	<i>and/or</i>				
	number of individual trees to be removed				
	Proposed method of clearing:				
	Proposed construction method for the pipeline includes a clear and grade process to remove the vegetation and topsoil from the construction right of way (CROW). Clear and grade will include the removal of vegetation and the grading of 100 mm of topsoil, depending on the soil profile, using bulldozers and graders. The vegetation will be pushed aside, and topsoil will be separately stockpiled (in windrows) along the edge of the CROW to permit safe and practical construction access, whilst preserving the topsoil for later reinstatement.				
	Maintenance clearing requirements will be minimal, and restricted to those areas previously cleared during construction. Clearing will be predominantly for maintenance of line of sight between pipeline markers, pipeline maintenance and for access tracks.				
	Purpose of clearing:				
	Clearing for the purpose of a gas pipeline.				
	Period within which clearing is proposed to be undertaken, e.g. May 2020 to June 2020 (taking note of the published assessment timeframes for DWER / DMIRS, as applicable)				
	From	August 2020	to	February 2021	
Final land use:					
Pipeline for the conveyance of gas.
