### 5.2 Size

- If you propose to clear a patch(s) of vegetation, enter a hectare value for the total size of the area (mark number of trees as zero).
- If you propose to remove only individual trees from the area(s) (i.e. the shrubs, grasses, groundcover plants will remain intact), provide the number of trees (and mark total area as estimated hectares).  
Note: If any shrubs, grasses, and/or groundcover plants MAY be damaged in the clearing process, add this to the total area.
- If you propose to clear an area of vegetation within a larger footprint, enter the hectare value for the total size of the area to be cleared (mark number of trees as zero) and the size of the footprint. For example, 5 hectares of clearing within a 10 hectare footprint. This option is only available for [purpose permit](#) applications.
- Enter values for BOTH number of trees and the size of the area if you are clearing individual trees in one area AND a patch of vegetation in a different area.
- Please note the following area conversions/calculations:
 

1 hectare = 10,000 m <sup>2</sup>	Area of circle = 3.14 x radius <sup>2</sup>
1 acre = 0.4 hectares / 4,000 m <sup>2</sup>	Area of a rectangle = length x width
1 tree = 0.01 hectares / 100 m <sup>2</sup>	Area of a triangle = ½ length x perpendicular height

Total area of clearing proposed (hectares)	0.52
Footprint of clearing (hectares) (purpose permit only)	0.52
Number of individual trees to be removed	Unknown

Note: Calculate the area of a tree based on the area encompassed by the tree's drip line; that being the outermost circumference of the tree's canopy.

### 5.3 Purpose

<p>Provide the reason for proposed clearing (e.g. road construction, grazing and pasture, hazard reduction, horticulture, timber harvesting etc.)</p>	<ul style="list-style-type: none"> <li>• To create a cleared access track and maintain an existing track for the entry in and out of the Urban Quarter stockpile as part of the Yanchep Rail Extension;</li> <li>• Allows for the hauling of bulk material (i.e. sand, limestone etc) out of the stockpile site (in accordance with Development Approval 30-50410-1 for Lot 9001 on Plan 413782).</li> <li>• The delivery of rail infrastructure and bridge components, and general construction access into the Project Development Envelope; and</li> <li>• Reduces congestion of vehicle and plant movement through the Project Development Envelope.</li> </ul>
<p>Specify what the final land use will be after clearing</p>	<p>Access track for entering and exiting the worksite and the delivery and export of construction material.</p>

### 5.4 Method

<p>Proposed method of clearing (i.e. burning, cutting, draining, flooding, grazing, mechanical clearing/bulldozing or other – specify)</p>	<p>Mechanical.</p>
--	--------------------

### 5.5 Timeframe

<p>Period within which you propose to do the clearing (e.g. 1/7/2022 to 30/8/2024)</p>	<p>Start date: February 2022 End date: August 2022</p>
--	--

Note: The clearing referral process is not suitable for any clearing that is expected to take longer than two years.

### 5.6 Avoidance and mitigation

Explain how you have, or will, put avoidance and mitigation measures in place to eliminate, reduce, or otherwise mitigate the need for and scale of the proposed clearing of native vegetation.

Attach supporting documents to substantiate your explanation.

Your explanation should demonstrate you have planned the project so that the least clearing possible is to be undertaken. The following questions may help you frame your explanation:

- Why did you select this location and amount of clearing?
- What alternatives to clearing – e.g. engineering solutions – did you consider?
- What changes, if any, did you make to the location or amount of clearing to reduce the impacts of the clearing?

Note: If you do not demonstrate adequate efforts to avoid and mitigate clearing, we will ask you to do so during the validation of this form.

Provide the avoidance and mitigation details	<p>Earthworks and the construction of the rail, station and bridge infrastructure will limit access along the length of the Project Development Envelope. This access track will allow safer and more efficient haulage of material.</p> <p>Existing cleared areas will be utilised for temporary construction areas to minimize vegetation clearing, where possible (the southern portion of the access track is already predominantly cleared). Application of a crushed limestone layer will be implemented to prevent ongoing degradation of the existing access track.</p>

### 7.1 Biodiversity surveys

If you want to submit any biodiversity surveys to support this form, you must follow the Environmental Protection Authority's (EPA) [Instructions for the preparation of data packages for the Index of Biodiversity Surveys for Assessments](#) (IBSA). If you do not meet the IBSA requirements, DWER/DMIRS (as applicable) may decline/return your form.

Please provide the IBSA number(s) – or submission number(s) if the IBSA number has not yet been issued – in the space provided. Note that a submission number is not confirmation that a biodiversity survey has been accepted and is not the same as an IBSA number. IBSA numbers are only issued once a survey has been accepted. Once an IBSA number is issued, please notify DWER/DMIRS (as applicable). Please note DWER / DMIRS will suspend the assessment timeframes for your form until you provide the IBSA number(s).

Have you submitted all the biodiversity surveys that support this form to the Index of Biodiversity Surveys for Assessment, available at <a href="https://ibsasubmissions.dwer.wa.gov.au">ibsasubmissions.dwer.wa.gov.au</a> ?	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> Not applicable
