The proposed increase of 54.5 hectares relates to the construction of a 18km road corridor and proposed haulage road - L47/934A. Clearing is proposed to be undertaken in Q3CY2021Y. The road corridor and haul road design will accommodate both light vehicle (LV) and heavy vehicle (HV) traffic, travelling in both directions and in some instances at varying speeds with loaded HVs required to navigate safely, when interacting with either stopped/ turning LVs (entering and/or leaving the mine site and village). Suitable design measures are to be put in place to manage this risk, such measures may include (but not be limited to), allowance of sufficient clearance and demarcation of vehicles, such that HVs can safely navigate LVs turning on/off the haul road or the highway. Construction of culverts, slipways, intersections, park-up areas etc and the widening of road alignment to accommodate blind/ sweeping corners is also a consideration in the haul road design. In some instances, separate partitioning berms will be installed to ensure the appropriate demarcation of HVs and / or LVs.</p>
