

Part 1: Assessment bilateral agreement

**FILE REFERENCE** 

Department of Water and Environmental Regulation (DWER)
Department of Mines, Industry Regulation and Safety (DMIRS)

## Application for a clearing permit (purpose permit)

Environmental Protection Act 1986, section 51E

## FORM C2

Clearing of native vegetation is prohibited in Western Australia except where a clearing permit has been granted or an exemption applies. A person who causes or allows unauthorised clearing commits an offence.

For further information on the stages of assessment for clearing permit applications, refer to the <u>Procedure: Native vegetation clearing permits</u> on DWER's website.

CPS No. 9270-1ps
Date stamp

The native vegetation clearing processes under Part V of the	Do you want your proposed clearing action assessed in accordance with, or under, an EPBC Act Accredited Process such as the assessment bilateral agreement?							
Environmental Protection Act 1986 (WA) (EP Act) have been accredited by the Commonwealth of Australia under the		Yes	EPBC Number:					
Environment Protection and Biodiversity Conservation Act	$\boxtimes$	No	Proceed to Part 2					
1999 (Cth) (EPBC Act) and can be assessed under an assessment bilateral agreement.	List the controlling provisions identified in the notification of the controlled action decision.							
To be assessed in this manner, the proposed clearing action must be referred to the Commonwealth under the EPBC Act and deemed a 'controlled action' prior to submitting this application form.  For further information see Form								
Annex C7 and A guide to native vegetation clearing processes under the assessment bilateral								
agreement available at www.der.wa.gov.au/our- work/clearing-permits.		Form	Annex C7 is comple	te and the required supporting information is attached.				
Part 2: Land details								
The location of the land where clearing is proposed must be	Land description: volume and folio number, lot or location number(s), Crown lease or reserve number, pastoral lease number or mining tenement number of all properties.							
accurately described.	Lot 11 on Plan 24201 Vol 2199/Folio 295 Lot 856 on Deposited Plan 246367

options have been pursued to eliminate, reduce or otherwise mitigate the need for, and scale	If yes, pr	ovide details:									
of, the proposed clearing of native vegetation.	Information from the flora and fauna surveys conducted on-site has influenced the design of the proposed action as far as practicable. However, given the site constraints, it is not feasible to avoid all remnant native vegetation. Where practicable, the internal road alignment will avoid areas of remnant native vegetation and follow existing roads and firebreaks. However, due to the topography of the site, the design of the proposed road alignment to the site of the BIOMASS Calibration Transponder (to be sited at approximately 312 mAHD) must take into consideration the personal safety of road users. In some instances, removal of remnant native vegetation is required due to project constraints such as the need to remove native vegetation from around the BIOMASS Calibration Transponder so that radio frequency interference does not occur. Within this area, all vegetation must remain below 600 mm in height.
