Part 4: Proposed clearing	
An aerial photograph or map with a north arrow must be attached, clearly marking the area proposed to be cleared or if you have the facilities, a digital map on a suitable portable digital storage device of the area to clear as an ESRI shapefile with the following properties: <ul style="list-style-type: none"> • Geometry type: Polygon shape • Coordinate system: GDA 1994 (Geographic latitude/longitude) • Datum: GDA 1994 (Geocentric Datum of Australia 1994). An ESRI shapefile must be provided if the application requires an assessment under an EPBC Act accredited process.	Total area of clearing proposed (hectares) Up to 1 ha
	and/or
	number of individual trees to be removed No trees will be removed as part of the proposed removal of <i>Typha orientalis</i> (Typha)
	Proposed method of clearing Mechanical removal using amphibious vehicle and potential follow up with chemical control if required. Minimal disturbance of wetland as the Typha will be cut below water with the surface biomass removed.
	Period within which clearing is proposed to be undertaken, e.g. May 2020 to June 2020 (taking note of the published assessment timeframes for DWER / DMIRS, as applicable) From 01/09/2020 to 01/09/2020
Purpose of clearing To remove <i>Typha orientalis</i> as it is acting in an invasive manner outcompeting other local native species and reducing biodiversity. Typha at this location also impedes the flow of water at this wetland. The areas where Typha has been removed will be managed to allow the recruitment of native species and a more diverse habitat for native fauna.	

Part 4: Proposed clearing	
	<p>Typha is also growing up and around the bird hide reducing visibility and amenity of the structure.</p> <p>Final land use [e.g. "the area will be revegetated to reflect pre-clearing conditions after extraction is complete", or "the area will be a public road"]:</p> <p>Wetland – Regional Open Space.</p>
You must provide evidence that avoidance and mitigation options have been pursued to eliminate, reduce, or otherwise mitigate the need for, and scale of, the proposed clearing of native vegetation.	<p>Have alternatives that would avoid or minimise the need for clearing been considered and applied? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No</p>
	<p>If yes, provide details:</p> <p>No alternative considered – the method being used is the least invasive and will allow natural recruitment/revegetation of the area that is currently a monoculture of Typha with a range of local native sedges.</p>
Refer to DWER's Clearing of native vegetation offsets procedure guideline available on the DWER website, and the Environmental Protection Authority's (EPA) WA Environmental Offsets Policy and Guidelines on the EPA website for further information.	<p>Do you want to submit a clearing permit offset proposal with your application? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No</p>
	<p>If yes, provide details, and complete and attach Appendix A of the <i>Clearing of native vegetation offsets procedure guideline</i>.</p>
