5.1 Maps and/or spatial data

See Part 8 of this form for more information.

5.2 Size

- If you propose to clear a patch(s) of vegetation, enter a hectare value for the total size of the area (mark number of trees as zero).
- If you propose to remove only individual trees from the area(s) (i.e. the shrubs, grasses, groundcover plants will remain intact), provide the number of trees (and mark total area as estimated hectares).
Note: If any shrubs, grasses, and/or groundcover plants MAY be damaged in the clearing process, add this to the total area.
- If you propose to clear an area of vegetation within a larger footprint, enter the hectare value for the total size of the area to be cleared (mark number of trees as zero) and the size of the footprint. For example, 5 hectares of clearing within a 10 hectare footprint. This option is only available for [purpose permit](#) applications.
- Enter values for BOTH number of trees and the size of the area if you are clearing individual trees in one area AND a patch of vegetation in a different area.
- Please note the following area conversions/calculations:

1 hectare = 10,000 m ²	Area of circle = 3.14 x radius ²
1 acre = 0.4 hectares / 4,000 m ²	Area of a rectangle = length x width
1 tree = 0.01 hectares / 100 m ²	Area of a triangle = ½ length x perpendicular height

Total area of clearing proposed (hectares)	0.669 ha Revised to 0.55 ha
Footprint of clearing (hectares) (purpose permit only)	0.669 ha
Number of individual trees to be removed	Estimated 15-20 Marri trees, 30-35 small to medium Peppermint Trees

Note: Calculate the area of a tree based on the area encompassed by the tree's drip line; that being the outermost circumference of the tree's canopy.

5.3 Purpose

Provide the reason for proposed clearing (e.g. road construction, grazing and pasture, hazard reduction, horticulture, timber harvesting etc.)	Construction of a slip lane and new intersection on highway and associated signage and drainage works – Slip lanes are located on the east and west sides of Bussell Highway to allow safe access to the Karridale West subdivision. New intersection allows for access to subdivision to the west of Bussell Highway.
Specify what the final land use will be after clearing	Road

5.4 Method

Proposed method of clearing (i.e. burning, cutting, draining, flooding, grazing, mechanical clearing/bulldozing or other – specify)	Mechanical clearing – Clearing is proposed to be undertaken in a steady progressive directional manner allowing any fauna present to self-relocate to adjacent bushland during clearing works
---	---

5.5 Timeframe

Period within which you propose to do the clearing (e.g. 1/7/2022 to 30/8/2024)	Start date: 1 November, 2022 End date: 30 November 2022
---	--

Note: The clearing referral process is not suitable for any clearing that is expected to take longer than two years.

5.6 Avoidance and mitigation

Explain how you have, or will, put avoidance and mitigation measures in place to eliminate, reduce, or otherwise mitigate the need for and scale of the proposed clearing of native vegetation.

Attach supporting documents to substantiate your explanation.

Your explanation should demonstrate you have planned the project so that the least clearing possible is to be undertaken. The following questions may help you frame your explanation:

- Why did you select this location and amount of clearing?
- What alternatives to clearing – e.g. engineering solutions – did you consider?
- What changes, if any, did you make to the location or amount of clearing to reduce the impacts of the clearing?

Note: If you do not demonstrate adequate efforts to avoid and mitigate clearing, we will ask you to do so during the validation of this form.

Provide the avoidance and mitigation details	<p>Avoidance and mitigation measures were applied during the design process following the hierarchy described below:</p> <ul style="list-style-type: none"> (a) avoid the clearing of native vegetation (b) minimise the amount of native vegetation to be cleared; and (c) reduce the impact of clearing on any environmental value. <p>Measures are discussed below:</p> <p>Avoid</p> <p>The design of the access road for the Karridale West subdivision area was situated so as to maximize use of existing cleared paddocks and avoid vegetation clearing to the extent possible. Ability to avoid clearing of vegetation along verges of Bussell Highway to construct slip/turning lanes is highly constrained. Design constraints to comply with road design requirements did not allow for some clearing of vegetation along highway verge to be avoided.</p> <p>Minimise</p> <p>The design of slip/turning lanes was prepared so as to require the minimal footprint of clearing within the design constraints of achieving required road design criteria. The area of potential clearing in this application represents the maximum potential area and actual clearing will likely be less than this. Clearing will be undertaken applying the procedure of only clearing to the extent that is required for each element.</p> <p>Reduce impact</p> <p>All areas of vegetation proposed for clearing are in Completely Degraded condition (see attached Karridale West Roadside Biological Survey report (WEPL, 2022)). Areas of vegetation in better condition were avoided to reduce the impact of clearing on environmental values.</p>

7.1 Biodiversity surveys

If you want to submit any biodiversity surveys to support this form, you must follow the Environmental Protection Authority's (EPA) [Instructions for the preparation of data packages for the Index of Biodiversity Surveys for Assessments](#) (IBSA). If you do not meet the IBSA requirements, DWER/DMIRS (as applicable) may decline/return your form.

Please provide the IBSA number(s) – or submission number(s) if the IBSA number has not yet been issued – in the space provided. Note that a submission number is not confirmation that a biodiversity survey has been accepted and is not the same as an IBSA number. IBSA numbers are only issued once a survey has been accepted. Once an IBSA number is issued, please notify DWER/DMIRS (as applicable). Please note DWER / DMIRS will suspend the assessment timeframes for your form until you provide the IBSA number(s).
