### 5.2 Size

- If you propose to clear a patch(s) of vegetation, enter a hectare value for the total size of the area (mark number of trees as zero).
- If you propose to remove only individual trees from the area(s) (i.e. the shrubs, grasses, groundcover plants will remain intact), provide the number of trees (and mark total area as estimated hectares).  
Note: If any shrubs, grasses, and/or groundcover plants MAY be damaged in the clearing process, add this to the total area.
- If you propose to clear an area of vegetation within a larger footprint, enter the hectare value for the total size of the area to be cleared (mark number of trees as zero) and the size of the footprint. For example, 5 hectares of clearing within a 10 hectare footprint. This option is only available for [purpose permit](#) applications.
- Enter values for BOTH number of trees and the size of the area if you are clearing individual trees in one area AND a patch of vegetation in a different area.
- Please note the following area conversions/calculations:
 

1 hectare = 10,000 m <sup>2</sup>	Area of circle = 3.14 x radius <sup>2</sup>
1 acre = 0.4 hectares / 4,000 m <sup>2</sup>	Area of a rectangle = length x width
1 tree = 0.01 hectares / 100 m <sup>2</sup>	Area of a triangle = ½ length x perpendicular height

<p>Total area of clearing proposed (hectares)</p>	<ul style="list-style-type: none"> <li>• <b>0.893ha total clearing area; DWER revised to 1.33 ha</b></li> <li>• When using satellite imagery taken prior to the February 2022 bushfire, an area of 1.30 hectares of clearing is required due to the spread of tree foliage (canopy area).</li> <li>• A portion of the requested clearing has been significantly destroyed by the bushfire, native vegetation around Pole 8 and the Greenbushes Golf Course have been reduced to burnt trunks, see images attached. The amount of clearing that is required was reduced by a percentage based on destruction of tree canopy.</li> </ul>
---	--

	<ul style="list-style-type: none"> <li>The total area is determined to be less than 1ha; however, this is difficult to accurately determine as most trees in the bushfire affected areas have lost their canopies and smaller trees and shrubs have been destroyed. See “Powerline NVClearing Maps 3 to 5”, and “132kV Power Line Pics for NVCP_Vegetation marked for clearing” as evidence of this;</li> <li>Please refer to Part 5 supporting document: “Powerline_NVClearing_MapSheet” for proposed clearing of areas 1-10 which encompass approximately 0.21 ha (non- bushfire impacted), and 0.683ha (bush-fire impacted with reduced canopy).</li> </ul>
Footprint of clearing (hectares) (purpose permit only)	
Number of individual trees to be removed	

Note: Calculate the area of a tree based on the area encompassed by the tree’s drip line; that being the outermost circumference of the tree’s canopy.

### 5.3 Purpose

Provide the reason for proposed clearing (e.g. road construction, grazing and pasture, hazard reduction, horticulture, timber harvesting etc.)	<ul style="list-style-type: none"> <li>Clearing is required to provide an easement for the 132kilo-Volt (kV) Power Line Corridor from the Hester Road Western Power Substation to the Greenbushes Mine-site Mine Development Envelope.</li> <li>Clearing for 132 kV Power Line corridor (easement) is to support the Greenbushes Mine-site expansion approved under Ministerial Statement 1111 and Mining Act approvals.</li> </ul>
Specify what the final land use will be after clearing	The final land use will be an easement or corridor for the 132kV Power Line. This land use is classified as a “Public Utility” (electricity supply services), as defined under the Rural Zone 2 - General Agriculture, Zoning of the Shire of Bridgetown Greenbushes Town Planning Scheme No. 4.

### 5.4 Method

Proposed method of clearing (i.e. burning, cutting, draining, flooding, grazing, mechanical clearing/bulldozing or other – specify)	Mechanical clearing, bulldozer or excavator.
---	--

## 5.5 Timeframe

Period within which you propose to do the clearing (e.g. 1/7/2022 to 30/8/2024)	<p>Start date: 30 June 2022</p> <p>End date: 30 November 2022</p>
---	---

Note: The clearing referral process is not suitable for any clearing that is expected to take longer than two years.

## 5.6 Avoidance and mitigation

Explain how you have, or will, put avoidance and mitigation measures in place to eliminate, reduce, or otherwise mitigate the need for and scale of the proposed clearing of native vegetation.

Attach supporting documents to substantiate your explanation.

Your explanation should demonstrate you have planned the project so that the least clearing possible is to be undertaken. The following questions may help you frame your explanation:

- Why did you select this location and amount of clearing?
- What alternatives to clearing – e.g. engineering solutions – did you consider?
- What changes, if any, did you make to the location or amount of clearing to reduce the impacts of the clearing?

Note: If you do not demonstrate adequate efforts to avoid and mitigate clearing, we will ask you to do so during the validation of this form.

Provide the avoidance and mitigation details	<ul style="list-style-type: none"> <li>• Minimum clearance requirements have been defined by Western Power in their document “Western Power Clearances advice” (Western Power 2019).</li> <li>• The Western Power Clearance advice defines the minimum requirements for clearances around new overhead power lines. These requirements state that:             <ul style="list-style-type: none"> <li>o ...further clearances of up to ten (10) metres (the Management Zone) either side of the proposed pole location/line route should be assessed and all trees and saplings with the potential to grow to become large trees within the Management Zone should be removed prior to construction”.</li> </ul> </li> <li>• Clearing of large trees within a minimum of 10m either side of the Power Pole therefore cannot be avoided. The clearance of smaller trees which are unlikely to grow and interfere with the Power Line will be kept wherever possible.</li> <li>• The location of the 132kV Power Line has been chosen to use existing easements wherever practicable to avoid additional clearing. In areas where there are no existing easements, Power Lines will be located in areas that will have minimal impact on agricultural areas or native vegetation, such as cleared farmland or other partly cleared areas to avoid additional clearing.</li> </ul>

## Part 6 – Offset

Do you want to submit a clearing offset proposal with your form?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
If 'Yes' – please complete and attach Appendix A of the <a href="#">Clearing of native vegetation offsets procedure</a> guideline as a supporting document for your form.	<input type="checkbox"/> Appendix A attached

## Part 7 – Surveys for assessments (IBSA and IMSA)

Do you want to submit marine or biodiversity surveys in support of your form?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No – skip to Part 8
---	--

### 7.1 Biodiversity surveys

If you want to submit any biodiversity surveys to support this form, you must follow the Environmental Protection Authority's (EPA) [Instructions for the preparation of data packages for the Index of Biodiversity Surveys for Assessments](#) (IBSA). If you do not meet the IBSA requirements, DWER/DMIRS (as applicable) may decline/return your form.

Please provide the IBSA number(s) – or submission number(s) if the IBSA number has not yet been issued – in the space provided. Note that a submission number is not confirmation that a biodiversity survey has been accepted and is not the same as an IBSA number. IBSA numbers are only issued once a survey has been accepted. Once an IBSA number is issued, please notify DWER/DMIRS (as applicable). Please note DWER / DMIRS will suspend the assessment timeframes for your form until you provide the IBSA number(s).
