5.2 Size

- If you propose to clear a patch(s) of vegetation, enter a hectare value for the total size of the area (mark number of trees as zero).
- If you propose to remove only individual trees from the area(s) (i.e. the shrubs, grasses, groundcover plants will remain intact), provide the number of trees (and mark total area as estimated hectares).
Note: If any shrubs, grasses, and/or groundcover plants MAY be damaged in the clearing process, add this to the total area.
- If you propose to clear an area of vegetation within a larger footprint, enter the hectare value for the total size of the area to be cleared (mark number of trees as zero) and the size of the footprint. For example, 5 hectares of clearing within a 10 hectare footprint. This option is only available for [purpose permit](#) applications.
- Enter values for BOTH number of trees and the size of the area if you are clearing individual trees in one area AND a patch of vegetation in a different area.
- Please note the following area conversions/calculations:

1 hectare = 10,000 m ²	Area of circle = 3.14 x radius ²
1 acre = 0.4 hectares / 4,000 m ²	Area of a rectangle = length x width
1 tree = 0.01 hectares / 100 m ²	Area of a triangle = ½ length x perpendicular height

Footprint of clearing (hectares) (purpose permit only)	

Number of individual trees to be removed	Up to approximately 30 trees
--	------------------------------

Note: Calculate the area of a tree based on the area encompassed by the tree's drip line; that being the outermost circumference of the tree's canopy.

5.3 Purpose

<p>Provide the reason for proposed clearing (e.g. road construction, grazing and pasture, hazard reduction, horticulture, timber harvesting etc.)</p>	<p>Preliminary land filling to accommodate development of the adjacent land to the south which is underway in accordance with a DA issued by the City of Armadale. Clearing within this land has been approved by the Decision Report CPS 92161/1, a copy of which has been provided to the Department in the previous referral of the proposed clearing on Lot 9201 (File DWER VT 7516). In order for Stage 2 of the Piara Waters lifestyle village on Lot 9008 to proceed, filling to its boundary with Lot 9021 and the construction of a noise and security wall is required to meet the specification of the DA. In order to construct the boundary fence a batter is required to be constructed into Lot 9021 for a distance of up to approximately 20m before returning to current ground level.</p> <p>When subdivision approval of Lot 9021 is granted by the WAPC, the balance of the Lot will be raised to approximately the same level of the adjacent lifestyle village development, and as specified by the earthworks approval to be approved by the City of Armadale. The clearing of the application area will not compromise the opportunity for government to consider whether or not tree retention in the balance of Lot 9201 should be considered.</p> <p>Celsius is cooperating with the owners of Lot 9008 in meeting their development obligations and to facilitate orderly planning and development of this locality.</p> <p>Attachment 4 provides a context plan showing the approved DA for Lot 9008 as well as a proposed plan of subdivision for Lot 9201</p>
<p>Specify what the final land use will be after clearing</p>	<p>Land planned for residential subdivision in accordance with an approved District Structure Plan and once a plan of subdivision has been approved. Until this time the land will comprise a batter slope of fill, awaiting subdivision approval for the balance of Lot 9201. Approval for this subdivision application is anticipated as this land use is consistent with the Structure Plan for the area approved</p>

5.4 Method

Proposed method of clearing (i.e. burning, cutting, draining, flooding, grazing, mechanical clearing/bulldozing or other – specify)	Traditional earthmoving machinery
--	-----------------------------------

5.5 Timeframe

Period within which you propose to do the clearing (e.g. 1/7/2022 to 30/8/2024)	Start date: July 2022 End date: July 2024
--	--

Note: The clearing referral process is not suitable for any clearing that is expected to take longer than two years.

5.6 Avoidance and mitigation

Explain how you have, or will, put avoidance and mitigation measures in place to eliminate, reduce, or otherwise mitigate the need for and scale of the proposed clearing of native vegetation.

Attach supporting documents to substantiate your explanation.

Your explanation should demonstrate you have planned the project so that the least clearing possible is to be undertaken. The following questions may help you frame your explanation:

- Why did you select this location and amount of clearing?
- What alternatives to clearing – e.g. engineering solutions – did you consider?
- What changes, if any, did you make to the location or amount of clearing to reduce the impacts of the clearing?

Note: If you do not demonstrate adequate efforts to avoid and mitigate clearing, we will ask you to do so during the validation of this form.

Provide the avoidance and mitigation details	Within the Piara Waters Lifestyle village, the retention of trees where possible has been implemented so as to provide an attractive landscape feature within various parts of the site. This tree retention does not extend along the northern boundary with Lot 9021 as the DA specifies a noise and security fence is to be constructed. In this context it can be seen that no avoidance opportunities are available if compliance with the DA is to be achieved.

If you do not meet the IBSA requirements, DWER/DMIRS (as applicable) may decline/return your form.

Please provide the IBSA number(s) – or submission number(s) if the IBSA number has not yet been issued – in the space provided. Note that a submission number is not confirmation that a biodiversity survey has been accepted and is not the same as an IBSA number. IBSA numbers are only issued once a survey has been accepted. Once an IBSA number is issued, please notify DWER/DMIRS (as applicable). Please note DWER / DMIRS will suspend the assessment timeframes for your form until you provide the IBSA number(s).

Part 8 – Assessment Bilateral Agreement

The native vegetation clearing processes under Part V of the EP Act have been accredited by the Commonwealth of Australia under the EPBC Act and so can be assessed under an assessment bilateral agreement.

To be assessed this way, the proposed clearing action must have been referred to the Commonwealth under the EPBC Act and deemed a '**controlled action**' before you submit this form.

For further information, see [DWER's website guidance on the assessment bilateral agreement](#).

9.1 Environmental impact assessment (Part IV of the EP Act)

Clearing may be referred to the EPA if it is considered to be part of a 'significant proposal', as defined by section 37B(1) of the EP Act, or will likely to be part of a larger development. An example is when the clearing is for a road to a future mine.

Section 37B(1) of the EP Act defines a 'significant proposal' as "a proposal likely, if implemented, to have a significant effect on the environment". If a decision-making authority (e.g. DWER or DMIRS) considers the proposal in this form is likely to constitute a 'significant proposal', under section 38(5) of the EP Act they must refer the proposal to the EPA or for assessment under Part IV, if such a referral has not already been made.
