Department of Mines, Industry Regulation and Safety

Application for new permit or referral to clear native vegetation

This is the form to submit a referral of proposed clearing or apply for a clearing permit under Part V of the *Environmental Protection Act 1986* (EP Act).

Before you submit this form, please check you have completed all the fields for the form type and fully prepared any required supporting documents (including maps etc.). We will return / decline any forms that are not correctly completed.

☐ Referral of proposed clearing (section 51DA of the EP Act)

□ Application for an area permit (section 51E of the EP Act)

☐ Application for a purpose permit (section 51E of the EP Act)

To find out more about the stages of assessment for clearing permit forms, see the *Procedure: Native vegetation clearing permits*.

Part 1 – Form type

Select your form type.

form, and unless stated

respectively.

and 'applicant' also mean 'referral' and 'referrer'

NOTE: Where appropriate in this

otherwise, the terms 'application'

Part 2 – Applicant details					
2.1 Applicant name					
For area	□ Applying as an individual – complete the following:				
permits: If granted, the name(s) of (all)	Title	□ Mr □ Mrs □ Ms □ Other:			
landowner(s) will be listed as	Name(s)				
'permit holders' on the permit.					
For purpose permits:	Name	Arkenstone Pty Ltd an	nd March Bells Pty Ltd		
If granted, the name(s) of (all)	Australian Com	npany Number (ACN)	009112878 and 009126881		
applicant(s) will go on the permit.	☐ Applying as a government entity (e.g. government department, local government authority, or other statutory body)				
, po	Name				

2.2 Applicant contact details

Provide the contact details for the above (primary contact).

Title	⊠ Mr □ Mrs □ Ms □ Other:
First name	
Last name	
Position	
Company name	
Contact phone number (1)	Phone number (2)
Email address	

2.2 Applicant contact postal details

Provide the postal address for the above individual, body corporate or local government authority (primary contact).

Address line 1		
Address line 2		
Suburb		
State	Postcode	

2.3 Applicant contact – registered business address

If applying as a company, incorporated body, local government authority or public authority, please also supply the registered business office address.

Address line 1	
Address line 2	
Suburb	
State	Postcode
Contact phone number (1)	Phone number (2)

2.4 Electronic correspondence consent

Both the Department of Water and Environmental Regulation (DWER) and Department of Mines, Industry Regulation and Safety (DMIRS) prefer to send all correspondence via email. We request that you consent to receiving all correspondence relating to instruments and notices under Part V of the EP Act via email. Please indicate your consent in this section of the form.

I consent that all written correspondence between myself (the applicant) and DWER/DMIRS (as applicable) about the subject of this form will be exclusively via email, using the email address provided above.				⊠ Yes	□ No
2.5 Contact details for enquiries If different from the applicant's contact details, enter the contact details of a person with whom DWER or DMIRS should liaise with (e.g. a consultant).					m
Same as applicant's contact details	S			⊠ Yes	□ No
If 'No' – complete the following:					
Contact name					
Position (if applicable)					
Company name (if applicable)					
Contact phone number (1)		Phone i	number (2)		
Business or postal address line 1					
Business or postal address line 2					
Suburb					
State			Postcode		
Email address					

Part 3 - Land details

- You must accurately describe the location of the land where your clearing is proposed.
- If you have a large number of properties, please provide the relevant details for each property in a separately attached supporting document.

3.1 Property details

If 'No' – complete the following:

Land description Provide the following details, as applicable, for all properties: - volume and folio number - lot or location number(s) - crown lease or reserve number - pastoral lease number - mining tenement number	Lot 11937 on Deposited Plan 203137, being the whole of the land in Certificate of Title Volume 1383 Folio 180		
Street address – Line 1	3471 Deeside Coast Rd (lot 11937 Middleton Rd) S		
Street address – Line 2			
Suburb	Shannon		
State	WA	Postcode	6262
Local government area(s)	Manjimup		
Land zoning	Rural		

Part 4 – Relationship to landowner

Tell us which of the following options best describes you as the person completing and submitting this form. If you are filling out this form on behalf of the applicant, answer this question as though you are the applicant.

Proof of ownership may include:

- a certificate of title (that is less than 6 months old)
- a pastoral or mining lease
- public authority that has care, control or management of the land
- other form of lease, land tenure or specific arrangement.

Relationship to landowner (select one of the following options)	Complete the following
☐ I am the landowner	☐ Attach proof of ownership
☐ I am lodging a form on behalf of the landowner (e.g. a consultant)	☐ Attach proof of ownership
☑ I am acting on the landowner's behalf and will be jointly responsible for the clearing permit (i.e. joint form)	 □ Attach proof of ownership ⋈ Complete and attach an 'Acting on behalf and jointly responsible' letter
☐ I am likely to become the landowner	 ☑ Attach the Certificate of Title ☐ Attach evidence of the pending transfer of ownership and/or contract of sale ('offer and acceptance')
☐ I will undertake the clearing activities with the landowner's authority and will be the permit holder	 □ Attach <u>proof of ownership</u> □ Complete and attach an '<u>Authority to access and clear</u> <u>native vegetation</u>' letter (if the applicant is not the landowner)
☐ A person with multiple land parcels	 □ Attach <u>proof of ownership</u> □ Complete and attach '<u>Authority to access and clear native vegetation</u>' letter (if the applicant is not the landowner)

Part 5 - Proposed clearing

5.1 Maps and/or spatial data

Select which map type(s) you will attach with your form.

Note: We will decline / return forms (as applicable) if you do not provide sufficient information for this question.

☐ An ESRI shapefile with the following properties (preferred)

- Geometry type: polygon shape
- Coordinate system: Geocentric Datum of Australia (GDA) 1994/2020 (geographic latitude / longitude)
- Datum: GDA 1994 / GDA 2020 (please specify which was provided)

⊠ An aerial photograph or map with a north arrow, clearly marking the proposed clearing area

Note:

- An ESRI shapefile must use one of the following filename extensions: .shp, .shx, .dbf, and/or .prj
- You must provide an ESRI shapefile if the form requires an assessment under an Environment Protection and Biodiversity Conservation Act 1999 (Cth) (EPBC Act) accredited process. See Part 8 of this form for more information.

5.2 Size

- If you propose to clear a patch(s) of vegetation, enter a hectare value for the total size of the area (mark number of trees as zero).
- If you propose to remove only individual trees from the area(s) (i.e. the shrubs, grasses, groundcover plants will remain intact), provide the number of trees (and mark total area as estimated hectares).
 - Note: If any shrubs, grasses, and/or groundcover plants MAY be damaged in the clearing process, add this to the total area.
- If you propose to clear an area of vegetation within a larger footprint, enter the hectare value for the total size of the area to be cleared (mark number of trees as zero) and the size of the footprint. For example, 5 hectares of clearing within a 10 hectare footprint. This option is only available for <u>purpose permit</u> applications.
- Enter values for BOTH number of trees and the size of the area if you are clearing individual trees in one area AND a patch of vegetation in a different area.
- Please note the following area conversions/calculations:

1 hectare = $10,000 \text{ m}^2$ Area of circle = 3.14 x radius² 1 acre = 0.4 hectares / $4,000 \text{ m}^2$ Area of a rectangle = length x width 1 tree = 0.01 hectares / 100 m^2 Area of a triangle = $\frac{1}{2}$ length x perpendicular height

Total area of clearing proposed (hectares)

3.6 hectares **DWER revised 4.73 ha**Footprint of clearing (hectares) (purpose permit only)

Number of individual trees to be removed

Estimated less than 100 larger native trees will be removed. Mainly smaller tee- trees and other similar creek line vegetation will be impacted along the creek as it is

inundated by water filling the enlarged dam.

Note: Calculate the area of a tree based on the area encompassed by the tree's drip line; that being the outermost circumference of the tree's canopy.

5.3 Purpose

Specify what the final land use will be after clearing To significantly increase both the area and volume of the existing dam to support either: • the establishment of horticultural activities on the property (possibly establishment of an avocado orchard) after the existing 22-year old Eucalyptus regnans (Mountain Ash) plantation on the property is clear-felled; or • if the plantation is not to be clear-felled, to provide a suitable site along the edge of the enlarged dam for the establishment of a tourist facility, similar in concept to the existing facility known as Karri Valley on Vasse highway west of Pemberton. • Relevantly, the property is bordered on both its eastern and southern side of Middleton Road) by the Shannon National Park. The property was almost all cleared (other than along the creek line itself and an area of approximately 3ha of native vegetation along the western portion of its southern boundary which remains intact) and was being used for both horticultural activities and cattle grazing when it was purchased by the current owners in 2000, prior to the establishment of the E. regnans plantation on most of the cleared area. Very little native vegetation was removed for the establishment of this plantation.	Provide the reason for proposed clearing (e.g. road construction, grazing and pasture, hazard reduction, horticulture, timber harvesting etc.)	To increase the surface area and volume of an existing dam
	Specify what the final land use will be after clearing	 volume of the existing dam to support either: the establishment of horticultural activities on the property (possibly establishment of an avocado orchard) after the existing 22-year old Eucalyptus regnans (Mountain Ash) plantation on the property is clear-felled; or if the plantation is not to be clearfelled, to provide a suitable site along the edge of the enlarged dam for the establishment of a tourist facility, similar in concept to the existing facility known as Karri Valley on Vasse highway west of Pemberton. Relevantly, the property is bordered on both its eastern and southern sides (on the southern side of Middleton Road) by the Shannon National Park. The property was almost all cleared (other than along the creek line itself and an area of approximately 3ha of native vegetation along the western portion of its southern boundary which remains intact) and was being used for both horticultural activities and cattle grazing when it was purchased by the current owners in 2000, prior to the establishment of the E. regnans plantation on most of the cleared area. Very little native vegetation was removed for the

5.4 Method

Proposed method of clearing (i.e. burning, cutting, draining, flooding, grazing, mechanical clearing/bulldozing or other – specify)

Bulldozing trees and larger shrubs, and possibly inundating smaller vegetation.

5.5 Timeframe

Period within which you propose to do the clearing	Start date: Early January 2022
(e.g. 1/7/2022 to 30/8/2024)	End date: End February 2022

Note: The clearing referral process is not suitable for any clearing that is expected to take longer than two years.

5.6 Avoidance and mitigation

Explain how you have, or will, put avoidance and mitigation measures in place to eliminate, reduce, or otherwise mitigate the need for and scale of the proposed clearing of native vegetation.

Attach supporting documents to substantiate your explanation.

Your explanation should demonstrate you have planned the project so that the least clearing possible is to be undertaken. The following questions may help you frame your explanation:

- Why did you select this location and amount of clearing?
- What alternatives to clearing e.g. engineering solutions did you consider?
- What changes, if any, did you make to the location or amount of clearing to reduce the impacts of the clearing?

Note: If you do not demonstrate adequate efforts to avoid and mitigate clearing, we will ask you to do so during the validation of this form.

Provide the avoidance and mitigation details

A range of possible options were considered for both the location of the dam wall and the proposed height of spillway, in order to try and minimise the area of clearing that would be required, whilst still providing sufficient water area and volume to satisfy each of the two proposed alternative future uses of the property.

The option that would have delivered the maximum surface area of water (31.6 hectares) and water volume (1,054,264 KL) would have required a total of 7.38 ha of native vegetation to be removed was not selected, and the smaller sized project, that would . This Option 3 was not chosen as the preferred dam site.

The total area of water with the option that was selected when the dam is filled, (20.95 ha), includes existing dam area, the 3.6 ha of native vegetation that will be removed, and 8.2ha of the E. regnans plantation that will also be removed.

Part 6 - Offset

Do you want to submit a clearing offset proposal with your form?	□ Yes ⊠ No
If 'Yes' – please complete and attach Appendix A of the <u>Clearing of native vegetation offsets procedure</u> guideline as a supporting document for your form.	☐ Appendix A attached
