Part 4: Proposed clearing				
<p>An aerial photograph and/or map with a north arrow must be attached, clearly marking the area proposed to be cleared</p> <p>or</p> <p>if you have the facilities, a digital map on a suitable portable digital storage device of the area to clear as an ESRI shapefile with the following properties:</p> <ul style="list-style-type: none"> <li>• Geometry type: Polygon shape</li> <li>• Coordinate system: GDA 1994 (Geographic latitude/longitude)</li> <li>• Datum: GDA 1994 (Geocentric Datum of Australia 1994).</li> </ul> <p>An ESRI shapefile must be provided if the application requires an assessment under an EPBC Act accredited process.</p>	Total <b>area</b> of clearing proposed (hectares)	The proposed rubbish tip clearing permit application covers an area of 0.61 ha, which includes approximately 0.18 ha of bare ground (see Figure 2 within the supporting documentation).		
	<i>and/or</i>	number of individual <b>trees</b> to be removed		
	Proposed method of clearing:			Vegetation will be removed (pushed over) with a dozer. Prior to clearing, seed will be collected. Seed and vegetative debris will be utilised in rehabilitation where practicable.
	Purpose of clearing:			Clearing of regrowth vegetation is required to enable access to remove inert waste from the rubbish tip and to rehabilitate the historical rubbish tip.
	Period within which clearing is proposed to be undertaken, e.g. May 2020 to June 2020 (taking note of the published assessment timeframes for DWER / DMIRS, as applicable)			From August 2021 to December 2023
	Final land use:			Native vegetation for the purpose of grazing/ stock shelter.
	<p>You must provide evidence that avoidance and mitigation options have been pursued to eliminate, reduce or otherwise mitigate the need for, and scale of, the proposed clearing of native vegetation.</p>	Have alternatives that would avoid or minimise the need for clearing been considered and applied?	<input checked="" type="checkbox"/>	Yes <input type="checkbox"/> No
If yes, provide details:			It is not possible to safely remove waste from the tip or access stockpiled material without removing some vegetation to enable machinery access. Vegetation clearing has been minimised restricting clearing to regrowth wherever possible.	
<p>Refer to DWER's <a href="#">Clearing of native vegetation offsets procedure guideline</a> available on the DWER website, and the Environmental Protection Authority's (EPA) <a href="#">WA Environmental Offsets Policy and Guidelines</a> on the EPA website for further information.</p>	Do you want to submit a clearing permit offset proposal with your application?	<input type="checkbox"/>	Yes <input checked="" type="checkbox"/> No	
	If yes, provide details, and complete and attach Appendix A of the <i>Clearing of native vegetation offsets procedure guideline</i> .			No net loss of vegetation is expected, as the vegetation to be removed on site will be replaced through revegetation with native species, following the removal of waste material.
