Re: Lot 5537 North Rd Wannamal – Clearing permit application

---

The following are appendix notes supporting my application for a clearing permit:

The area proposed for clearing:

- Is approx. 7-8Ha in total **DWER revised to 8.25ha**
- Has already been cleared once before and is currently regrowth (20-30yr)
- A number of larger type trees will be left for livestock shelter.
- A bank of trees will be left for wind shelter for both the current sheds and new house.
- Areas that will be cleared will be planted to a clover rye type pasture for livestock

I am in great need to establish a livestock holding area to complement the 200ac paddock that is used for livestock and crop growing purposes. I also intend to build a residence on the property.
