Application for a clearing permit (purpose permit)

Environmental Protection Act 1986, section 51E

FORM C2

Clearing of native vegetation is prohibited in Western Australia except where a clearing permit has been granted or an exemption applies. A person who causes or allows unauthorised clearing commits an offence.

For further information on the stages of assessment for clearing permit applications, refer to the <u>Procedure: Native vegetation clearing permits</u> on DWER's website.

CPS No.	
Date stamp	

Part 1: Assessment bilateral agreement									
The native vegetation clearing processes under Part V of the Environmental Protection Act 1986 (WA) (EP Act) have been accredited by the Commonwealth of Australia under the Environment Protection and Biodiversity Conservation Act 1999 (Cth) (EPBC Act) and can be assessed under an assessment bilateral agreement.	Do you want your proposed clearing action assessed in accordance with, or under, an EPBC Act Accredited Process such as the assessment bilateral agreement?								
		Yes	EPBC Numbe	r:					
	\boxtimes	No	Proceed to Pa	ırt 2					
		List the controlling provisions identified in the notification of the controlled action decision.							
To be assessed in this manner, the proposed clearing action must be referred to the Commonwealth under the EPBC Act and deemed a 'controlled action' prior to submitting this application form.									
For further information see Form Annex C7 and A guide to native vegetation clearing processes under the assessment bilateral									
agreement available at www.der.wa.gov.au/our- work/clearing-permits.		Form	Annex C7 is co	mplete	e and the required supporting information is attached.				
Part 2: Land details									
The location of the land where clearing is proposed must be	Land description: volume and folio number, lot or location number(s), Crown lease or reserve number, pastoral lease number or mining tenement number of all properties.								
accurately described.	The land in question is covered by exploration tenement E38/3065 (Lake Throssell), which is located ~240km east of Laverton.

Part 3: Applicant details (continued)									
Authority to access land									
To apply for a permit you must be the landowner, or have the authority of the landowner to access the land and undertake	State the nature of the applicant's authority to access the land to be cleared. [Attach evidence of authority. Note that a letter of authority must explicitly state that the applicant has authority to clear on the land and must be signed by a person with authority to give land access permission.]								
the clearing. Evidence of authority can include, for example, a copy of the certificate of title or a letter of authority signed by the landowner or other person with authority to give land access permission.	Trigg Mining holds a granted exploration licence over the application area (E38/3065).								
Landowner's ownership of land									
A landowner can be:	The la	andowner's form o	f ownership is:						
 a person who holds the certificate of title; a person who is the lessee of Crown land; or a public authority that is responsible for care of the land. 		Certificate of title [Attach a copy of the certificate and all associated encumbrances with the application – available from Landgate].							
	Pastoral lease [Attach a copy of the lease and all associated encumbrances].								
	⊠ Mining lease.								
		Public authority that has care, control or management of the land.							
		Other form of lease, land tenure or specific arrangement.							
Contact details for enquiries									
If different from the applicant's contact details, enter the contact details of a person with whom DWER or DMIRS should liaise with concerning this clearing application.	Where contact details differ to those of the applicant, complete the below section: Contact person (and position, if applicable)

	Phone	e (fixed line)		Phone (mobile)					
	Email	address							

Part 4: Proposed clearing										
An aerial photograph and/or map with a north arrow must be attached, clearly marking the area proposed to be cleared or if you have the facilities, a digital map on a suitable portable digital storage device of the area to clear as an ESRI shapefile with the following properties: • Geometry type: Polygon	Total area of clearing proposed (hectares) 9.76									
	and/or									
		number of individual trees to be removed								
	Proposed method of clearing:									
	Clearing is expected to be kept to a minimum, as tracks have been planned to avoid significant vegetation as much as possible. Where required, a loader (raised blade) will be used. Trees and shrubs will only be cleared in situations where there is no alternative path available that can avoid the significant vegetation.									
shapeCoordinate system: GDA	Purpose of clearing:									
1994 (Geographic latitude/longitude) Datum: GDA 1994 (Geocentric Datum of Australia 1994).	To provide temporary access tracks for exploration aircore drilling at the company's Lake Throssell project. A small drill pad is also required at each proposed drill site (~25m x 25m). Drill pads will be located along the drill traverses included in this submission (final locations TBC), with pad locations chosen to minimise vegetation disturbance as much as possible.									
An ESRI shapefile must be provided if the application	Period within which clearing is proposed to be undertaken, e.g. May 2020 to June 2020 (taking note of the published assessment timeframes for DWER / DMIRS, as applicable)									
requires an assessment under an EPBC Act accredited process.	From September 2020 to October 2020									
EFBC Act accredited process.	Final land use:									
	Temporary access tracks and drill pads.									
You must provide evidence that avoidance and mitigation options have been pursued to eliminate, reduce or otherwise mitigate the need for, and scale of, the proposed clearing of native vegetation.	Have alternatives that would avoid or minimise the need for clearing been considered and applied?									
	If yes, provide details:									
	During the planning stage, the proposed temporary access tracks have been positioned in a way (using aerial imagery) that avoids significant vegetation as much as possible. See attached supporting documents for further details.									
Refer to DWER's <u>Clearing of</u> <u>native vegetation offsets</u> <u>procedure guideline</u> available on the DWER website, and the Environmental Protection	Do you want to submit a clearing permit offset proposal with your application?									
	If yes, provide details, and complete and attach Appendix A of the Clearing of native vegetation offsets procedure guideline.									
Authority's (EPA) <u>WA</u> <u>Environmental Offsets Policy</u> <u>and Guidelines</u> on the EPA website for further information.
