Application for a clearing permit (purpose permit)

Environmental Protection Act 1986, section 51E

FORM C2

Clearing of native vegetation is prohibited in Western Australia except where a clearing permit has been granted or an exemption applies. A person who causes or allows unauthorised clearing commits an offence.

For further information on the stages of assessment for clearing permit applications, refer to the [Procedure: Native vegetation clearing permits](#) on DWER's website.

Part 1: Assessment bilateral agreement

The native vegetation clearing processes under Part V of the *Environmental Protection Act 1986* (WA) (EP Act) have been accredited by the Commonwealth of Australia under the *Environment Protection and Biodiversity Conservation Act 1999* (Cth) (EPBC Act) and can be assessed under an assessment bilateral agreement.

To be assessed in this manner, the proposed clearing action must be referred to the Commonwealth under the EPBC Act and deemed a '[controlled action](#)' prior to submitting this application form.

For further information see *Form Annex C7* and *A guide to native vegetation clearing processes under the assessment bilateral agreement* available at www.der.wa.gov.au/our-work/clearing-permits.

Do you want your proposed clearing action assessed in accordance with, or under, an EPBC Act Accredited Process such as the assessment bilateral agreement?

Yes EPBC Number:

No Proceed to Part 2

List the controlling provisions identified in the notification of the controlled action decision.

Form Annex C7 is complete and the required supporting information is attached.

Part 2: Land details

The location of the land where clearing is proposed must be accurately described.

Land description: volume and folio number, lot or location number(s), Crown lease or reserve number, pastoral lease number or mining tenement number of all properties.

Part 4: Proposed clearing	
<p>An aerial photograph and/or map with a north arrow must be attached, clearly marking the area proposed to be cleared</p> <p>or</p> <p>if you have the facilities, a digital map on a suitable portable digital storage device of the area to clear as an ESRI shapefile with the following properties:</p> <ul style="list-style-type: none"> • Geometry type: Polygon shape • Coordinate system: GDA 1994 (Geographic latitude/longitude) • Datum: GDA 1994 (Geocentric Datum of Australia 1994). <p>An ESRI shapefile must be provided if the application requires an assessment under an EPBC Act accredited process.</p>	<p>Total area of clearing proposed (hectares) 5 ha within a 7 ha application area</p>
	<p><i>and/or</i></p> <p>number of individual trees to be removed</p>
	<p>Proposed method of clearing:</p> <p>Mechanical, incidental (machinery or vehicles driving over area). Removal of vegetation will only be carried out where required.</p>
	<p>Purpose of clearing:</p> <p>Clearing for the purposes of reinforcing a deteriorating existing overhead feeder by undergrounding 10km of circuit.</p> <p>The current ‘Munda’ feeder is a 22kV circuit comprising of both overhead and underground systems with the overhead element making up 90% (9km) of the circuit. The line provides an average annual load of around 2.4MW to major customers such as RIO salt, motels and camps with more than 2000 bed capacity, as well as the Port Hedland airport.</p> <p>An assessment undertaken over an 11 year period shows an average loss of supply for around 12.5 hours following a cyclone event. This project seeks to mitigate against loss of supply during cyclone events and other adverse weather conditions.</p>
	<p>Period within which clearing is proposed to be undertaken, e.g. May 2020 to June 2020 (taking note of the published assessment timeframes for DWER / DMIRS, as applicable)</p> <p>From 1 October 2021 to 1 October 2025</p>
	<p>Final land use:</p> <p>Underground high voltage distribution line.</p>
	<p>Have alternatives that would avoid or minimise the need for clearing been considered and applied? <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No</p>
<p>You must provide evidence that avoidance and mitigation options have been pursued to eliminate, reduce or otherwise mitigate the need for, and scale of, the proposed clearing of native vegetation.</p>	<p>If yes, provide details:</p> <p>In order to deliver a cost-effective solution whilst minimizing the amount of native vegetation clearing required, Horizon Power will be using a combination of drilling and trenching to complete this project in its entirety.</p> <p>As detailed in the supporting document, the installation method selected is open trenching for an underground cable. As opposed to poles and overhead wire, underground installations do not require permanent clearing for maintenance or fire protection. Based on the narrow and linear nature of the clearing, and condition of surrounding vegetation, regrowth is expected to occur in the short term. In low lying/tidal areas, horizontal boring will be utilised to minimise potential environmental impacts.</p> <p>Whilst every effort will be made to minimise clearing where possible, under the Utility Providers Code of Practice (Western Australia) Horizon Power has a commitment to comply with allocated boundary alignments in relation to the installation of powerlines and other electrical infrastructure in the road reserve. This restricts where powerlines can be installed as such determines the location / alignment of new powerline routes. Horizon Power will utilise existing access tracks and cleared areas where possible during construction.</p>
<p>Refer to DWER’s Clearing of native vegetation offsets procedure guideline available on the DWER website, and the Environmental Protection</p>	<p>Do you want to submit a clearing permit offset proposal with your application? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No</p> <p>If yes, provide details, and complete and attach Appendix A of the <i>Clearing of native vegetation offsets procedure guideline</i>.</p>
