

**CPS 9426/1 – Supporting Information – Photographs of native vegetation proposed to be cleared**

Transition area of seawall footprint away from ocean towards the N/W

View looking north/west.

Sandy natural surface area in above photo is general location of construction seawall footprint

Vegetation in the above photo will be removed. Pine Tree will be relocated.

Very minor impact to Acacia – Pine Tree will not be impacted

Sandy natural surface is general location of seawall construction. Construction Plant and Equipment will impact upon coastal shrubs in this area.

Minor intrusion into Acacia Tree's from Arcadia Drive roadside. Proposed for excavation and sand stockpiling for the 'toe' construction of the N/W end of the seawall.
