Application for a clearing permit (purpose permit)

Environmental Protection Act 1986, section 51E

FORM C2

Clearing of native vegetation is prohibited in Western Australia except where a clearing permit has been granted or an exemption applies. A person who causes or allows unauthorised clearing commits an offence.

For further information on the stages of assessment for clearing permit applications, refer to the [Procedure: Native vegetation clearing permits](#) on DWER's website.

Part 1: Assessment bilateral agreement

The native vegetation clearing processes under Part V of the *Environmental Protection Act 1986* (WA) (EP Act) have been accredited by the Commonwealth of Australia under the *Environment Protection and Biodiversity Conservation Act 1999* (Cth) (EPBC Act) and can be assessed under an assessment bilateral agreement.

To be assessed in this manner, the proposed clearing action must be referred to the Commonwealth under the EPBC Act and deemed a '[controlled action](#)' prior to submitting this application form.

For further information see *Form Annex C7* and *A guide to native vegetation clearing processes under the assessment bilateral agreement* available at www.der.wa.gov.au/our-work/clearing-permits.

Do you want your proposed clearing action assessed in accordance with, or under, an EPBC Act Accredited Process such as the assessment bilateral agreement?

☐ Yes EPBC Number:

☒ No Proceed to Part 2

List the controlling provisions identified in the notification of the controlled action decision.

☐ *Form Annex C7* is complete and the required supporting information is attached.

Part 2: Land details

The location of the land where clearing is proposed must be accurately described.

Land description: volume and folio number, lot or location number(s), Crown lease or reserve number, pastoral lease number or mining tenement number of all properties.

	Proposed method of clearing:					
	Mechanical					
	Purpose of clearing:					
	<p>The clearing is required reconstruct and widen Leeuwin Road. The road is currently 5-6 metres wide, which is insufficient given the type and volumes of traffic it receives. The project will reconstruct and widen the existing sealed road to 6.5 metres, with 1 metre unsealed shoulders on either side, and associated drainage works (including culverts), and erosion control works. The road reconstruction will improve driver visibility and overall road safety.</p>

<p>You must provide evidence that avoidance and mitigation options have been pursued to eliminate, reduce or otherwise mitigate the need for, and scale of, the proposed clearing of native vegetation.</p>	Have alternatives that would avoid or minimise the need for clearing been considered and applied?		<input checked="" type="checkbox"/>	Yes	<input type="checkbox"/>	No
	If yes, provide details:					
	<p>Reconstruction of this section of Leeuwin Road is essential in order to improve driver visibility and overall road safety, consistent with other sections of the road that have previously been upgraded.</p>					
	<p>The road has been designed to minimise clearing of native roadside vegetation and to avoid environmental sensitivities, including habitat for threatened fauna (western ringtail possum and Leeuwin Freshwater Snail), a Priority 2 PEC <i>Melaleuca lanceolata</i> forest, and other PECs in the vicinity. Earlier road upgrade designs have been amended and redesigned based on biological field surveys to avoid impacts to these significant biodiversity values.</p>					
	<p>A clearing assessment report is provided at Attachment 1, which provides further information on the proposed clearing, biodiversity values, potential impacts, and mitigation strategies. It also provides information on the flora, fauna, and targeted fauna surveys that have been undertaken to support this application (also attached).</p> <p>In summary, the Shire of Augusta Margaret River will implement the following mitigation measures as part of this clearing permit.</p> <ul style="list-style-type: none"> Clearing of native vegetation will be minimised wherever possible. The road reconstruction has been designed to minimise disturbance to native vegetation, particularly in conservation-sensitive areas such as threatened species habitat (Leeuwin Freshwater Snail, Western Ringtail Possum), and in the <i>Melaleuca lanceolata</i> PEC. In order to ensure that access and disturbance is restricted to the approved clearing areas and does not extend into conservation-significant areas, prior to clearing the Shire will survey and temporarily demarcate the following boundaries in the field: <ul style="list-style-type: none"> Clearing boundaries within the <i>Melaleuca lanceolata</i> PEC Edge of roadside vegetation between the water wheel carpark and Skippy Rock Road intersection to protect Leeuwin Freshwater Snail habitat and the Sedgeland of the Cape Leeuwin Spring PEC. Boundary between the Leeuwin Road Reserve and the Leeuwin Naturaliste National Park along the eastern extent of the project area. 					

Part 4: Proposed clearing			
	<ul style="list-style-type: none"> • If any plants of <i>Banksia sessilis</i> var. <i>cordata</i> require removal or pruning, all seed present will be collected and stored at DBCA's Threatened Seed Centre, in accordance with DBCA-approved procedures and licensing requirements. • Existing surface drainage patterns will be maintained during road reconstruction, with no runoff of water or sediment into the surrounding environment. • Retrenchment pruning of large branches will be undertaken as an alternative to tree removal where branches pose a safety hazard. • Implement best practice weed and dieback hygiene measures during clearing and construction (clean vehicles and machinery prior to entering the site). • Early contact will be made with the DBCA District Office regarding the scheduling of road reconstruction works. • Clearing will be implemented in strict accordance with DBCA's <i>Procedures to Minimise the Risk to Western Ringtail Possums during Vegetation Clearing and Building Demolition</i> (DBCA, 2015), including the presence of a fauna spotter and handler on site prior to and during construction in order to manage any disturbed animals. <p>Undertake pH testing of road material and lime-dose the material used in road shoulders, if required.</p>		
Refer to DWER's Clearing of native vegetation offsets procedure guideline available on the DWER website, and the Environmental Protection Authority's (EPA) WA Environmental Offsets Policy and Guidelines on the EPA website for further information.
