Part 4: Proposed clearing	
<p>An aerial photograph and/or map with a north arrow must be attached, clearly marking the area proposed to be cleared</p> <p>or</p> <p>if you have the facilities, a digital map on a suitable portable digital storage device of the area to clear as an ESRI shapefile with the following properties:</p> <ul style="list-style-type: none"> • Geometry type: Polygon shape • Coordinate system: GDA 1994 (Geographic latitude/longitude) • Datum: GDA 1994 (Geocentric Datum of Australia 1994). <p>An ESRI shapefile must be provided if the application requires an assessment under an EPBC Act accredited process.</p>	<p>Total area of clearing proposed (hectares) 1.331</p> <p>and/or</p> <p>number of individual trees to be removed</p>
	<p>Proposed method of clearing:</p> <p>Mechanical removal and relocation of grass trees where practical</p>
	<p>Purpose of clearing:</p> <p>The Shire of Serpentine Jarrahdale has received funding from the Department of Transport to formalise a Principle Shared Path between the townships of Mundijong and Byford. The PTA require a chain mesh fence and access points, which will need to have a cleared area of approximately 1.5 m into the bush area. Also by fencing this area, the PTA require additional new access points through existing vegetation so they can access their track infrastructure for maintenance.</p> <p>Additional clearing is required for the erection of a bridge for the Principal Shared Path across the Cardup Brook and access from the path to link over road crossings to join the existing path networks.</p>
	<p>Period within which clearing is proposed to be undertaken, e.g. May 2020 to June 2020 (taking note of the published assessment timeframes for DWER / DMIRS, as applicable)</p> <p>From 1 November 2020 to 31 December 2030</p>
	<p>Final land use:</p> <p>Sealed path way and chain mesh fence with gates – Public access</p>
<p>You must provide evidence that avoidance and mitigation options have been pursued to eliminate, reduce or otherwise mitigate the need for, and scale of, the proposed clearing of native vegetation.</p>	<p>Have alternatives that would avoid or minimise the need for clearing been considered and applied? <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No</p> <p>If yes, provide details:</p> <p>The main reason for this clearing permit is through the requirement from PTA for the installation of the chain mesh fence and some realignment of the path through vegetation and over the creek line and crossings at Soldiers Road.</p> <p>Where possible, grass trees that are affected will be relocated. In addition, the path will be narrowed to pinch points in order to preserve significant trees. The fence will be erected on the edge of the path, with intentions of going around significant trees on the path side.</p> <p>The alignment of the fence will also be adjusted at these pinch points in order to reduce the amount of clearing required.</p> <p>There have been alternatives selected and mapped for the location of the bridge over the Cardup Brook. They have been included as part of this clearing permit application as the final designs have not been completed at this point in time.</p> <p>The majority of the PTA access locations have been placed where there is existing clearing both from the road and into their existing rail infrastructure.</p> <p>Trees within the application have been highlighted for removal, however where possible efforts will be made to fence around the tree. The Shire will be attempting to minimise the removal of any identified habitat trees.</p>
<p>Refer to DWER's Clearing of native vegetation offsets procedure guideline available on the DWER website, and the Environmental Protection Authority's (EPA) WA Environmental Offsets Policy</p>	<p>Do you want to submit a clearing permit offset proposal with your application? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No</p> <p>If yes, provide details, and complete and attach Appendix A of the <i>Clearing of native vegetation offsets procedure guideline</i>.</p>
