Executive Summary

Natural Area Consulting Management Services (Natural Area) was contracted by the Oldfield Knott Architects to undertake a level 1 flora and vegetation survey, level 1 fauna survey and black cockatoo habitat assessment in a portion of Ray Owen Reserve, adjacent to Lesmurdie primary School. Outcomes of the survey will assist with application for a renewal of a clearing permit for the site.

The survey aimed to determine:

- flora and fauna species present (native and non-native)
- the extent and boundaries of vegetation type and condition
- the location of declared rare or priority flora, fauna and/or ecological communities
- the location of habitat trees and whether they have hollows suitable for threatened black cockatoos.

The flora and vegetation survey within site confirmed:

- a total of 111 flora species present from 31 families
- a total of 32 introduced (weeds) and 79 native flora species
- no priority or threatened flora species were found
- one vegetation type occurred within the site, namely Marri – Jarrah Woodland
- vegetation condition across the site ranged from Completely Degraded to Excellent, with majority of the site (37.4%) in Excellent condition.

The fauna survey within the site confirmed:

- a total of 10 fauna species present
- Two mammals and eight bird species within the survey area
- Two introduced species (Kookaburra and Rabbit)
- Eight native species
- signs of feeding of the threatened Forest Red-tailed Black Cockatoo within the survey area and individuals observed feeding in Marri at the southern end of the Lot
- diggings of the Priority 4 Quenda was recorded to the west of the school Lot.

The threatened black cockatoo habitat assessment confirmed:

- a total of 31 habitat trees with a DBH >500mm were noted in the survey area, with 23 occurring in the School Lot, of which 10 were Marrises and 13 were Jarrahs
- a total of 10 habitat trees were recorded in the proposed clearing area, none of which contained nesting hollows
- 6 Jarrah trees had hollows of suitable size for potential use by threatened black cockatoos
- no evidence of nesting or roosting of black cockatoos was noted during the assessment
- evidence of foraging of Marri nuts by black cockatoos was noted in three locations

As the site is located in the highly vegetated Northern Jarrah Forest region, where there is a large amount of remnant vegetation present within the Mundy Regional Park and Korung National Park in close proximity, the proposed clearing of over 1 ha (1.4 ha) is unlikely to have a significant impact on black cockatoo habitat for the region. As the vegetation is parkland cleared it is unlikely to be good quality breeding and roosting habitat due to the lack of understorey cover and close proximity of residential houses, the school and

recreational areas within Ray Owen Reserve. The remaining pre-European extent of the vegetation complex present on site retains over 70% cover in the Kalamunda Local Government area. These nearby conservation areas provide larger and higher quality black cockatoo habitat that is not surrounded by residential properties as is the case at the Lesmurdie Primary School.

The clearing of over 1 ha (1.4 ha) associated with proposed building footprints and minimum separation distance requirements for Bushfire Attack Level exceeds the trigger value of over 1 ha for a referral to the Environmental Protection Authority under the *EPBC Act 1999*. Although the clearing is unlikely to have significant impact, it is recommended that the proposal is submitted as a clearing permit to the Department of Water and Environmental Regulation to determine whether a referral under the *EPBC Act 1999* is warranted.

1.0 Introduction

Natural Area Consulting Management Services (Natural Area) was contracted by Oldfield Knott Architects to undertake level 1 flora and fauna surveys and a threatened black cockatoo habitat assessment within a portion of Ray Owen Reserve at Lesmurdie Primary School. The survey was undertaken to determine fauna, flora, and vegetation communities present, including conservation significant species, vegetation types and vegetation condition and black cockatoo habitat presence and condition. Survey outcomes will assist with the application of a clearing permit renewal for the area.

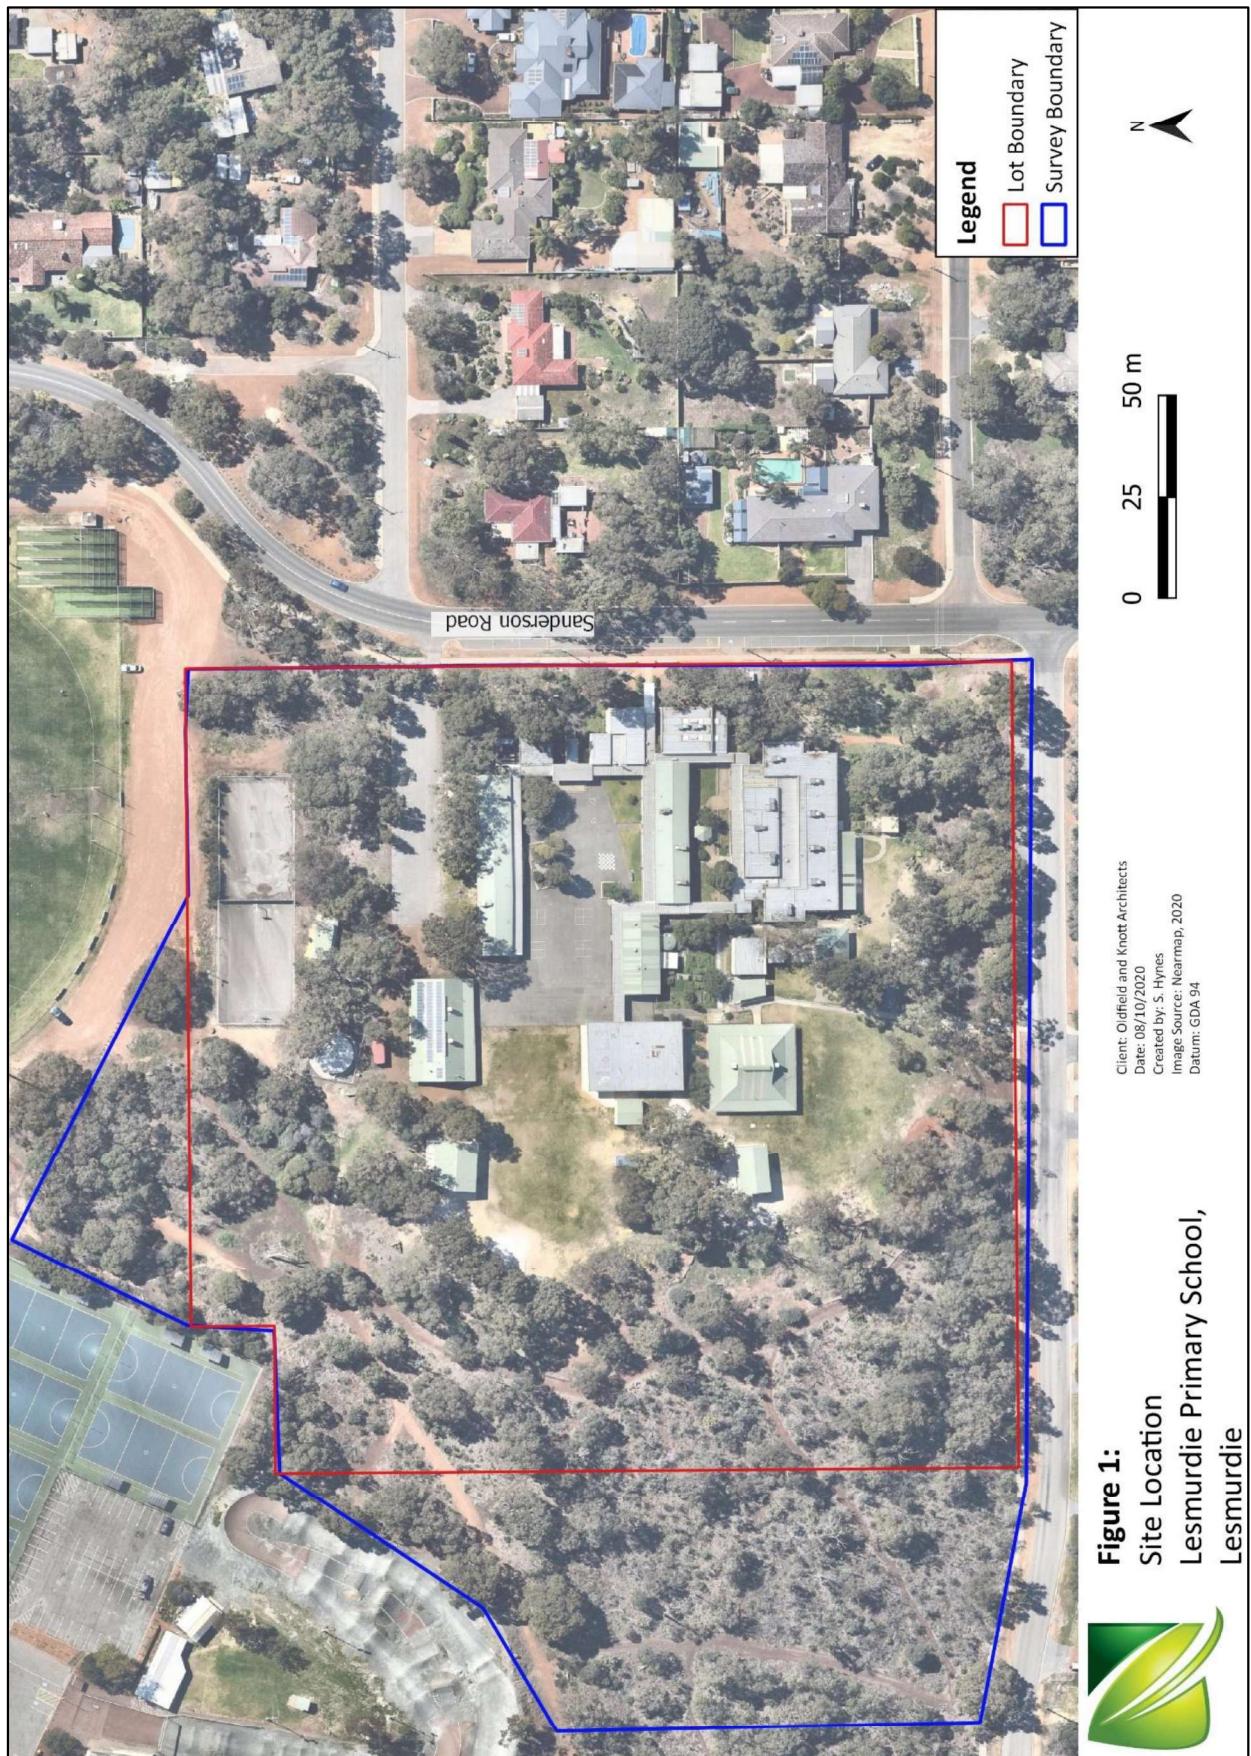

1.1 Location

The survey site is approximately 5.1 ha, whilst the School Lot is 3.9 ha in size and contains remnant vegetation from Ray Owen Reserve as well as the Lesmurdie Primary School, Lesmurdie, WA. The indicative clearing area associated with proposed school development covers approximately 1.32 ha.

1.2 Scope

Natural Area's scope of works associated with the flora and fauna surveys included:

- desktop database searches to identify flora ecological communities that may be present at the site, including any conservation significant species and ecological communities
- desktop review of available data for the site including vegetation complex, soils characteristics, and topography
- a site survey to:
 - determine flora and fauna species present (native and non-native)
 - the presence of threatened and priority species or ecological communities
 - the extent of vegetation types and condition
 - determine the presence of habitat trees with a diameter at breast height (DBH) >500 mm
 - determine the presence of foraging habitat and nesting habitat for threatened black cockatoos
- reporting survey outcomes.

2.0 Site Characteristics

2.1 Regional Context

According to Interim Biogeographical Regionalisation of Australia (IBRA) descriptions, Lesmurdie Primary School is located in the JAF01 – Northern Jarrah Forest subregion. This subregion occurs east of the Darling Scarp which is overlying granite and metamorphic rocks with an average elevation of 300 m. The Northern Jarrah Forest region is dominated by Jarrah-Marri forest on laterite soils and in the eastern area of the subregion is dominated by Wandoo-Marri woodland on clayey soil (Williams and Mitchell, 2001).

2.2 Climate

The climate experienced in the area is warm Mediterranean, with dry, hot summers and cool, wet winters. According to the Bureau of Meteorology (Perth Airport, Station ID 009021, 2020):

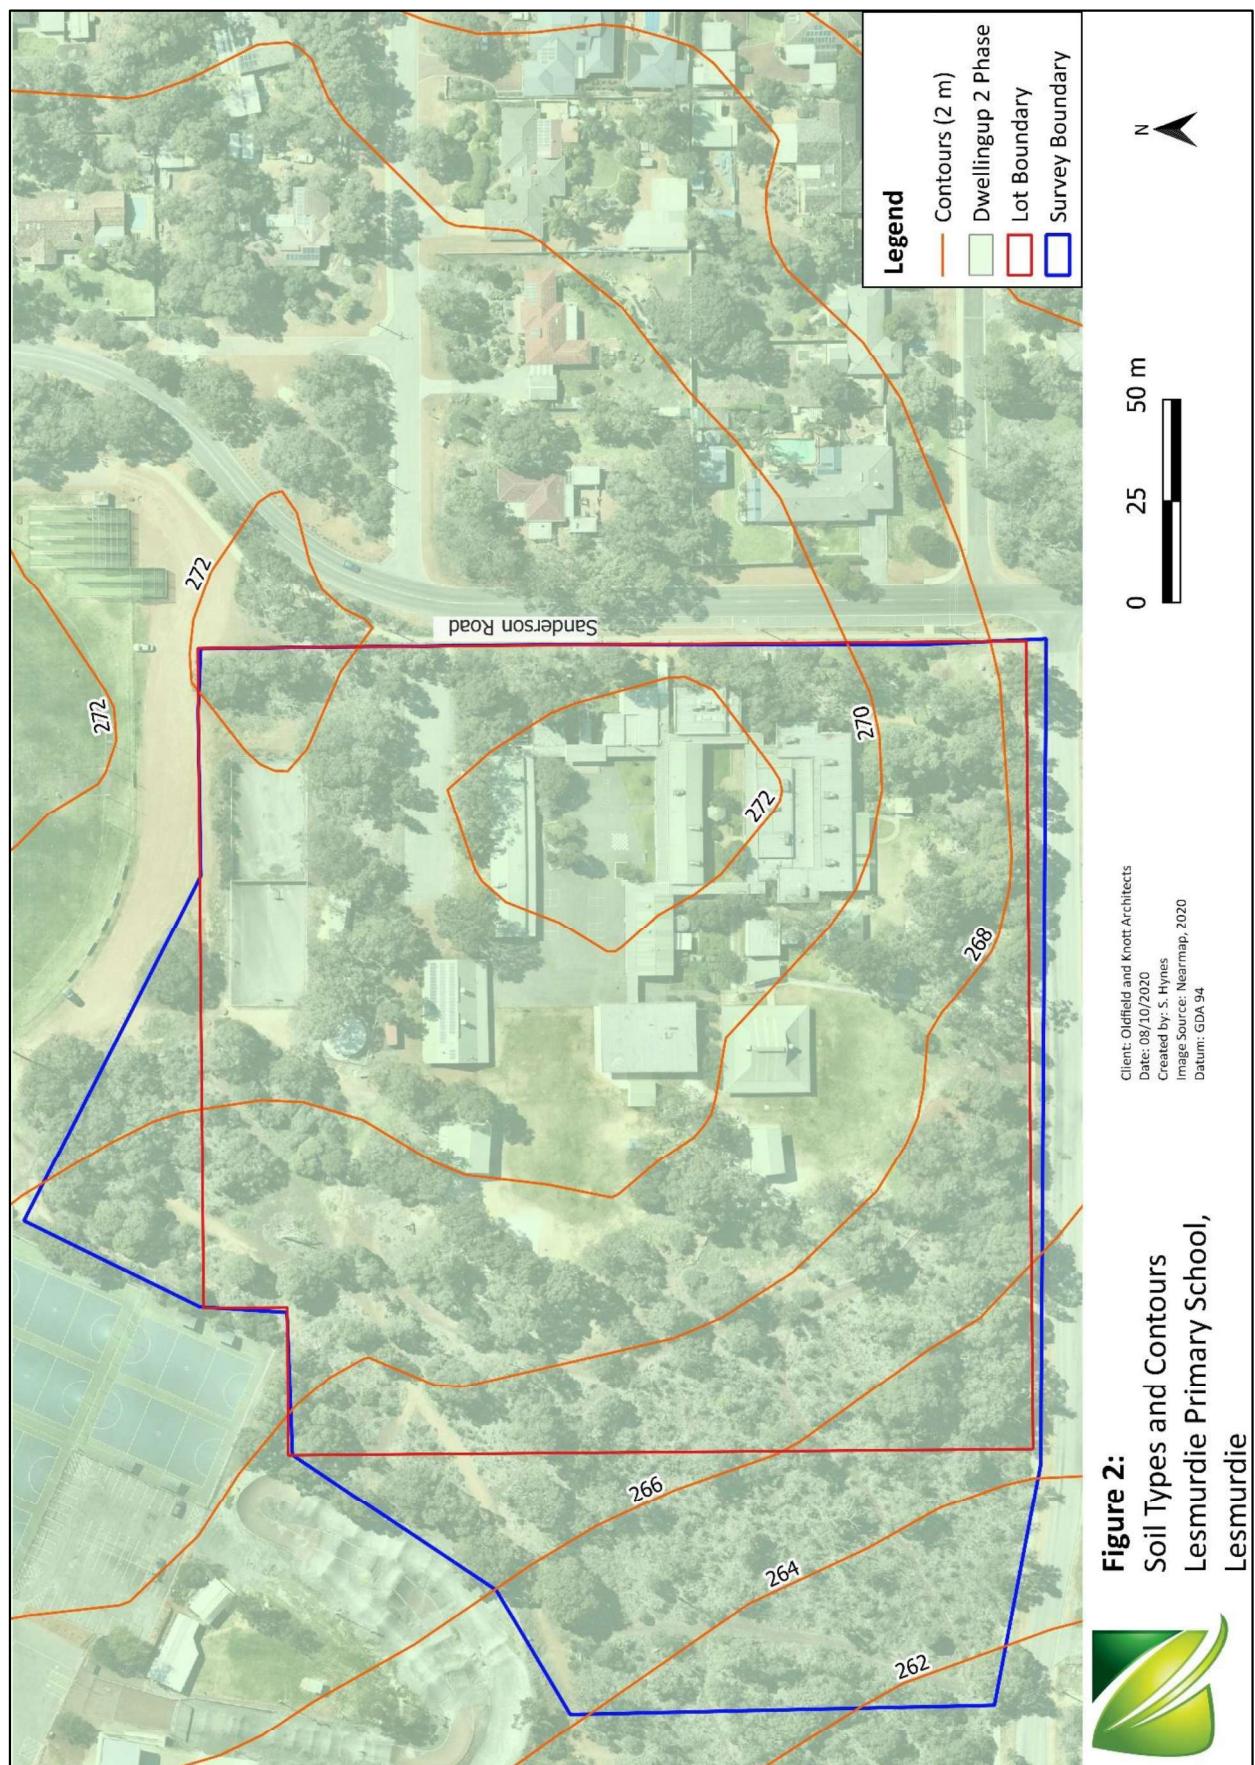

- average rainfall is 762.1 mm pa, with the majority falling between May and August
- average maximum temperature ranges from 18.0 °C in winter to 32 °C in summer, with the highest recorded maximum being 46.7 °C
- average minimum temperatures range from 8.0 °C in winter to 17.5 °C in summer, with the lowest recorded minimum being -1.3 °C
- predominant wind directions include morning easterlies and westerly sea breezes during summer months, with an average wind speed of 16.6 km/h and gusts of more than 100 km/h.

2.3 Soils and Topography

According to the Natural Resource Info (NRInfo) data maintained by the Department Primary Industries and Regional Development (DPIRD, 2020) one soil type namely Dwellingup 2 Phase (255DpDW2) occurs within the site (Figure 2). This soil type is described as very gently undulating terrain with well drained, shallow to moderately deep gravelly brownish sands, pale brown sands and earthy sands overlying lateritic duricrust. Topography on the site ranges from 270 – 272 m AHD, with the school and other nearby buildings and infrastructure being located at the top of a flat area. The land surrounding the school site drops downwards to the west, south and east.

2.4 Fauna Habitat

There is potential for the three threatened black cockatoos and their habitat to occur on site including, the Carnaby's Cockatoo (*Calyptorhynchus latirostris*) listed as endangered under the *EPBC Act 1999* (Cwlth), the Forest Red-tailed Black Cockatoo (*Calyptorhynchus banksia naso*) and the Baudin's Black Cockatoo (*Calyptorhynchus baudinii*) listed as vulnerable; all are listed as threatened under the *Biodiversity Conservation Act 2016* (WA). According to the WALGA Environmental Planning Tool (2020), the site is located within in a confirmed breeding and roosting area for the threatened Carnaby's Black Cockatoo (*Calyptorhynchus latirostris*) and within a potential feeding area for the species. The location of the survey is also classified as a potential Priority 4 Quenda (*Isoodon fusciventer*) habitat (WALGA 2020).

3.0 Methodology

3.1 Objectives

The objective of the survey was to collect sufficient data to collect adequate information to enable the renewal of a clearing permit. This included undertaking a desktop review, determining flora species present, assessing vegetation type and condition, assessing the key habitats which could be used by threatened black cockatoos.

3.2 Desktop and Literature Review

A desktop flora and vegetation survey was undertaken to determine:

- likely native and non-native flora and fauna species present
- current extent of native vegetation
- general floristic community types
- likely presence of threatened or priority flora and fauna species
- likely presence of any threatened or priority ecological communities.

The following databases were accessed to obtain relevant information:

- NatureMap (Department of Biodiversity, Conservation and Attractions, 2020b) (Appendix 1)
- Protected Matters Search Tool (Department of the Environment and Energy (DoEE), 2020b) (Appendix 2)
- FloraBase (Department of Biodiversity, Conservation and Attractions, 2018b)
- Threatened and priority flora and ecological community database searches (Department of Biodiversity, Conservation and Attractions, 2018c).

Summary sheets of threatened flora potentially occurring in the area were created for quick reference in the field (Appendix 3).

3.3 Flora On-ground Methodology

Natural Area Botanists Sharon Hynes and Adam De Jong traversed the site on the 24 September 2020, with key GPS data recorded using a handheld Samsung tablet loaded with GIS mapping software (Mappt), including:

- identification of flora species present by walking the site, including targeting declared rare and priority species indicated as potentially present during desktop assessments
- assessing boundaries of vegetation type and condition extent across the site
- determining the presence of any further threatened or priority listed flora species and/or ecological communities listed under the *Biodiversity and Conservation Act 2016* (WA) and/or the *Environment Protection and Biodiversity Conservation Act 1999* (Commonwealth)
- locations of habitat trees with a DBH >500 mm which have the potential to provide habitat in the form of foraging, roosting or hollows for threatened black cockatoos.

The flora and vegetation survey was conducted in accordance with *Technical Guidance- Flora and Vegetation Surveys for Environmental Impact Assessment* (Environmental Protection Authority, 2016). Samples were collected, or photographs taken of unfamiliar species to enable later identification.

3.3.1 Vegetation Type

The vegetation type was determined using the structural classes described in *Bush Forever Volume 2* (Government of Western Australia, 2000), and records dominant over, middle and understorey species. A tablet equipped with GPS mapping software was used to mark the change in vegetation type across the site. A description of the various structural classes is provided in Table 1.

Table 1: Vegetation structural classes

Life Form/Height Class	Canopy Percentage Cover			
	100 – 70%	70 – 30%	30 - 10%	10 – 2 %
Trees over 30 m	Tall closed forest	Tall open forest	Tall woodland	Tall open woodland
Trees 10 – 30 m	Closed forest	Open forest	Woodland	Open woodland
Trees under 10 m	Low closed forest	Low open forest	Low woodland	Low open woodland
Tree Mallee	Closed tree mallee	Tree mallee	Open tree mallee	Very open tree mallee
Shrub Mallee	Closed shrub mallee	Shrub mallee	Open shrub mallee	Very open shrub mallee
Shrubs over 2 m	Closed tall scrub	Tall open scrub	Tall shrubland	Tall open shrubland
Shrubs 1 – 2 m	Closed heath	Open heath	Shrubland	Open shrubland
Shrubs under 1 m	Closed low heath	Open low heath	Low shrubland	Low open shrubland
Grasses	Closed grassland	Grassland	Open grassland	Very open grassland
Herbs	Closed hermland	Hermland	Open hermland	Very open hermland
Sedges	Closed sedgeland	Sedgeland	Open sedgeland	Very open sedgeland

(Source: Government of Western Australia, 2000)

3.3.2 Vegetation Condition

Vegetation condition was assessed using the rating scale outlined in *Bush Forever Volume 2* (Government of Western Australia, 2000). A tablet equipped with GPS mapping software was used to mark the vegetation condition across the site. Table 2 provides a description of the rating scale.

Table 2: Vegetation condition ratings

Category	Description
1 Excellent	Pristine or nearly so, no obvious signs of damage caused by human activities since European settlement.
2 Very Good	Some relatively slight signs of damage caused by human activities since European settlement. For example, some signs of damage to tree trunks caused by repeated fire, the presence of some relatively non-aggressive weeds, or occasional vehicle tracks.
3 Good	More obvious signs of damage caused by human activities since European settlement, including some obvious impact on the vegetation structure such as that caused by low levels of grazing or slightly less aggressive weeds.

Category	Description
4 Poor	Still remains basic vegetation structure or ability to regenerate to it after very obvious impacts of human activities since European settlement, such as grazing, partial clearing, frequent fires or aggressive weeds.
5 Very Poor	Severely impacted by grazing, very frequent fires, clearing or a combination of these activities. Scope for some regeneration but not to a state approaching good condition without intensive management. Usually with a number of weed species present including very aggressive species.
6 Completely Degraded	Areas that are completely or almost completely without native species in the structure of their vegetation; i.e. areas that are cleared or ‘parkland cleared’ with their flora comprising of weed or crop species with isolated native trees or shrubs.

3.3.3 Limitations

A number of limitations associated with both desktop and on-site flora surveys exist, including:

- the survey was conducted just before the optimal time of year for flora species in the Perth region with those species present at the time recorded
- database searches only provide an indication of what flora species may be present, with on ground surveys required to confirm those actually present
- the differing databases are reliant on information submitted via various reporting mechanisms, so all records of a particular species or ecological community within a specified area may not be complete
- on-ground surveys indicate species present at the time of the assessment, with species flowering at different times not always able to be identified
- not all species flower every year.

Despite these limitations, Natural Area believes 80-90% of flora species were identified.

4.0 Results

4.1 Desktop Survey

A review of NatureMap (2020) identified a total of 822 flora species which could potentially occur within a 5 km radius of the site including:

- 543 dicotyledons
- 23 fungi
- 1 gymnosperm
- 247 monocotyledons
- 8 ferns.

4.1.1 Significant Flora

A review of NatureMap indicated 34 conservation significant flora species listed under the *Biodiversity Conservation Act 2016* (WA), potentially occurring within 5 km of the site (Department of Biodiversity Conservation and Attractions, 2020b). A review of the Protected Matters Search Tool (PMST) (Department of the Environment and Energy, 2019) indicated 28 significant flora species listed under the *Environment Protection and Biodiversity Conservation Act 1999 (EPBC Act)* (Cwlth) as potentially occurring within a 5 km radius of the site.

A review of the DBCA's threatened and priority flora database indicated 58 priority species and 19 threatened species have previously been recorded within a 10 km buffer of the survey site. Of the 95 conservation significant species potentially found in the area, it was determined that the site conditions (soil type, drainage, location) may be suitable for 26 (highlighted in green) of these species (Table 3). Conservation code descriptions are provided in Appendix 3.

4.1.2 Threatened Ecological Communities

A review of the PMST report indicated that there are three listed Threatened Ecological Communities that could potentially occur within 5 km of the site (Table 4). A review of the DBCA's Threatened Ecological Communities database indicates that three threatened and one Priority floristic community type occur within a 5 km buffer of the area (Table 4).

Table 4: Potential Threatened Ecological Communities within the survey site

Name	Status	Presence
Banksia woodlands of the Swan Coastal Plain	Endangered	Unlikely site not within the SCP, soil type unsuitable
Banksia attenuata woodlands over species rich dense shrublands	Endangered	Unlikely site not within the SCP, soil type unsuitable
Central North Darling Scarp Granite Shrubland Community	Priority 4	Unlikely soil type unsuitable
Clay Pans of the Swan Coastal Plain	Critically Endangered	Unlikely site is not within SCP, soil type unsuitable
Corymbia calophylla - Xanthorrhoea preissii woodlands and shrublands, Swan Coastal Plain	Critically Endangered	Unlikely site not within the SCP, soil type unsuitable
Tuart (<i>Eucalyptus gomphocephala</i>) Woodlands and Forests of the Swan Coastal Plain	Critically Endangered	Unlikely site not within the SCP, Soil type unsuitable

4.2 Flora Survey Results

4.2.1 Flora

A total of 111 flora species (taxa) were recorded from 31 families during the field survey, including 32 weeds and 79 native species. Examples of native flora species recorded are shown in Figure 3 and weed species in Figure 4. A complete flora species list is provided in Appendix 4.

Jacksonia alata

Stylidium affine
(Queen Triggerplant)

Bossiaea ornata
(Broad Leaved Brown Pea)

Philotheca spicata
(Pepper and Salt)

Conostylis setosa
(White Cottonhead)

Hakea amplexicaulis
(Prickly Hakea)

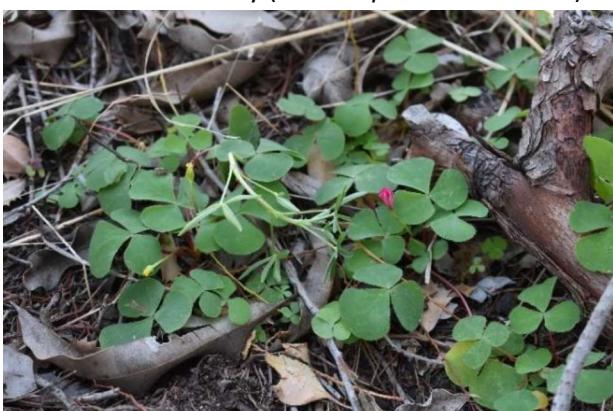

Figure 3: Examples of native flora species recorded

African Veldt Daisy (**Osteospermum ecklonis*)

**Genista monspessulana*

Largeflower Wood Sorrel (**Oxalis purpurea*)

**Babiana angustifolia*

Figure 4: Examples of non-native flora species recorded

4.2.2 Vegetation Type

One vegetation type was recorded across the survey site, Marri – Jarrah Woodland (Figure 5). This vegetation community is comprised of a woodland of *Corymbia calophylla* (Marri) and *Eucalyptus marginata* (Jarrah), with a middle storey of *Banksia sessilis* var. *sessilis*, *Xanthorrhoea preissii* and *Xanthorrhoea brunonis* over an understorey of mixed native herbs and sedges.

Figure 5: Marri- Jarrah Woodland, Lesmurdie Primary School.

4.2.3 Threatened and Priority Ecological Communities

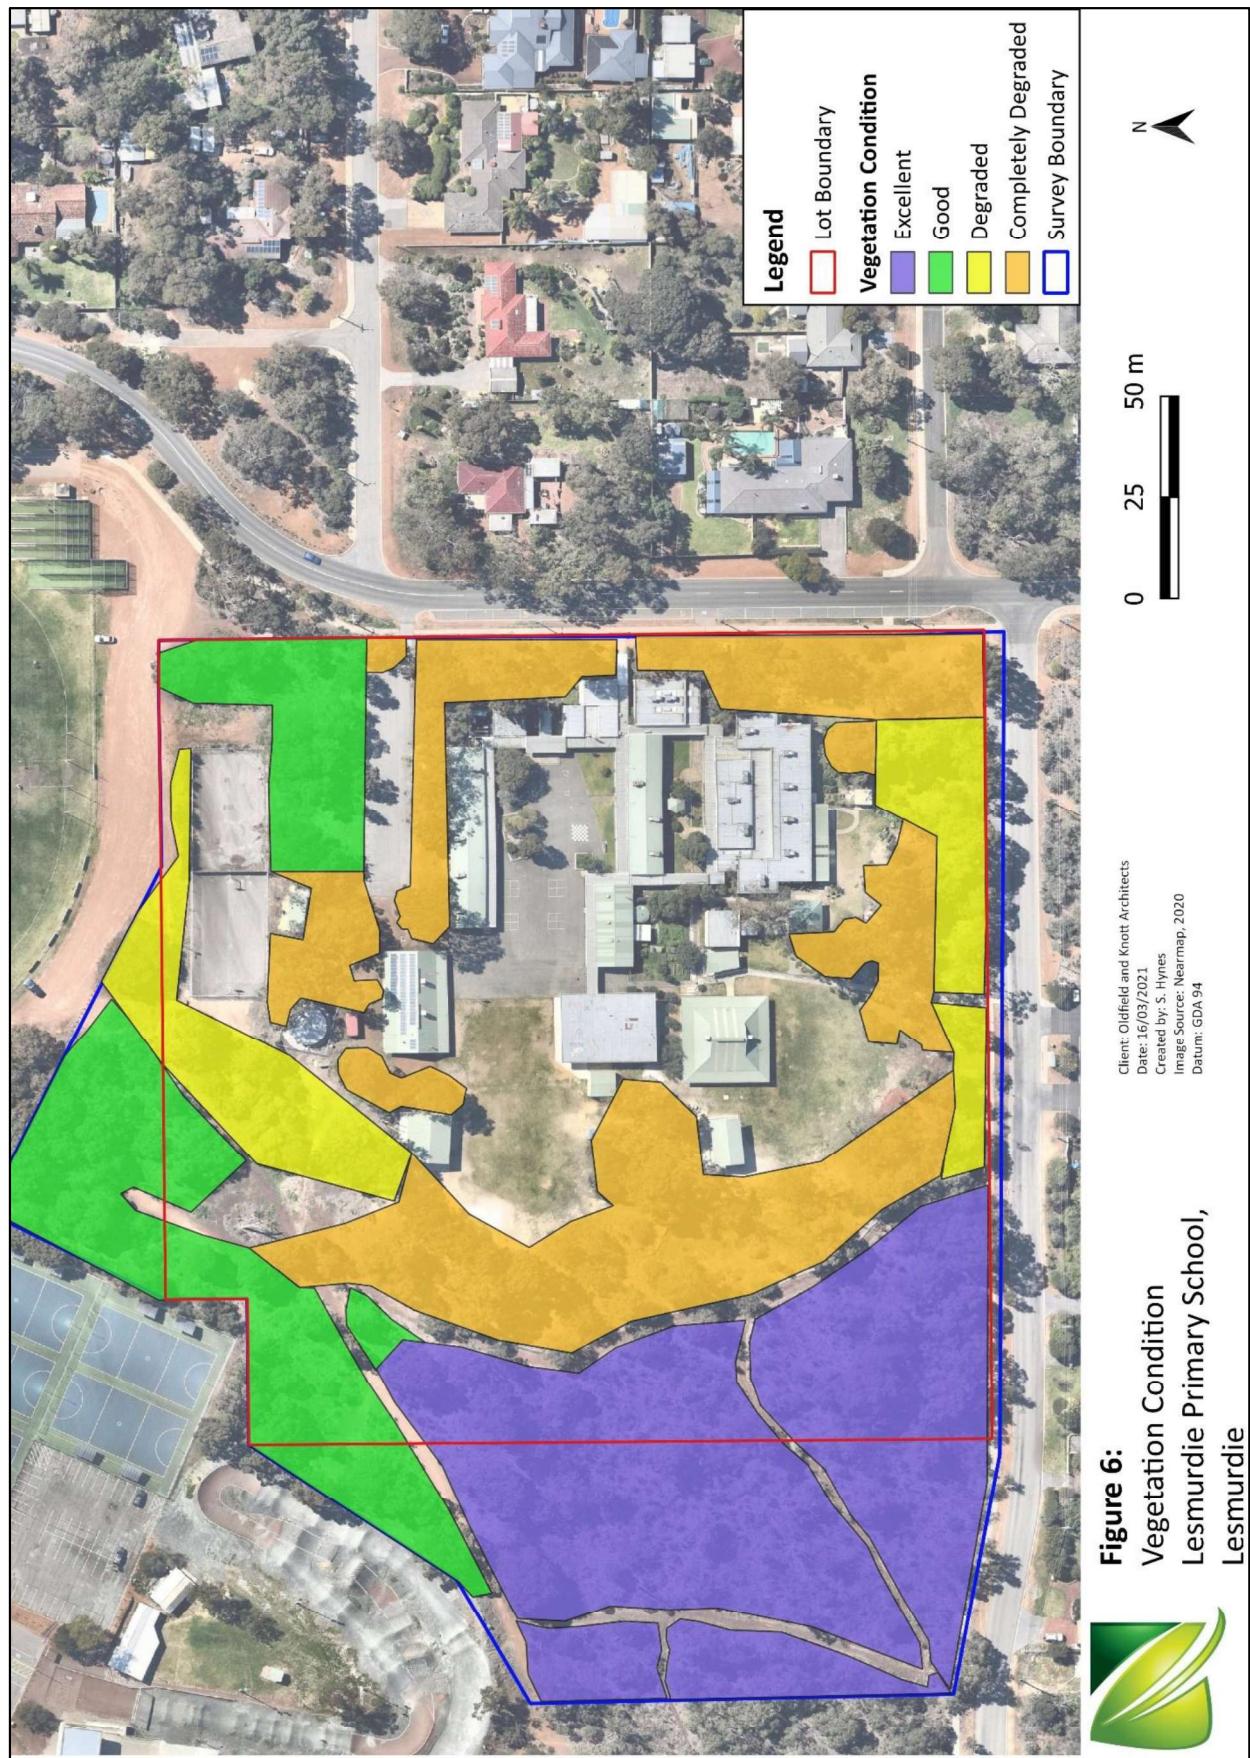

The Priority 4 Central North Darling Scarp Granite Shrubland Community is the closest conservation significant community occurring within 750 m of the site (DBCA, 2020c); however, this was not recorded within the site as there are no granite outcrops present and vegetation type present was a Woodland rather than a shrubland. All the other threatened communities listed in Table 4 as potentially occurring are typically associated with the soils and communities of the Swan Coastal Plain rather than the Northern Jarrah Forest Region and the higher elevations of the Darling Scarp; the dominant species for these community types did not match the vegetation type found on site which consisted of Jarrah and Marri Woodland.

4.2.4 Vegetation Condition

Vegetation condition ranged from Completely Degraded to Excellent, with majority of the site (37.4%) classified as Excellent condition (Figure 5 and Table 5). The areas that were classified as Completely Degraded surrounding the school to the north-east and south contained only native overstorey and minimal native understorey species, non-native plants have also been planted in these areas.

Table 5: Vegetation condition within the survey area

Vegetation Condition	Excellent	Very Good	Good	Degraded	Completely Degraded	Totals
Area (ha)	1.2	0	0.65	0.36	1	3.21
Area (%)	37.4	0	20.2	11.2	31.2	100

4.3 Fauna Survey Results

Opportunistic sightings of fauna were recorded, either directly or indications of their presence during the Level 1 fauna survey. A total of 10 species were recorded, including two mammals and eight birds (Table 6). The threatened Forest Red-tailed Black Cockatoo (*Calyptorhynchus banksii naso*) were observed feeding on Marri at the south of the site during the survey (Figure 9), this species is listed as Vulnerable under *the Environment Protection and Biodiversity Conservation Act 1999* (Cwlth). Evidence of feeding was observed in the form of chewed Marri (*Corymbia calophylla*) nuts by both black cockatoo's and parrots (Figure 8 and 9).

Signs of the Priority 4 Quenda (*Isoodon fusciventer*) was noted in the form of diggings to the west of the School Lot, this species is listed under the *Biodiversity Conservation Act 2016* (WA). The Quenda is also a frequent visitor to the School grounds as the grounds keepers and teachers have observed them near classrooms (Personal communication, 2020). Quenda present would be transient feeders within the school boundary as there is no thick understorey present to provide permanent habitat. Examples of fauna recorded during the survey are shown in Figure 7.

Table 6: Fauna species observed

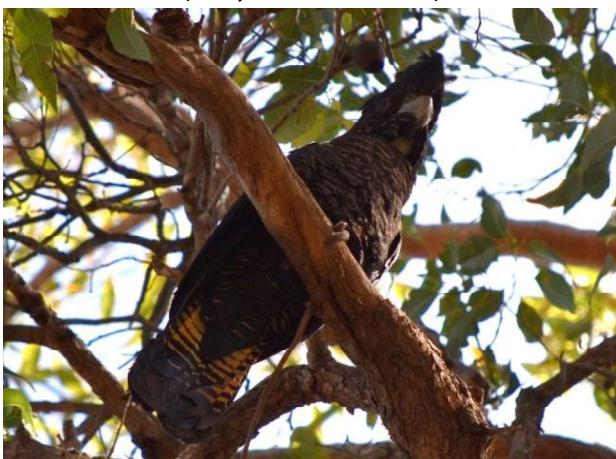

Family	Scientific Name	Common Name	Lifeform
Meliphagidae	<i>Anthochaera carunculata</i>	Red Wattlebird	Bird
Cacatuidae	<i>Cacatua roseicapilla</i>	Galah	Bird
Cacatuidae	<i>Calyptorhynchus banksii naso</i>	Forest Red-tailed Black Cockatoo	Bird
Corvidae	<i>Corvus coronoides</i>	Australian Raven	Bird
Cracticidae	<i>Cracticus tibicen</i>	Australian Magpie	Bird
Alcedinidae	<i>Dacelo novaeguineae*</i>	Laughing Kookaburra	Bird
Peramelidae	<i>Isoodon fusciventer</i>	Quenda/ Southern Brown Bandicoot (diggings)	Mammal
Meliphagidae	<i>Lichmera indistincta</i>	Brown Honeyeater	Bird
Leporidae	<i>Oryctolagus cuniculus*</i>	Rabbit (diggings)	Mammal
Psittacidae	<i>Platycercus zonarius</i>	Australian Ringneck	Bird

Figure 7: Fauna species recorded

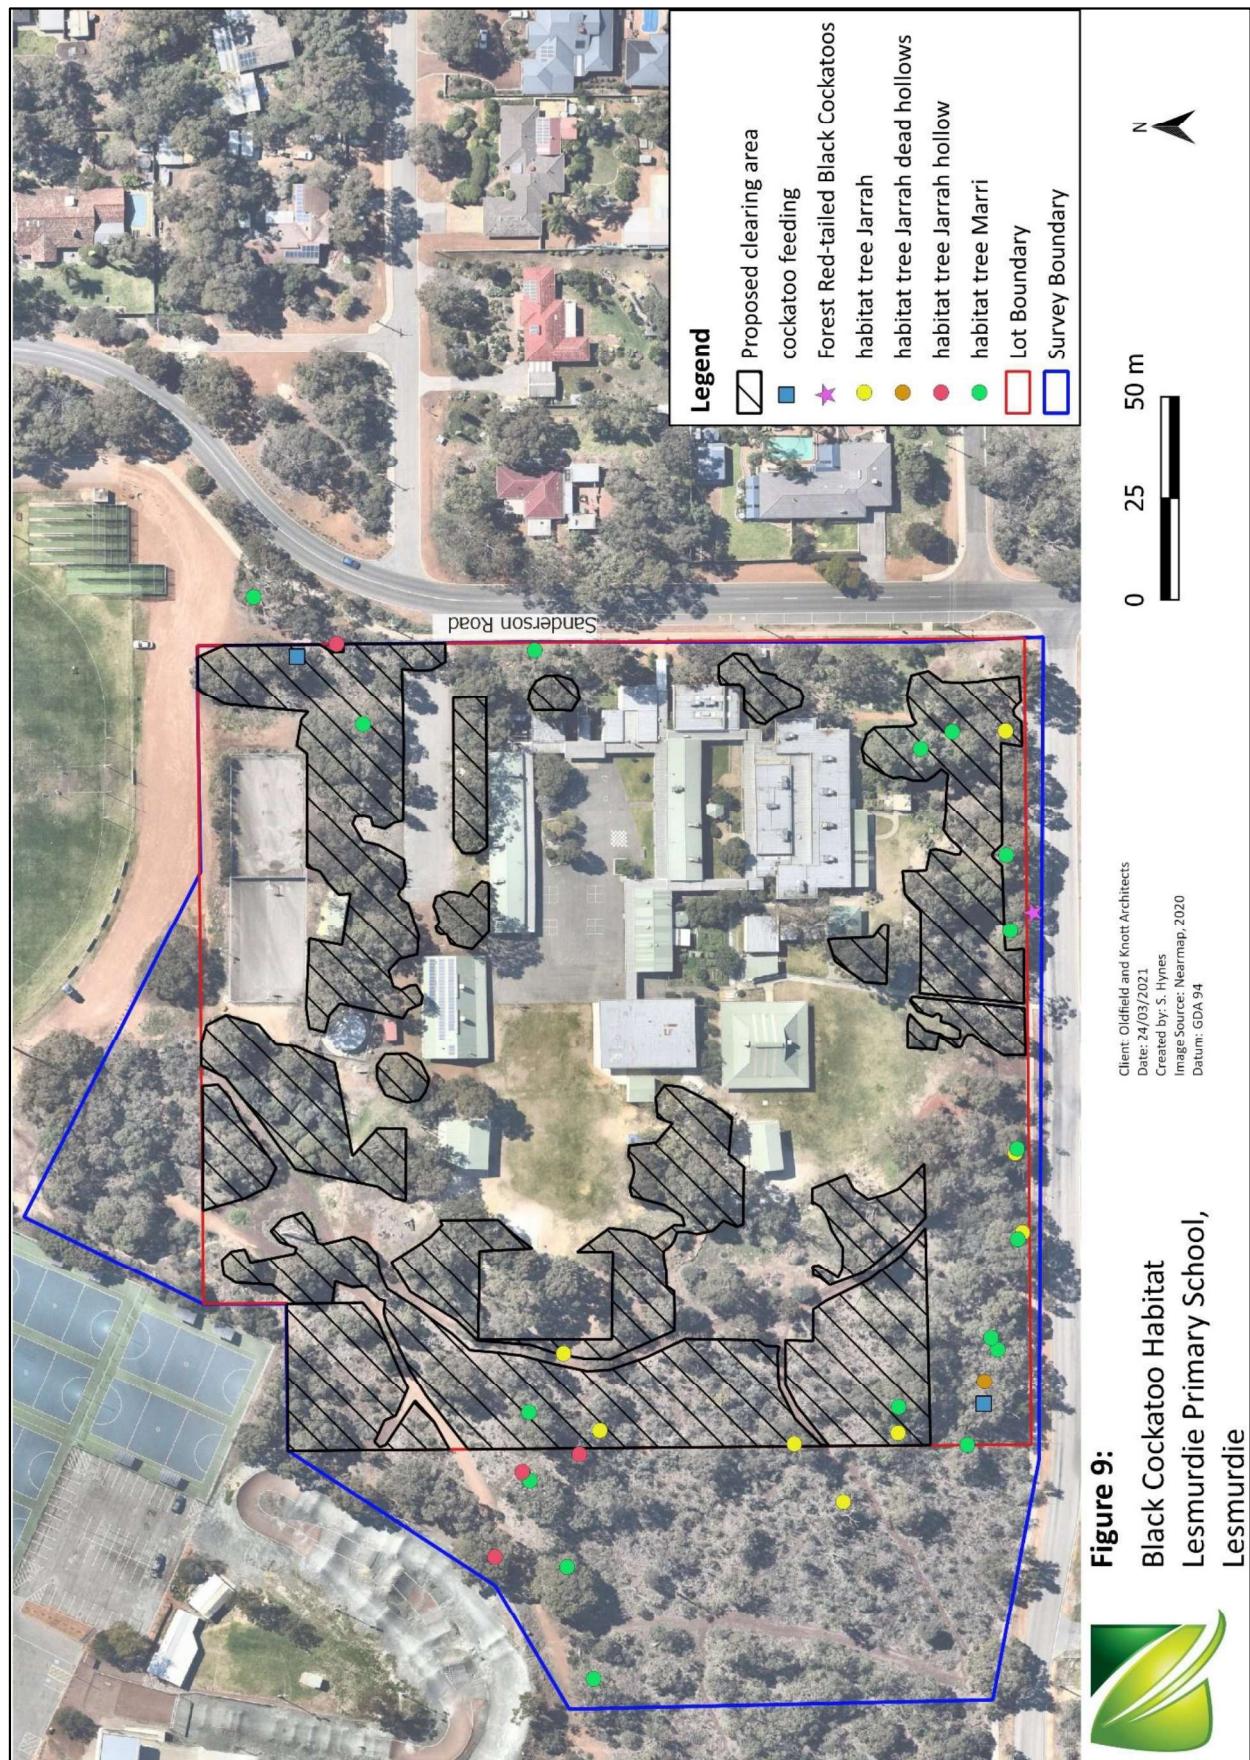

4.3.1 Fauna Habitat

Signs of feeding of the Forest Red-tailed Black Cockatoos (*Calyptorhynchus banksii naso*) was noted on site, with birds also heard calling from nearby bushland. A total of 31 habitat trees with a DBH >500 mm were recorded within the survey area, with 23 inside the School Lot, with 11 occurring within the proposed clearing areas including five Marri and six Jarrah trees (Figure 9).

A total of six hollows were recorded within Jarrah habitat trees, which are of a suitable size to be potentially utilised by black cockatoos. No current use of nesting hollows by black cockatoos was noted. Forest Red-tailed Black Cockatoo feeding evidence on Marris was noted in one location within the site with birds feeding observed during the survey, the majority of other feeding observed being by the Australian Ringneck parrots (Figures 8 and 9).

Figure 8: Evidence of feeding by Forest Red-tailed Black Cockatoos on Marri (*Corymbia calophylla*) nuts

5.0 Implications of Results

5.1 Flora and Vegetation

Natural Area's September 2020 survey of a portion of the survey area in Lesmurdie recorded 111 flora species from 31 families, 32 of which were introduced and 79 were native. One vegetation type was identified Marri - Jarrah Woodland. Vegetation condition ranged from Completely Degraded to Excellent with the majority (37.4%) classified as Excellent condition.

5.2 Significant Flora

No threatened or priority flora species were identified during the September 2020 flora and vegetation survey. The DBCA database search did not identify any threatened or priority species within 750 m of the survey area (DBCA, 2020c).

5.3 Threatened Ecological Communities (TEC)

The PMST report (Department of Agriculture, Water and the Environment, 2020a) indicated the potential presence of three threatened ecological communities to occur within or in close proximity to the site (refer to Table 4). The DBCA threatened and priority ecological community database search indicated one priority and three threatened communities to occur within the site (2020c). However, the DBCA database search indicated no presence of threatened or priority communities within the site, with the soil type being unsuitable for the listed potential communities and most communities occurring within the Swan Coastal Plain at the bottom of the Darling Scarp. The closest known community was the Priority 4 Central North Darling Scarp Granite Shrubland Community which was 770 m to the west of the site (DBCA, 2020c).

During the September 2020 visit, Natural Area botanists confirmed there were no threatened or priority listed ecological communities that were listed in Table 4 present as the lateritic soil at the site is unsuitable for these communities. Similarly, the dominant overstorey species associated with the vegetation type Jarrah-Marri Woodland are inconsistent with the recognised dominant overstorey or other common indicative species of the listed communities.

5.4 Quenda Habitat

Quenda (*Isoodon fusciventer*) is known to occur within the area with observation of individuals noted by the School staff and diggings observed during the September 2020 survey adjacent the school to the west. This species is a Priority 4 listed under the *Biodiversity Conservation Act 2016* (WA), and should be considered during the planning and prior to clearing for construction of proposed developments to the school buildings.

5.5 Black Cockatoo Habitat

Marri is a common food source for the Carnaby's Cockatoo, Baudin's and Forest Red-tailed Black Cockatoos species. Foraging by Forest Red-tailed Black Cockatoos on Marri nuts was noted on site and a total of 23 habitat trees were recorded in the School Lot, with six of these having hollows suitable for use by black cockatoos. Twelve habitat trees are present within the proposed clearing envelope with one of these containing hollows suitable for use by black cockatoos. No signs of roosting or nesting by black cockatoos was noted within the School Lot or the survey area, although it does contain 1.84 ha of good quality foraging habitat (within the School Lot). As over 1 ha (1.4 ha) is proposed to be cleared it does exceed the trigger

values for referral under the EPBC Act for referral in the EPBC Act referral guidelines for three threatened black cockatoo species (DSEWPaC, 2012).

As the site is located in the Northern Jarrah Forest region where there is a large amount of vegetation present, with the Mundy Regional Park and Korung National Park in close proximity and containing better quality habitat, the proposed clearing of 1.4 ha is unlikely to have a significant impact on black cockatoo habitat for the region. The vegetation complex present also retains over 70% of its pre-European extent within the Kalamunda Local Government area. A large proportion of the vegetation in the school lot is also parkland cleared. As such, Natural Area recommends that the proposal is submitted as a clearing permit to the Department of Water and Environmental Regulation to determine whether a referral under the *EPBC Act 1999* is warranted. A preliminary discussion with DWER indicated that it may be better assessed under the Planning processes as the clearing is mostly associated with the reductions of the proposed buildings BALs. Natural Area's assessment of significance against the Referral Guidelines (DSEWPaC, 2012) is provided in Table 7.

5.5.1 Mitigation and Recommendations

Mitigation of effects on black cockatoo habitat were considered during the design phase, with over half the habitat trees recorded within the School Lot to be retained in the south-west of the site and within the nature strip for the south-east carpark. Natural Area also recommends that the Jarrah habitat tree containing hollows suitable for use by black cockatoos on the north-east boundary be retained, with a suitable buffer to ensure the stability of the tree by limiting root disturbance.

Table 7: Referral guidelines for the three threatened black cockatoo species

Guideline	Comment
High risk of significant impacts: referral recommended	<ul style="list-style-type: none"> ▪ Clearing of any known nesting tree ▪ Clearing or degradation of any part of a vegetation community known to contain breeding habitat ▪ Clearing of more than 1 ha of quality foraging habitat. ▪ Clearing or degradation (including pruning the top canopy) of a known night roosting site ▪ Creating a gap of greater than 4 km between patches of black cockatoo habitat (breeding, foraging or roosting). <p>No known nesting trees were recorded on site, although there were six trees with hollows large enough to be potentially utilised by black cockatoos; one of which occurs within the proposed clearing area</p> <ul style="list-style-type: none"> ▪ The clearing area occurs within a known breeding and roosting area according to WALGA Environmental Planning Tool, although no signs of breeding were noted during the spring 2020 survey ▪ Although the proposed clearing (1.4 ha) exceeds the 1 ha of quality foraging habitat it is a small mostly degraded area within the highly vegetated Northern Jarrah Forest region, with Mundaring Regional Park and Korung National Park nearby and is unlikely to cause significant impact to the feeding habitat in this region. The vegetation complex in this area retains over 70% of its original pre-European extent within the Local Government area. Evidence of feeding was observed within the site boundary, with Forest Red-tailed Black Cockatoo observed feeding on site. ▪ Of the 23 habitat trees within the school lot 11 are within the proposed clearing area, with the south-west POS and carpark designed to avoid clearing habitat trees in that section ▪ Clearing of this area would not cause a gap of more than 4 km between patches of black cockatoo habitat as the remainder of the vegetation at Ray Owen Reserve will be retained and similar vegetation is present in nearby reserves, Regional and National Parks.

Guideline	Comment
<p>Uncertainty: referral recommended or contact the department</p> <ul style="list-style-type: none"> Degradation (such as through altered hydrology or fire regimes) of more than 1 ha of foraging habitat. Significance will depend on the level and extent of degradation and the quality of the habitat. Clearing or disturbance in areas surrounding black cockatoo breeding, foraging or night roosting habitat that has the potential to degrade habitat through introduction of invasive species, edge effects, hydrological changes, increased human visitation or fire. Actions that do not directly affect the listed species but that have the potential for indirect impacts such as increasing competitors for nest hollows. Actions with the potential to introduce known plant diseases such as <i>Phytophthora</i> spp. to an area where the pathogen was not previously known. 	<ul style="list-style-type: none"> The area will be directly affected through clearing of black cockatoo habitat with indirect effects to the remnant vegetation within Ray Owen Reserve via fragmentation of vegetation and increased edge effects of remaining vegetation to the west. <ul style="list-style-type: none"> Actions of clearing in this area will not significantly affect black cockatoo habitat or individuals. Actions whose impacts occur outside the modelled distribution of the three black cockatoos.
<p>Low risk of significant impacts: referral may not be required</p>	

5.6 Assessment Against Clearing Principles

An assessment of information obtained during the September 2020 survey has been made against the Western Australian clearing principles. It is suggested that the clearing application is not at variance to any of the ten clearing principles (Table 8).

Table 8: Assessment against clearing principles

Clearing Principle	Comment
A Native vegetation should not be cleared if it comprises a high level of biological diversity.	The area to be cleared is not likely to be at variance with this principle: <ul style="list-style-type: none"> ▪ A total of 111 flora species were identified, including 79 native and 32 introduced species, which is not high for this botanical region ▪ majority of the vegetation in the clearing area is in degraded condition ▪ during the September 2020 survey by Natural Area botanists, no conservation significant flora was identified within the proposed clearing area
B Native vegetation should not be cleared if it comprises the whole or a part of, or is necessary for the maintenance of, a significant habitat for fauna indigenous to Western Australia.	The area to be cleared is not likely to be at variance with this principle: <ul style="list-style-type: none"> ▪ the area contains habitat suitable for black cockatoo foraging and roosting, however there is a lot of nearby areas that provide higher quality habitat and are much larger than this site such as Mundy Regional Park to the west and Korung National Park to the south-east ▪ the Priority 4 Quenda (<i>Isoodon fusciventer</i>) is known to frequent the school lot although these would be transient animals foraging, as the vegetation within the school lacks the thick understorey habitat required for this species.
C Native vegetation should not be cleared if it includes, or is necessary for the continued existence of, rare flora.	The area to be cleared is not likely to be at variance with this principle: <ul style="list-style-type: none"> ▪ During the September 2020 survey by Natural Area botanists, no conservation significant flora was identified within the proposed clearing area
D Native vegetation should not be cleared if it comprises the whole or a part of, or is necessary for the maintenance of a threatened ecological community.	The area to be cleared is not likely to be at variance with this principle: <ul style="list-style-type: none"> ▪ No threatened or priority ecological communities occur within the site.
E Native vegetation should not be cleared if it is significant as a remnant of native vegetation in an area that has been extensively cleared.	The area to be cleared is not likely to be at variance with this principle: <ul style="list-style-type: none"> ▪ Ray Owen Reserve which is associated with the site is not a large bushland reserve and there are much larger and higher quality vegetation nearby in Mundy Regional Park to the west and Korung National Park to the south-east

Clearing Principle	Comment
F Native vegetation should not be cleared if it is growing in, or in association with, an environment associated with a watercourse or wetland.	The area to be cleared is not likely to be at variance with this principle as the site has no association with a watercourse or wetland.
G Native Vegetation should not be cleared if the clearing of the vegetation is likely to cause appreciable land degradation.	The area to be cleared is not likely to be at variance with this principle as it is not expected to cause further land degradation and the area to be cleared is proposed to be developed around an existing structure. Majority of the existing vegetation within the school lot has been parkland cleared previously with only trees over lawn.
H Native vegetation should not be cleared if the clearing of the vegetation is likely to have an impact on the environmental values of any adjacent or nearby conservation area.	The area to be cleared is not at variance with this principle as the area is proposed to be developed around an existing School buildings and structures and is surrounded by residential housing.
I Native vegetation should not be cleared if the clearing of the vegetation is likely to cause deterioration in the quality of surface or underground water.	The area to be cleared is not likely to be at variance with this principle as no surface water courses were identified during the September 2020 survey by Natural Area botanists.
J Native vegetation should not be cleared if clearing the vegetation is likely to cause, or exacerbate, the incidence of flooding	The area to be cleared is not likely to be at variance with this principle: <ul style="list-style-type: none"> ▪ The area proposed to be cleared is located around an existing structure and is not expected to change or exacerbate the incidence of flooding

Conservation Codes

- T - Rare or likely to become extinct
- X - Presumed extinct
- IA - Protected under international agreement
- S - Other specially protected fauna
- 1 - Priority 1
- 2 - Priority 2
- 3 - Priority 3
- 4 - Priority 4
- 5 - Priority 5

¹ For NatureMap's purposes, species flagged as endemic are those whose records are wholly contained within the search area. Note that only those records complying with the search criterion are included in the calculation. For example, if you limit records to those from a specific datasource, only records from that datasource are used to determine if a species is restricted to the query area.

Appendix 2: Protected Matters Search Tool Report

EPBC Act Protected Matters Report

This report provides general guidance on matters of national environmental significance and other matters protected by the EPBC Act in the area you have selected.

Information on the coverage of this report and qualifications on data supporting this report are contained in the caveat at the end of the report.

Information is available about [Environment Assessments](#) and the EPBC Act including significance guidelines, forms and application process details.

Report created: 11/10/20 16:44:06

Summary

Matters of National Environmental Significance

This part of the report summarises the matters of national environmental significance that may occur in, or may relate to, the area you nominated. Further information is available in the detail part of the report, which can be accessed by scrolling or following the links below. If you are proposing to undertake an activity that may have a significant impact on one or more matters of national environmental significance then you should consider the [Administrative Guidelines on Significance](#).

World Heritage Properties:	None
National Heritage Places:	None
Wetlands of International Importance:	None
Great Barrier Reef Marine Park:	None
Commonwealth Marine Area:	None
Listed Threatened Ecological Communities:	3
Listed Threatened Species:	40
Listed Migratory Species:	9

Other Matters Protected by the EPBC Act

This part of the report summarises other matters protected under the Act that may relate to the area you nominated. Approval may be required for a proposed activity that significantly affects the environment on Commonwealth land, when the action is outside the Commonwealth land, or the environment anywhere when the action is taken on Commonwealth land. Approval may also be required for the Commonwealth or Commonwealth agencies proposing to take an action that is likely to have a significant impact on the environment anywhere.

The EPBC Act protects the environment on Commonwealth land, the environment from the actions taken on Commonwealth land, and the environment from actions taken by Commonwealth agencies. As heritage values of a place are part of the 'environment', these aspects of the EPBC Act protect the Commonwealth Heritage values of a Commonwealth Heritage place. Information on the new heritage laws can be found at <http://www.environment.gov.au/heritage>

A [permit](#) may be required for activities in or on a Commonwealth area that may affect a member of a listed threatened species or ecological community, a member of a listed migratory species, whales and other cetaceans, or a member of a listed marine species.

Commonwealth Land:	1
Commonwealth Heritage Places:	None
Listed Marine Species:	14
Whales and Other Cetaceans:	None
Critical Habitats:	None
Commonwealth Reserves Terrestrial:	None
Australian Marine Parks:	None

Extra Information

This part of the report provides information that may also be relevant to the area you have nominated.

State and Territory Reserves:	5
Regional Forest Agreements:	1
Invasive Species:	42
Nationally Important Wetlands:	None
Key Ecological Features (Marine)	None

Details

Matters of National Environmental Significance

Listed Threatened Ecological Communities	[Resource Information]	
For threatened ecological communities where the distribution is well known, maps are derived from recovery plans, State vegetation maps, remote sensing imagery and other sources. Where threatened ecological community distributions are less well known, existing vegetation maps and point location data are used to produce indicative distribution maps.		
Name	Status	Type of Presence
Banksia Woodlands of the Swan Coastal Plain ecological community	Endangered	Community likely to occur within area
Clay Pans of the Swan Coastal Plain	Critically Endangered	Community likely to occur within area
Tuart (<i>Eucalyptus gomphocephala</i>) Woodlands and Forests of the Swan Coastal Plain ecological community	Critically Endangered	Community may occur within area
Listed Threatened Species	[Resource Information]	
Name	Status	Type of Presence
Birds		
<i>Botaurus poiciloptilus</i>	Endangered	Species or species habitat may occur within area
Australasian Bittern [1001]		
<i>Calidris ferruginea</i>	Critically Endangered	Species or species habitat may occur within area
Curlew Sandpiper [856]		
<i>Calyptorhynchus banksii_naso</i>	Vulnerable	Species or species habitat known to occur within area
Forest Red-tailed Black-Cockatoo, Karrak [67034]		
<i>Calyptorhynchus baudinii</i>	Endangered	Roosting known to occur within area
Baudin's Cockatoo, Long-billed Black-Cockatoo [769]		
<i>Calyptorhynchus latirostris</i>	Endangered	Species or species habitat known to occur within area
Carnaby's Cockatoo, Short-billed Black-Cockatoo [59523]		
<i>Leipoa ocellata</i>	Vulnerable	Species or species habitat likely to occur within area
Malleefowl [934]		
<i>Numenius madagascariensis</i>	Critically Endangered	Species or species habitat may occur within area
Eastern Curlew, Far Eastern Curlew [847]		
<i>Rostratula australis</i>	Endangered	Species or species habitat likely to occur within area
Australian Painted Snipe [77037]		
Mammals		
<i>Bettongia penicillata_ogilbyi</i>	Endangered	Species or species habitat may occur within area
Woylie [66844]		
<i>Dasyurus geoffroii</i>	Vulnerable	Species or species
Chuditch, Western Quoll [330]		

Name	Status	Type of Presence
<u>Pseudocheirus occidentalis</u> Western Ringtail Possum, Ngwayir, Womp, Woder, Ngoor, Ngoolangit [25911]	Critically Endangered	Species or species habitat may occur within area
<u>Setonix brachyurus</u> Quokka [229]	Vulnerable	Species or species habitat likely to occur within area
Plants		
<u>Acacia anomala</u> Grass Wattle, Chittering Grass Wattle [8153]	Vulnerable	Species or species habitat known to occur within area
<u>Andersonia gracilis</u> Slender Andersonia [14470]	Endangered	Species or species habitat may occur within area
<u>Anthocercis gracilis</u> Slender Tailflower [11103]	Vulnerable	Species or species habitat known to occur within area
<u>Austrostipa bronwenae</u> [87808]	Endangered	Species or species habitat may occur within area
<u>Banksia mimica</u> Summer Honeypot [82765]	Endangered	Species or species habitat likely to occur within area
<u>Calytrix breviseta subsp. breviseta</u> Swamp Starflower [23879]	Endangered	Species or species habitat likely to occur within area
<u>Chamelaucium sp. Gingin (N.G.Merchant 6)</u> Gingin Wax [88881]	Endangered	Species or species habitat may occur within area
<u>Conospermum undulatum</u> Wavy-leaved Smokebush [24435]	Vulnerable	Species or species habitat likely to occur within area
<u>Darwinia apiculata</u> Scarp Darwinia [8763]	Endangered	Species or species habitat known to occur within area
<u>Diplolaena andrewsii</u> [6601]	Endangered	Species or species habitat likely to occur within area
<u>Diuris drummondii</u> Tall Donkey Orchid [4365]	Vulnerable	Species or species habitat known to occur within area
<u>Diuris micrantha</u> Dwarf Bee-orchid [55082]	Vulnerable	Species or species habitat likely to occur within area
<u>Diuris purdiei</u> Purdie's Donkey-orchid [12950]	Endangered	Species or species habitat likely to occur within area
<u>Drakaea elastica</u> Glossy-leaved Hammer Orchid, Glossy-leaved Hammer Orchid, Warty Hammer Orchid [16753]	Endangered	Species or species habitat may occur within area
<u>Drakaea micrantha</u> Dwarf Hammer-orchid [56755]	Vulnerable	Species or species habitat may occur within area
<u>Eleocharis keigheryi</u> Keighery's Eleocharis [64893]	Vulnerable	Species or species

Name	Status	Type of Presence
<u>Eremophila glabra subsp. chlorella</u> [84927]	Endangered	Species or species habitat likely to occur within area
<u>Eucalyptus x balanites</u> Cadda Road Mallee, Cadda Mallee [87816]	Endangered	Species or species habitat may occur within area
<u>Goodenia arthrotricha</u> [12448]	Endangered	Species or species habitat likely to occur within area
<u>Grevillea curviloba subsp. incurva</u> Narrow curved-leaf Grevillea [64909]	Endangered	Species or species habitat may occur within area
<u>Grevillea thelemanniana</u> Spider Net Grevillea [32835]	Critically Endangered	Species or species habitat likely to occur within area
<u>Lasiopteratum pterocarpum</u> Wing-fruited Lasiopteratum [64922]	Endangered	Species or species habitat may occur within area
<u>Lepidosperma rostratum</u> Beaked Lepidosperma [14152]	Endangered	Species or species habitat likely to occur within area
<u>Macarthuria keigheryi</u> Keighery's Macarthuria [64930]	Endangered	Species or species habitat likely to occur within area
<u>Synaphea sp. Fairbridge Farm (D. Papenfus 696)</u> Selena's Synaphea [82881]	Critically Endangered	Species or species habitat likely to occur within area
<u>Synaphea sp. Pinjarra Plain (A.S. George 17182)</u> [86878]	Endangered	Species or species habitat may occur within area
<u>Thelymitra dedmaniarum</u> Cinnamon Sun Orchid [65105]	Endangered	Species or species habitat likely to occur within area
<u>Thelymitra stellata</u> Star Sun-orchid [7060]	Endangered	Species or species habitat known to occur within area

Listed Migratory Species		[Resource Information]
* Species is listed under a different scientific name on the EPBC Act - Threatened Species list.		
Name	Threatened	Type of Presence
Migratory Marine Birds <u>Apus pacificus</u> Fork-tailed Swift [678]		Species or species habitat likely to occur within area

Migratory Terrestrial Species
<u>Motacilla cinerea</u> Grey Wagtail [642]

Migratory Wetlands Species
<u>Actitis hypoleucus</u> Common Sandpiper [59309]

<u>Calidris acuminata</u> Sharp-tailed Sandpiper [874]	Species or species habitat likely to occur within area
---	--

Name	Threatened	Type of Presence
<u>Calidris ferruginea</u> Curlew Sandpiper [856]	Critically Endangered	Species or species habitat may occur within area
<u>Calidris melanotos</u> Pectoral Sandpiper [858]		Species or species habitat may occur within area
<u>Numenius madagascariensis</u> Eastern Curlew, Far Eastern Curlew [847]	Critically Endangered	Species or species habitat may occur within area
<u>Pandion haliaetus</u> Osprey [952]		Species or species habitat likely to occur within area
<u>Tringa nebularia</u> Common Greenshank, Greenshank [832]		Species or species habitat likely to occur within area

Other Matters Protected by the EPBC Act

Commonwealth Land		[Resource Information]
The Commonwealth area listed below may indicate the presence of Commonwealth land in this vicinity. Due to the unreliability of the data source, all proposals should be checked as to whether it impacts on a Commonwealth area, before making a definitive decision. Contact the State or Territory government land department for further information.		
Name		
Commonwealth Land -		
Listed Marine Species	[Resource Information]	
* Species is listed under a different scientific name on the EPBC Act - Threatened Species list.		
Name	Threatened	Type of Presence
Birds		
<u>Actitis hypoleucos</u> Common Sandpiper [59309]		Species or species habitat likely to occur within area
<u>Apus pacificus</u> Fork-tailed Swift [678]		Species or species habitat likely to occur within area
<u>Ardea alba</u> Great Egret, White Egret [59541]		Species or species habitat likely to occur within area
<u>Ardea ibis</u> Cattle Egret [59542]		Species or species habitat may occur within area
<u>Calidris acuminata</u> Sharp-tailed Sandpiper [874]		Species or species habitat may occur within area
<u>Calidris ferruginea</u> Curlew Sandpiper [856]	Critically Endangered	Species or species habitat may occur within area
<u>Calidris melanotos</u> Pectoral Sandpiper [858]		Species or species habitat may occur within area
<u>Haliaeetus leucogaster</u> White-bellied Sea-Eagle [943]		Species or species habitat likely to occur within area
<u>Merops ornatus</u> Rainbow Bee-eater [670]		Species or species

Name	Threatened	Type of Presence
<i>Motacilla cinerea</i> Grey Wagtail [642]		habitat may occur within area
<i>Numenius madagascariensis</i> Eastern Curlew, Far Eastern Curlew [847]	Critically Endangered	Species or species habitat may occur within area
<i>Pandion haliaetus</i> Osprey [952]		Species or species habitat likely to occur within area
<i>Rostratula benghalensis (sensu lato)</i> Painted Snipe [889]	Endangered*	Species or species habitat likely to occur within area
<i>Tringa nebularia</i> Common Greenshank, Greenshank [832]		Species or species habitat likely to occur within area

Extra Information

State and Territory Reserves		[Resource Information]
Name		State
Kalamunda		WA
Korung		WA
Lesmurdie Falls		WA
Unnamed WA23076		WA
Unnamed WA24657		WA

Regional Forest Agreements		[Resource Information]
Note that all areas with completed RFAs have been included.		

Name	State
South West WA RFA	Western Australia

Invasive Species		[Resource Information]
Weeds reported here are the 20 species of national significance (WoNS), along with other introduced plants that are considered by the States and Territories to pose a particularly significant threat to biodiversity. The following feral animals are reported: Goat, Red Fox, Cat, Rabbit, Pig, Water Buffalo and Cane Toad. Maps from Landscape Health Project, National Land and Water Resources Audit, 2001.		

Name	Status	Type of Presence
Birds		
Acridotheres tristis Common Myna, Indian Myna [387]		Species or species habitat likely to occur within area
Anas platyrhynchos Mallard [974]		Species or species habitat likely to occur within area
Carduelis carduelis European Goldfinch [403]		Species or species habitat likely to occur within area
Columba livia Rock Pigeon, Rock Dove, Domestic Pigeon [803]		Species or species habitat likely to occur within area

Name	Status	Type of Presence
<i>Passer domesticus</i> House Sparrow [405]		Species or species habitat likely to occur within area
<i>Passer montanus</i> Eurasian Tree Sparrow [406]		Species or species habitat likely to occur within area
<i>Streptopelia chinensis</i> Spotted Turtle-Dove [780]		Species or species habitat likely to occur within area
<i>Streptopelia senegalensis</i> Laughing Turtle-dove, Laughing Dove [781]		Species or species habitat likely to occur within area
<i>Sturnus vulgaris</i> Common Starling [389]		Species or species habitat likely to occur within area
<i>Turdus merula</i> Common Blackbird, Eurasian Blackbird [596]		Species or species habitat likely to occur within area
Mammals		
<i>Bos taurus</i> Domestic Cattle [16]		Species or species habitat likely to occur within area
<i>Canis lupus familiaris</i> Domestic Dog [82654]		Species or species habitat likely to occur within area
<i>Capra hircus</i> Goat [2]		Species or species habitat likely to occur within area
<i>Felis catus</i> Cat, House Cat, Domestic Cat [19]		Species or species habitat likely to occur within area
<i>Feral deer</i> Feral deer species in Australia [85733]		Species or species habitat likely to occur within area
<i>Funambulus pennantii</i> Northern Palm Squirrel, Five-striped Palm Squirrel [129]		Species or species habitat likely to occur within area
<i>Mus musculus</i> House Mouse [120]		Species or species habitat likely to occur within area
<i>Oryctolagus cuniculus</i> Rabbit, European Rabbit [128]		Species or species habitat likely to occur within area
<i>Rattus norvegicus</i> Brown Rat, Norway Rat [83]		Species or species habitat likely to occur within area
<i>Rattus rattus</i> Black Rat, Ship Rat [84]		Species or species habitat likely to occur within area
<i>Sus scrofa</i> Pig [6]		Species or species habitat likely to occur within area
<i>Vulpes vulpes</i> Red Fox, Fox [18]		Species or species habitat likely to occur within area

Name	Status	Type of Presence
Plants		
Anredera cordifolia Madeira Vine, Jalap, Lamb's-tail, Mignonette Vine, Anredera, Gulf Madeiravine, Heartleaf Madeiravine, Potato Vine [2643]		Species or species habitat likely to occur within area
Asparagus asparagoides Bridal Creeper, Bridal Veil Creeper, Smilax, Florist's Smilax, Smilax Asparagus [22473]		Species or species habitat likely to occur within area
Brachiaria mutica Para Grass [5879]		Species or species habitat may occur within area
Cenchrus ciliaris Buffel-grass, Black Buffel-grass [20213]		Species or species habitat may occur within area
Chrysanthemoides monilifera Bitou Bush, Boneseed [18983]		Species or species habitat may occur within area
Chrysanthemoides monilifera subsp. monilifera Boneseed [16905]		Species or species habitat likely to occur within area
Eichhornia crassipes Water Hyacinth, Water Orchid, Nile Lily [13466]		Species or species habitat likely to occur within area
Genista linifolia Flax-leaved Broom, Mediterranean Broom, Flax Broom [2800]		Species or species habitat likely to occur within area
Genista monspessulana Montpellier Broom, Cape Broom, Canary Broom, Common Broom, French Broom, Soft Broom [20126]		Species or species habitat likely to occur within area
Genista sp. X Genista monspessulana Broom [67538]		Species or species habitat may occur within area
Lantana camara Lantana, Common Lantana, Kamara Lantana, Large-leaf Lantana, Pink Flowered Lantana, Red Flowered Lantana, Red-Flowered Sage, White Sage, Wild Sage [10892]		Species or species habitat likely to occur within area
Lycium ferocissimum African Boxthorn, Boxthorn [19235]		Species or species habitat likely to occur within area
Olea europaea Olive, Common Olive [9160]		Species or species habitat may occur within area
Pinus radiata Radiata Pine Monterey Pine, Insignis Pine, Wilding Pine [20780]		Species or species habitat may occur within area
Rubus fruticosus aggregate Blackberry, European Blackberry [68406]		Species or species habitat likely to occur within area
Sagittaria platyphylla Delta Arrowhead, Arrowhead, Slender Arrowhead [68483]		Species or species habitat likely to occur within area
Salix spp. except S.babylonica, S.x calodendron & S.x reichardtii Willows except Weeping Willow, Pussy Willow and Sterile Pussy Willow [68497]		Species or species habitat likely to occur within area
Salvinia molesta Salvinia, Giant Salvinia, Aquarium Watermoss, Kariba Weed [13665]		Species or species habitat likely to occur

Name	Status	Type of Presence within area
Tamarix aphylla Athel Pine, Athel Tree, Tamarisk, Athel Tamarisk, Athel Tamarix, Desert Tamarisk, Flowering Cypress, Salt Cedar [16018]		Species or species habitat likely to occur within area
Reptiles		
Hemidactylus frenatus Asian House Gecko [1708]		Species or species habitat likely to occur within area

Caveat

The information presented in this report has been provided by a range of data sources as acknowledged at the end of the report.

This report is designed to assist in identifying the locations of places which may be relevant in determining obligations under the Environment Protection and Biodiversity Conservation Act 1999. It holds mapped locations of World and National Heritage properties, Wetlands of International and National Importance, Commonwealth and State/Territory reserves, listed threatened, migratory and marine species and listed threatened ecological communities. Mapping of Commonwealth land is not complete at this stage. Maps have been collated from a range of sources at various resolutions.

Not all species listed under the EPBC Act have been mapped (see below) and therefore a report is a general guide only. Where available data supports mapping, the type of presence that can be determined from the data is indicated in general terms. People using this information in making a referral may need to consider the qualifications below and may need to seek and consider other information sources.

For threatened ecological communities where the distribution is well known, maps are derived from recovery plans, State vegetation maps, remote sensing imagery and other sources. Where threatened ecological community distributions are less well known, existing vegetation maps and point location data are used to produce indicative distribution maps.

Threatened, migratory and marine species distributions have been derived through a variety of methods. Where distributions are well known and if time permits, maps are derived using either thematic spatial data (i.e. vegetation, soils, geology, elevation, aspect, terrain, etc) together with point locations and described habitat; or environmental modelling (MAXENT or BIOCLIM habitat modelling) using point locations and environmental data layers.

Where very little information is available for species or large number of maps are required in a short time-frame, maps are derived either from 0.04 or 0.02 decimal degree cells; by an automated process using polygon capture techniques (static two kilometre grid cells, alpha-hull and convex hull); or captured manually or by using topographic features (national park boundaries, islands, etc). In the early stages of the distribution mapping process (1999-early 2000s) distributions were defined by degree blocks, 100K or 250K map sheets to rapidly create distribution maps. More reliable distribution mapping methods are used to update these distributions as time permits.

Only selected species covered by the following provisions of the EPBC Act have been mapped:

- migratory and
- marine

The following species and ecological communities have not been mapped and do not appear in reports produced from this database:

- threatened species listed as extinct or considered as vagrants
- some species and ecological communities that have only recently been listed
- some terrestrial species that overfly the Commonwealth marine area
- migratory species that are very widespread, vagrant, or only occur in small numbers

The following groups have been mapped, but may not cover the complete distribution of the species:

- non-threatened seabirds which have only been mapped for recorded breeding sites
- seals which have only been mapped for breeding sites near the Australian continent

Such breeding sites may be important for the protection of the Commonwealth Marine environment.

 <small>Photos: A. Ireland</small>	<i>Thysanous anceps</i>	Rhizomatous, leafless perennial, herb, to 0.4 m high.	Fl. purple, Oct to Dec.	White or grey sand, lateritic gravel, laterite.	P3	Unlikely, habitat unsuitable
 <small>Photo: G. Croker</small>	<i>Verticordia lindleyi</i> subsp. <i>lindleyi</i>	Erect shrub, 0.2-0.75 m high.	Fl. pink, May or Nov to Dec or Jan.	Sand, sandy clay. Winter-wet depressions.	P4	Unlikely, habitat unsuitable

Appendix 4: Conservation Codes

Conservation codes are used to describe the status of species and ecological communities that are no longer common and under threat of extinction. Species and communities can be listed under state legislation and/or commonwealth legislation.

Western Australia

Conservation Code	Name	Description
T	Threatened	Flora or fauna that is rare or likely to become extinct, ranked according to their level of threat using IUCN Red List criteria (Schedules 1-3 of the Wildlife Conservation (Specially Protected Fauna) Notice or the Wildlife Conservation (Rare Flora) Notice)
CR	Critically endangered	Species considered to be facing an extremely high risk of extinction within the wild in the immediate future
EN	Endangered	Species considered to be facing a very high risk of extinction in the wild in the near future
VU	Vulnerable	Species considered to be facing a high risk of extinction in the wild in the medium-term future
EX	Extinct Species	Species where ‘there is no reasonable doubt that the last member of the species has died (Schedule 4 of the Wildlife Conservation (Specially Protected Fauna) Notice or the Wildlife Conservation (Rare Flora) Notice)
EW	Extinct in the Wild	Species that are known to only survive in cultivation, in captivity, or as a naturalised population well outside its past range; and it has not been recorded in its known or expected habitat at appropriate seasons anywhere in its past range, despite surveys over a timeframe appropriate to its life cycle and form
MI	Migratory Species	Fauna that periodically or occasionally visit Australia or an external Territory or the exclusive economic zone; or the species is subject of an international agreement that relates to the protection of migratory species and that binds the Commonwealth (Schedule 5 of the Wildlife Conservation (Specially Protected Fauna) Notice)
CD	Conservation Dependent	Species of special conservation interest (conservation dependent fauna), being species dependent on ongoing conservation intervention to prevent it becoming eligible for listing as threatened (Schedule 6 of the Wildlife Conservation (Specially Protected Fauna) Notice)
OS	Specially Protected	Fauna otherwise in need of special protection to ensure their conservation

Conservation Code	Name	Description
		(Schedule 7 of the Wildlife Conservation (Specially Protected Fauna) Notice)
P	Priority Species	Possibly threatened species that do not meet survey criteria, or are otherwise data deficient, are added to the Priority Fauna or Priority Flora Lists under Priorities 1, 2 or 3. These three categories are ranked in order of priority for survey and evaluation of conservation status so that consideration can be given to their declaration as threatened fauna or flora. Species that are adequately known, are rare but not threatened, or meet criteria for near threatened, or that have been recently removed from the threatened species or other specially protected fauna lists for other than taxonomic reasons, are placed in Priority 4. These species require regular monitoring.
P1	Priority One	Poorly known species – Species that are known from one or a few locations (generally five or less) which are potentially at risk. All occurrences are either very small or on lands not managed for conservation, such as road verges, urban areas, farmland, active mineral lease and under threat of habitat destruction or degradation.
2	Priority Two	Poorly known species – Species that are known from one or a few locations (generally five or less), some of which are on lands managed primarily for nature conservation, such as national parks, conservation parks, nature reserves, State forest, vacant Crown land, water reserves and similar.
3	Priority Three	Poorly known species – Species that are known from several locations, and the species does not appear to be under imminent threat, or from few but widespread locations with either large population size or significant remaining areas of apparently suitable habitat, much of it not under imminent threat
4	Priority Four	Rare or near threatened and other species in need of monitoring.

Commonwealth

Category	Description
Critically Endangered	Species facing an extremely high risk of extinction in the wild in the immediate future
Endangered	Species facing a very high risk of extinction in the wild in the near future
Vulnerable	Species facing a high risk of extinction in the wild in the medium term

Appendix 4: Species List

Below is the complete list of flora species recorded during the 2020 survey of the Lesmurdie Primary School and surrounding bushland. The list is sorted by species with weeds listed, then native species and * denotes introduced species.

Family	Species Name	Common Name
Malvaceae	<i>Thomasia foliosa</i>	
Poaceae	* <i>Ehrharta calycina</i>	Perennial Veldt Grass
Iridaceae	* <i>Freesia alba x leichtlinii</i>	Freesia
Iridaceae	* <i>Romulea rosea</i>	Guildford Grass
Fabaceae	* <i>Acacia baileyana</i>	
Fabaceae	* <i>Acacia dealbata</i>	
Fabaceae	* <i>Acacia iteaphylla</i>	Flinders Range Wattle
Fabaceae	* <i>Acacia longifolia</i>	Sydney Golden Wattle
Fabaceae	* <i>Acacia pycnantha</i>	Golden Wattle
Poaceae	* <i>Aira cupaniana</i>	Silvery Hairgrass
Poaceae	* <i>Briza maxima</i>	Blowfly Grass
Poaceae	* <i>Briza minor</i>	Shivery Grass
Fabaceae	* <i>Chamaecytisus palmensis</i>	Tagasaste
Asteraceae	* <i>Conyza sumatrensis</i>	
Asteraceae	* <i>Cotula turbinata</i>	Funnel Weed
Poaceae	* <i>Ehrharta longiflora</i>	Annual Veldt Grass
Poaceae	* <i>Eragrostis curvula</i>	African Lovegrass
Fabaceae	* <i>Genista monspessulana</i>	
Iridaceae	* <i>Gladiolus caryophyllaceus</i>	Pink Gladiolus
Asteraceae	* <i>Hypochaeris glabra</i>	Smooth Catsear
Asteraceae	* <i>Hypochaeris radicata</i>	Flatweed
Lamiaceae	* <i>Lavandula stoechas</i> L. subsp. <i>stoechas</i>	Lavender
Asteraceae	* <i>Osteospermum ecklonis</i>	Veldt Daisy
Oxalidaceae	* <i>Oxalis pes-caprae</i>	Soursob
Oxalidaceae	* <i>Oxalis purpurea</i>	Largeflower Wood Sorrel
Plantaginaceae	* <i>Plantago lanceolata</i>	Ribwort Plantain
Fabaceae	* <i>Podalyria sericea</i>	
Caryophyllaceae	* <i>Stellaria media</i>	Chickweed
Poaceae	* <i>Tribolium uniolae</i>	
Poaceae	* <i>Trifolium campestre</i>	Hop Clover
Asteraceae	* <i>Ursinia anthemoides</i>	Ursinia
Poaceae	* <i>Vulpia myuros</i>	Rat's Tail Fescue
Fabaceae	<i>Acacia dentifera</i>	
Fabaceae	<i>Acacia pulchella</i>	Prickly Moses
Fabaceae	<i>Acacia pulchella</i> var. <i>pulchella</i>	

Fabaceae	<i>Acacia saligna</i>	Orange Wattle
Hemerocallidaceae	<i>Agrostocrinum hirsutum</i>	
Casuarinaceae	<i>Allocasuarina fraseriana</i>	Sheoak
Poaceae	<i>Amphipogon amhipogonoides</i>	
Proteaceae	<i>Banksia nivea</i>	Honeypot Dryandra
Proteaceae	<i>Banksia sessilis</i> var. <i>sessilis</i>	
Pittosporaceae	<i>Billardiera fraseri</i>	Elegant Pronaya
Fabaceae	<i>Bossiaea ornata</i>	Broad Leaved Brown Pea
Colchicaceae	<i>Burchardia congesta</i>	
Myrtaceae	<i>Calothamnus quadrifidus</i>	One-sided Bottlebrush
Myrtaceae	<i>Calytrix flavescens</i>	Summer starflower
Myrtaceae	<i>Corymbia calophylla</i>	Marri
Lauraceae	<i>Cassytha glabella</i>	Tangled Dodder Laurel
Haemodoraceae	<i>Conostylis setigera</i>	Bristly Cottonhead
Haemodoraceae	<i>Conostylis setosa</i>	White Cottonhead
Crassulaceae	<i>Crassula</i> sp.	
Goodeniaceae	<i>Dampiera linearis</i>	Common Dampiera
Restionaceae	<i>Desmocladus fasciculatus</i>	
Orchidaceae	<i>Diuris</i> sp.	
Droseraceae	<i>Drosera erythrorhiza</i>	Red Ink Sundew
Droseraceae	<i>Drosera glanduligera</i>	Pimpernel Sundew
Droseraceae	<i>Drosera stolonifera</i>	Leafy Sundew
Myrtaceae	<i>Eucalyptus marginata</i>	Jarrah
Fabaceae	<i>Gompholobium knightianum</i>	
Fabaceae	<i>Gompholobium preissii</i>	Gompholobium hairy
Proteaceae	<i>Grevillea bipinnatifida</i>	Fuchsia Grevillea
Proteaceae	<i>Grevillea wilsonii</i>	Native Fuchsia
Haemodoraceae	<i>Haemodorum laxum</i>	
Haemodoraceae	<i>Haemodorum paniculatum</i>	Mardja
Proteaceae	<i>Hakea amplexicaulis</i>	Prickly Hakea
Proteaceae	<i>Hakea trifurcata</i>	Two-leaf Hakea
Lamiaceae	<i>Hemiandra pungens</i>	Snakebush
Fabaceae	<i>Hovea chorizemifolia</i>	Holly-leaved Hovea
Fabaceae	<i>Hovea trisperma</i> var. <i>grandiflora</i>	
Myrtaceae	<i>Hypocalymma robustum</i>	Swan River Myrtle
Proteaceae	<i>Isopogon sphaerocephalus</i> subsp. <i>sphaerocephalus</i>	Drumstick Isopogon
Fabaceae	<i>Jacksonia alata</i>	
Fabaceae	<i>Labichea punctata</i>	Lance-leaved Cassia
Asparagaceae	<i>Laxmannia squarrosa</i>	
Goodeniaceae	<i>Lechenaultia biloba</i>	Blue Leschenaultia
Cyperaceae	<i>Lepidosperma pubisquamum</i>	
Stylidiaceae	<i>Levenhookia pusilla</i>	Midget Stylewort

Asparagaceae	<i>Lomandra caespitosa</i>	Tufted Mat Rush
Asparagaceae	<i>Lomandra micrantha</i>	Small-flower Mat-rush
Asparagaceae	<i>Lomandra nigricans</i>	
Asparagaceae	<i>Lomandra preissii</i>	
Asparagaceae	<i>Lomandra sericea</i>	Silky Mat Rush
Asparagaceae	<i>Lomandra suaveolens</i>	
Orchidaceae	<i>Lyperanthus serratus</i>	Rattle Beak Orchid
Asteraceae	<i>Millotia tenuifolia</i>	Soft Millotia
Iridaceae	<i>Patersonia babianoides</i>	
Apiaceae	<i>Pentapeltis peltigera</i>	
Rutaceae	<i>Philotheeca spicata</i>	Pepper and Salt
Orchidaceae	<i>Pterostylis recurva</i>	Jug Orchid
Orchidaceae	<i>Pterostylis sanguinea</i>	
Orchidaceae	<i>Pyrorchis nigricans</i>	Red Beaks
Santalaceae	<i>Santalum spicatum</i>	Sandalwood
Goodeniaceae	<i>Scaevola platyphylla</i>	Broad-leaved Fanflower
Asteraceae	<i>Siloxerus humifusus</i>	Procumbent Siloxerus
Styliadiaceae	<i>Styliodium affine</i>	Queen Triggerplant
Styliadiaceae	<i>Styliodium amoenum</i>	Lovely Triggerplant
Styliadiaceae	<i>Styliodium androsaceum</i>	
Styliadiaceae	<i>Styliodium ciliatum</i>	Golden Triggerplant
Styliadiaceae	<i>Styliodium recurvum</i>	
Cyperaceae	<i>Tetraria octandra</i>	
Orchidaceae	<i>Thelymitra crinita</i>	Blue Lady Orchid
Orchidaceae	<i>Thelymitra crinita</i>	Blue Lady Orchid
Orchidaceae	<i>Thelymitra macrophylla</i>	
Asparagaceae	<i>Thysanotus sparteus</i>	
Asparagaceae	<i>Thysanotus thyrsoides</i>	
Araliaceae	<i>Trachymene pilosa</i>	Native Parsnip
Asteraceae	<i>Trichocline spathulata</i>	Native Gerbera
Hemerocallidaceae	<i>Tricoryne elatior</i>	Yellow Autumn Lily
Rhamnaceae	<i>Trymalium ledifolium</i> var. <i>rosmarinifolium</i>	
Xanthorrhoeaceae	<i>Xanthorrhoea preissii</i>	Grass Tree
Apiaceae	<i>Xanthosia huegelii</i>
