[Proof of ownership](#) may include:

- a certificate of title (that is less than 6 months old)
- a pastoral or mining lease

The above parties have been informed of the through a Notice of Entry. Certificates of title attached to application.
<input type="checkbox"/> A person with multiple land parcels	<input type="checkbox"/> Attach proof of ownership <input type="checkbox"/> Complete and attach ' Authority to access and clear native vegetation ' letter (if the applicant is not the landowner)

5.1 Maps and/or spatial data

<p>Select which map type(s) you will attach with your form.</p> <p>Note: We will decline / return forms (as applicable) if you do not provide sufficient information for this question.</p>	<p><input checked="" type="checkbox"/> An ESRI shapefile with the following properties (<i>preferred</i>)</p> <ul style="list-style-type: none"> • Geometry type: polygon shape • Coordinate system: Geocentric Datum of Australia (GDA) 1994/2020 (geographic latitude / longitude) • Datum: GDA 1994 / GDA 2020 (please specify which was provided) <p><input checked="" type="checkbox"/> An aerial photograph or map with a north arrow, clearly marking the proposed clearing area</p> <p>Note:</p> <ul style="list-style-type: none"> • An ESRI shapefile must use one of the following filename extensions: .shp, .shx, .dbf, and/or .prj • You must provide an ESRI shapefile if the form requires an assessment under an <i>Environment Protection and Biodiversity Conservation Act 1999</i> (Cth) (EPBC Act) accredited process. See Part 8 of this form for more information.

5.2 Size

- If you propose to clear a patch(s) of vegetation, enter a hectare value for the total size of the area (mark number of trees as zero).
- If you propose to remove only individual trees from the area(s) (i.e. the shrubs, grasses, groundcover plants will remain intact), provide the number of trees (and mark total area as estimated hectares).
Note: If any shrubs, grasses, and/or groundcover plants MAY be damaged in the clearing process, add this to the total area.
- If you propose to clear an area of vegetation within a larger footprint, enter the hectare value for the total size of the area to be cleared (mark number of trees as zero) and the size of the footprint. For example, 5 hectares of clearing within a 10 hectare footprint. This option is only available for [purpose permit](#) applications.
- Enter values for BOTH number of trees and the size of the area if you are clearing individual trees in one area AND a patch of vegetation in a different area.
- Please note the following area conversions/calculations:

1 hectare = 10,000 m ²	Area of circle = 3.14 x radius ²
1 acre = 0.4 hectares / 4,000 m ²	Area of a rectangle = length x width
1 tree = 0.01 hectares / 100 m ²	Area of a triangle = ½ length x perpendicular height

Total area of clearing proposed (hectares)	9ha
Footprint of clearing (hectares) (purpose permit only)	10.13ha DWER Revised to 10.08 ha
Number of individual trees to be removed	N/A

Note: Calculate the area of a tree based on the area encompassed by the tree's drip line; that being the outermost circumference of the tree's canopy.

5.3 Purpose

Provide the reason for proposed clearing (e.g. road construction, grazing and pasture, hazard reduction, horticulture, timber harvesting etc.)	13km extension of overhead high voltage distribution line along Broome Road, to support Western Australia's regional economy by providing reliable power to farms, stations, and potentially a new prison.
Specify what the final land use will be after clearing	13km of overhead high voltage distribution power poles.

5.4 Method

Proposed method of clearing (i.e. burning, cutting, draining, flooding, grazing, mechanical clearing/bulldozing or other – specify)	<p>Mechanical clearing using stick rake along length of line and vehicle access. Bare earth clearing around pole bases for initial installation. Ongoing vegetation maintenance will be slashing and the maintenance of a vehicle access track.</p> <p>Clearing for the proposed overhead transmission will be linear and narrow in nature, consistent with the wider Broome electricity network managed by Horizon Power.</p> <p>Clearing a narrow corridor will have minimal impact on fauna habitat availability as there are other larger similar or better-quality habitat locations immediately adjacent to the clearing corridor. A narrow corridor that will not be cleared to ground will have a limited impact on biological diversity. The final corridor will be approximately 8 meters wide. Due to vegetation type, ongoing vegetation maintenance will involve slashing, resulting in significant ground cover remaining.</p> <p>In relation to any potential wind and water erosion, Horizon Power actively manages the erosion in the vicinity of its assets due to the potential safety risks associated with integrity of its assets (e.g. pole stability) and access for maintenance and faults. Management practices after construction include maintaining a vegetation groundcover, managing surface water flows (e.g. drainage and runoff) and undertaking regular inspections. Whilst erosion can be expected in a high rainfall region, the nature of the clearing and the implementation of mitigation and ongoing management measures, erosion issues are not likely.</p>

5.5 Timeframe

Period within which you propose to do the clearing (e.g. 1/7/2022 to 30/8/2024)	Start date: 1 st June 2022 End date: 1 st June 2027
---	--

Note: The clearing referral process is not suitable for any clearing that is expected to take longer than two years.

5.6 Avoidance and mitigation

Explain how you have, or will, put avoidance and mitigation measures in place to eliminate, reduce, or otherwise mitigate the need for and scale of the proposed clearing of native vegetation.

Attach supporting documents to substantiate your explanation.

Your explanation should demonstrate you have planned the project so that the least clearing possible is to be undertaken. The following questions may help you frame your explanation:

- Why did you select this location and amount of clearing?
- What alternatives to clearing – e.g. engineering solutions – did you consider?
- What changes, if any, did you make to the location or amount of clearing to reduce the impacts of the clearing?

Note: If you do not demonstrate adequate efforts to avoid and mitigate clearing, we will ask you to do so during the validation of this form.

Provide the avoidance and mitigation details	Majority of clearing will not be to bare earth. Stick rake will be used for length of the line. A lot of vegetation in the application area has already been cleared for fire breaks for the neighboring farms and properties and the actual clearing carried out by Horizon Power could be less than 9ha. Aerial imagery is not up to date. The location is dependent on the property location and as such this location is our only option.

Note that a submission number is not confirmation that a biodiversity survey has been accepted and is not the same as an IBSA number. IBSA numbers are only issued once a survey has been accepted. Once an IBSA number is issued, please notify DWER/DMIRS (as applicable). Please note DWER / DMIRS will suspend the assessment timeframes for your form until you provide the IBSA number(s).
