered and applied? <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No</p>
	<p>If yes, provide details:</p> <p>We would really like to have cleared to 19m width but have reduced that for this application to a 17m clearing width. To install the required drainage along each side of the road that is required to ensure the structural integrity of the pavement is maintained, we cannot clear any less than the 17m clear zone. As advised by the engineer, Rod Munns, 19m would be preferred to allow easier ongoing table drain maintenance. The applied for width of 17m will just allow the table drains to be constructed to a minimum, but with additional costs to the Shire to maintain these into the future, due to lack of clearance to get graders onto the backcut to easily maintain. Additionally, we have also attached a shape file indicating trees that are within the 17m zone but can be avoided by altering the drain construction. These alterations are feasible for single trees, but over a more extended distance would compromise the road construction (as described above).</p>
<p>Refer to DWER's Clearing of native vegetation offsets procedure guideline available on the DWER website, and the Environmental Protection Authority's (EPA) WA Environmental Offsets Policy and Guidelines on the EPA website for further information.</p>	<p>Do you want to submit a clearing permit offset proposal with your application? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No</p>
	<p>If yes, provide details, and complete and attach Appendix A of the <i>Clearing of native vegetation offsets procedure guideline</i>.</p>
