

Application for new permit or referral to clear native vegetation

This is the form to submit a referral of proposed clearing or apply for a clearing permit under Part V of the *Environmental Protection Act 1986* (EP Act).

Before you submit this form, please check you have completed all the fields for the form type and fully prepared any required supporting documents (including maps etc.). We will return / decline any forms that are not correctly completed.

To find out more about the stages of assessment for clearing permit forms, see the [Procedure: Native vegetation clearing permits](#).

Part 1 – Form type

Select your form type . NOTE: Where appropriate in this form, and unless stated otherwise, the terms 'application' and 'applicant' also mean 'referral' and 'referrer' respectively.	<input type="checkbox"/> Referral of proposed clearing (section 51DA of the EP Act) <input type="checkbox"/> Application for an area permit (section 51E of the EP Act) <input checked="" type="checkbox"/> Application for a purpose permit (section 51E of the EP Act)

Part 4 – Relationship to landowner

Tell us which of the following options best describes you as the person completing and submitting this form. If you are filling out this form on behalf of the applicant, answer this question as though you are the applicant.

[Proof of ownership](#) may include:

- a certificate of title (that is less than 6 months old)
- a pastoral or mining lease
- public authority that has care, control or management of the land
- other form of lease, land tenure or specific arrangement.

Relationship to landowner (select one of the following options)	Complete the following
<input type="checkbox"/> I am the landowner	<input type="checkbox"/> Attach proof of ownership
<input type="checkbox"/> I am lodging a form on behalf of the landowner (e.g. a consultant)	<input type="checkbox"/> Attach proof of ownership
<input type="checkbox"/> I am acting on the landowner's behalf and will be jointly responsible for the clearing permit (i.e. joint form)	<input type="checkbox"/> Attach proof of ownership <input type="checkbox"/> Complete and attach an ' Acting on behalf and jointly responsible ' letter
<input type="checkbox"/> I am likely to become the landowner	<input type="checkbox"/> Attach the Certificate of Title <input type="checkbox"/> Attach evidence of the pending transfer of ownership and/or contract of sale ('offer and acceptance')
<input checked="" type="checkbox"/> I will undertake the clearing activities with the landowner's authority and will be the permit holder	<input type="checkbox"/> Attach proof of ownership <input type="checkbox"/> Complete and attach an ' Authority to access and clear native vegetation ' letter (if the applicant is not the landowner)
<input type="checkbox"/> A person with multiple land parcels	<input type="checkbox"/> Attach proof of ownership <input type="checkbox"/> Complete and attach ' Authority to access and clear native vegetation ' letter (if the applicant is not the landowner)

Part 5 – Proposed clearing

<p>Select which map type(s) you will attach with your form.</p> <p>Note: We will decline / return forms (as applicable) if you do not provide sufficient information for this question.</p>	<p><input checked="" type="checkbox"/> An ESRI shapefile with the following properties (<i>preferred</i>)</p> <ul style="list-style-type: none"> • Geometry type: polygon shape • Coordinate system: Geocentric Datum of Australia (GDA) 1994/2020 (geographic latitude / longitude) • Datum: GDA 1994 / GDA 2020 (please specify which was provided) <p><input checked="" type="checkbox"/> An aerial photograph or map with a north arrow, clearly marking the proposed clearing area</p> <p>Note:</p> <ul style="list-style-type: none"> • An ESRI shapefile must use one of the following filename extensions: .shp, .shx, .dbf, and/or .prj • You must provide an ESRI shapefile if the form requires an assessment under an <i>Environment Protection and Biodiversity Conservation Act 1999</i> (Cth) (EPBC Act) accredited process. See Part 8 of this form for more information.

5.1 Maps and/or spatial data

5.2 Size

- If you propose to clear a patch(s) of vegetation, enter a hectare value for the total size of the area (mark number of trees as zero).
- If you propose to remove only individual trees from the area(s) (i.e. the shrubs, grasses, groundcover plants will remain intact), provide the number of trees (and mark total area as estimated hectares).
Note: If any shrubs, grasses, and/or groundcover plants MAY be damaged in the clearing process, add this to the total area.
- If you propose to clear an area of vegetation within a larger footprint, enter the hectare value for the total size of the area to be cleared (mark number of trees as zero) and the size of the footprint. For example, 5 hectares of clearing within a 10 hectare footprint. This option is only available for [purpose permit](#) applications.
- Enter values for BOTH number of trees and the size of the area if you are clearing individual trees in one area AND a patch of vegetation in a different area.
- Please note the following area conversions/calculations:

1 hectare = 10,000 m ²	Area of circle = 3.14 x radius ²
1 acre = 0.4 hectares / 4,000 m ²	Area of a rectangle = length x width
1 tree = 0.01 hectares / 100 m ²	Area of a triangle = ½ length x perpendicular height

Total area of clearing proposed (hectares)	70
Footprint of clearing (hectares) (purpose permit only)	296
Number of individual trees to be removed	0

Note: Calculate the area of a tree based on the area encompassed by the tree's drip line; that being the outermost circumference of the tree's canopy.

5.3 Purpose

<p>Provide the reason for proposed clearing (e.g. road construction, grazing and pasture, hazard reduction, horticulture, timber harvesting etc.)</p>	<p>Horizon Power is to develop additional electrical infrastructure in the form of a 43 kilometre (km) single circuit 66 kV transmission line from the end of Horizon Power's Goldsworthy line to Fortescue Metal Group's (FMG) Borefields located in the Pilbara Bioregion of Western Australia. The new supply system will provide reliable power to FMG. Electrical infrastructure will include 21 metre high single steel poles, overhead cable, electrical substation and associated infrastructure. Areas of temporary clearing will include but not limited to laydown (equipment and offices), driving over vegetation, pole site construction and winch sites. Horizon Power will be installing a power line running the full length of the shape file provided. Additional shapefiles of proposed poles and the alignment of the overhead have been provided to support the assessors understanding of the project only. These locations are draft and subject to change. It is understood that FMG intend on developing a workers camp and processing facility in the most northern section of the shapefile. The native vegetation clearing permit application does not cover these works. Horizon Power has included this area for the clearing associated with the installation of assets and laydown for Horizon Power purposes only, which may precede approval for clearing acquired by FMG. Areas of temporary disturbance that has planned future use by FMG will not be rehabilitated. To facilitate the rehabilitation of vegetation in areas of temporary disturbance, Horizon Power will strip and stockpile topsoil at the commencement of construction. Horizon Power will undertake rehabilitation in a staged approach, commencing rehabilitation as areas of construction are completed. Ground levels will be recontoured to natural condition where appropriate and soil compaction removed prior to the respread of topsoil. Clearing of vegetation will only be undertaken where absolutely necessary for the installation of assets. Existing access tracks will be utilised by vehicles and machinery where-ever possible. Due</p>
---	--

	to the low-lying nature of the vegetation, it is expected that vegetation between the poles (excluding permanent access tracks) will require minimal vegetation maintenance. Areas between poles and along access tracks will be being narrow and linear in nature and it is expected to regenerate with no long-term impact to fauna habitat. It is noted that a higher clearing allowance has been requested to accommodate design and operational flexibility should ground issues (including heritage finds) be encountered in the field. It is expected that actual clearing will be significantly less than requested.
Specify what the final land use will be after clearing	Overhead 66kV transmission line including fire protection zone (ongoing vegetation maintenance along the line corridor to avoid interference with line and poles). Access tracks.

5.4 Method

Proposed method of clearing (i.e. burning, cutting, draining, flooding, grazing, mechanical clearing/bulldozing or other – specify)	Mechanical, incidental (machinery or vehicles driving over area). Removal of vegetation will only be carried out where required.
---	--

5.5 Timeframe

Period within which you propose to do the clearing (e.g. 1/7/2022 to 30/8/2024)	Start date: 1 March 2022 End date: 1 March 2027
---	--

Note: The clearing referral process is not suitable for any clearing that is expected to take longer than two years.

5.6 Avoidance and mitigation

Explain how you have, or will, put avoidance and mitigation measures in place to eliminate, reduce, or otherwise mitigate the need for and scale of the proposed clearing of native vegetation.

Attach supporting documents to substantiate your explanation.

Your explanation should demonstrate you have planned the project so that the least clearing possible is to be undertaken. The following questions may help you frame your explanation:

- Why did you select this location and amount of clearing?
- What alternatives to clearing – e.g. engineering solutions – did you consider?
- What changes, if any, did you make to the location or amount of clearing to reduce the impacts of the clearing?

Note: If you do not demonstrate adequate efforts to avoid and mitigate clearing, we will ask you to do so during the validation of this form.

Provide the avoidance and mitigation details	Horizon Power have selected the location of access tracks based on pre-existing tracks and disturbed areas from the existing transmission line to the south. It is noted that the Department of Water and Environmental Regulation – Department of Mines, Industry Regulation and Safety NV-F02 Application for a clearing permit (purpose permit) (v11, February 2021) 6 Part 4: Proposed clearing existing transmission line in the area is privately owned and not accessible to Horizon Power. No feasible alternatives to the installation of an overhead transmission resulting in a lesser environmental impact where identified

Part 6 – Offset

Do you want to submit a clearing offset proposal with your form?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
If 'Yes' – please complete and attach Appendix A of the Clearing of native vegetation offsets procedure guideline as a supporting document for your form.	<input type="checkbox"/> Appendix A attached

Part 7 – Surveys for assessments (IBSA and IMSA)

Do you want to submit marine or biodiversity surveys in support of your form?	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No – skip to Part 8
---	--

7.1 Biodiversity surveys

If you want to submit any biodiversity surveys to support this form, you must follow the Environmental Protection Authority's (EPA) [Instructions for the preparation of data packages for the Index of Biodiversity Surveys for Assessments](#) (IBSA). If you do not meet the IBSA requirements, DWER/DMIRS (as applicable) may decline/return your form.

Please provide the IBSA number(s) – or submission number(s) if the IBSA number has not yet been issued – in the space provided. Note that a submission number is not confirmation that a biodiversity survey has been accepted and is not the same as an IBSA number. IBSA numbers are only issued once a survey has been accepted. Once an IBSA number is issued, please notify DWER/DMIRS (as applicable). Please note DWER / DMIRS will suspend the assessment timeframes for your form until you provide the IBSA number(s).

Have you submitted all the biodiversity surveys that support this form to the Index of Biodiversity Surveys for Assessment, available at ibsasubmissions.dwer.wa.gov.au ?	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> Not applicable
Provide an IBSA number (preferred) or a submission number(s)	BSA-2021-0436

7.2 Marine surveys

If you want to submit any marine surveys to support this form, you must follow the EPA's [Instructions for the preparation of data packages for the Index of Marine Surveys for](#)
