### 5.2 Size

- If you propose to clear a patch(s) of vegetation, enter a hectare value for the total size of the area (mark number of trees as zero).
- If you propose to remove only individual trees from the area(s) (i.e. the shrubs, grasses, groundcover plants will remain intact), provide the number of trees (and mark total area as estimated hectares).  
 Note: If any shrubs, grasses, and/or groundcover plants MAY be damaged in the clearing process, add this to the total area.
- If you propose to clear an area of vegetation within a larger footprint, enter the hectare value for the total size of the area to be cleared (mark number of trees as zero) and the size of the footprint. For example, 5 hectares of clearing within a 10 hectare footprint. This option is only available for [purpose permit](#) applications.
- Enter values for BOTH number of trees and the size of the area if you are clearing individual trees in one area AND a patch of vegetation in a different area.
- Please note the following area conversions/calculations:
 

1 hectare = 10,000 m <sup>2</sup>	Area of circle = 3.14 x radius <sup>2</sup>
1 acre = 0.4 hectares / 4,000 m <sup>2</sup>	Area of a rectangle = length x width
1 tree = 0.01 hectares / 100 m <sup>2</sup>	Area of a triangle = ½ length x perpendicular height

Total area of clearing proposed (hectares)	<b>2.094 ha</b>	NOTE: Revised to 1.77ha during Validation
Footprint of clearing (hectares) (purpose permit only)		

Number of individual trees to be removed	<b>Not applicable</b>
--	-----------------------

Note: Calculate the area of a tree based on the area encompassed by the tree's drip line; that being the outermost circumference of the tree's canopy.

### 5.3 Purpose

Provide the reason for proposed clearing (e.g. road construction, grazing and pasture, hazard reduction, horticulture, timber harvesting etc.)	Access roads, construction of wind turbines and cabling works
Specify what the final land use will be after clearing	Renewable Energy Facility – Wind farm

### 5.4 Method

Proposed method of clearing (i.e. burning, cutting, draining, flooding, grazing, mechanical clearing/bulldozing or other – specify)	Mechanical clearing
---	---------------------

### 5.5 Timeframe

Period within which you propose to do the clearing (e.g. 1/7/2022 to 30/8/2024)	Start date:01/11/2022 End date: 01/12/2022
---	---

Note: The clearing referral process is not suitable for any clearing that is expected to take longer than two years.

### 5.6 Avoidance and mitigation

Explain how you have, or will, put avoidance and mitigation measures in place to eliminate, reduce, or otherwise mitigate the need for and scale of the proposed clearing of native vegetation.

Attach supporting documents to substantiate your explanation.

Your explanation should demonstrate you have planned the project so that the least clearing possible is to be undertaken. The following questions may help you frame your explanation:

- Why did you select this location and amount of clearing?
- What alternatives to clearing – e.g. engineering solutions – did you consider?
- What changes, if any, did you make to the location or amount of clearing to reduce the impacts of the clearing?

Note: If you do not demonstrate adequate efforts to avoid and mitigate clearing, we will ask you to do so during the validation of this form.

<p>Provide the avoidance and mitigation details</p>	<p><b>The mitigation hierarchy has been implemented as follows:</b></p> <p><b>Avoid</b></p> <p>Enel Green Power have undertaken an iterative design process to avoid clearing as far as practicable for the proposed Project. This included:</p> <ul style="list-style-type: none"> <li>• Completion of surveys to understand the environmental context and values of the area, including mapping of vegetation (survey reports are attached to this application)</li> <li>• Identification and comparison of alternative access routes and turbine design options which has been refined through consultation with stakeholders, design engineers, and environmental consultants</li> <li>• Altering of cabling alignment to ensure remnant patches of vegetation are maintained in an already highly modified landscape</li> <li>• Ensuring that Threatened Ecological Communities or cockatoo habitat trees are not cleared by the Project (note also the Project was referred to the Department of Agriculture, Water and Environment (DAWE) under the Environmental Protection and Biodiversity Conservation Act (EPBC Act), and the project was determined to be “not-controlled” (ref: 2022/9154).</li> <li>• Through the iterative design process, the total area of proposed clearing has reduced from 2.94 ha to 2.094 ha</li> </ul> <p><b>Minimise</b></p> <ul style="list-style-type: none"> <li>• Micro siting of wind turbines and realignment of cabling has been undertaken to implement trimming of vegetation in place of clearing where possible</li> <li>• The number of total turbines has been reduced to further minimise the required clearing areas</li> <li>• A Construction Management Plan (CMP) is being prepared for the project, which will include controls around minimizing direct and indirect impacts to flora and vegetation.</li> </ul> <p><b>Rehabilitate</b></p> <ul style="list-style-type: none"> <li>• No native vegetation is being cleared that is not required for permanent infrastructure (turbines, access, and cabling), and as such there are no opportunities for rehabilitation of direct impact areas.</li> <li>• For clearing of riparian vegetation (clearing sites 19, 39, 40, 41 and 60), an equal area of the same species of vegetation will be planted adjacent to the cleared area.</li> </ul>

### 7.1 Biodiversity surveys

If you want to submit any biodiversity surveys to support this form, you must follow the Environmental Protection Authority's (EPA) [Instructions for the preparation of data packages for the Index of Biodiversity Surveys for Assessments](#) (IBSA). If you do not meet the IBSA requirements, DWER/DMIRS (as applicable) may decline/return your form.

Please provide the IBSA number(s) – or submission number(s) if the IBSA number has not yet been issued – in the space provided. Note that a submission number is not confirmation that a biodiversity survey has been accepted and is not the same as an IBSA number. IBSA numbers are only issued once a survey has been accepted. Once an IBSA number is issued, please notify DWER/DMIRS (as applicable). Please note DWER / DMIRS will suspend the assessment timeframes for your form until you provide the IBSA number(s).

## Part 8 – Assessment Bilateral Agreement

The native vegetation clearing processes under Part V of the EP Act have been accredited by the Commonwealth of Australia under the EPBC Act and so can be assessed under an assessment bilateral agreement.

To be assessed this way, the proposed clearing action must have been referred to the Commonwealth under the EPBC Act and deemed a **‘controlled action’** before you submit this form.

### 9.1 Environmental impact assessment (Part IV of the EP Act)

Clearing may be referred to the EPA if it is considered to be part of a ‘significant proposal’, as defined by section 37B(1) of the EP Act, or will likely to be part of a larger development. An example is when the clearing is for a road to a future mine.

Section 37B(1) of the EP Act defines a ‘significant proposal’ as “a proposal likely, if implemented, to have a significant effect on the environment”. If a decision-making authority (e.g. DWER or DMIRS) considers the proposal in this form is likely to constitute a ‘significant proposal’, under section 38(5) of the EP Act they must refer

the proposal to the EPA or for assessment under Part IV, if such a referral has not already been made.
