Application to amend a clearing permit

Environmental Protection Act 1986, section 51KA

FORM C4

The clearing of native vegetation is prohibited in Western Australia unless a clearing permit has been granted for the clearing or where a permit is not required (either due to a referral determination that one is not needed or because an exemption applies). A person who causes or allows unauthorised clearing commits an offence.

For further information on the stages of assessment for clearing permit applications (including amendments to existing permits), see the [Procedure: Native vegetation clearing permits](#) on DWER's website.

Part 1: Assessment bilateral agreement

If the amendment of a clearing permit will or is likely to impact on a matter of national environmental significance identified under the *Environment Protection and Biodiversity Conservation Act 1999* (Cth) (EPBC Act) the original application must have been assessed in accordance with the bilateral assessment, and a variation under the EPBC Act is required prior to submitting this amendment application form.

To be assessed in this manner, the proposed clearing action must be referred to the Commonwealth under the EPBC Act and deemed a '[controlled action](#)' prior to submitting this application form.

Further information is located in *Form Annex C7* and *A guide to native vegetation clearing processes under the Assessment bilateral agreement* available at www.der.wa.gov.au/our-work/clearing-permits.

Do you want your proposed clearing action assessed in accordance with, or under, an EPBC Act Accredited Process such as the assessment bilateral agreement?

☐ Yes EPBC number: _____

☒ No Proceed to Part 2

List the controlling provisions identified in the notification of the controlled action decision.

☐ *Form Annex C7* is complete and the required supporting information is attached.

Part 2: Clearing permit details

Amendments can only be made to active clearing permits.
Applications must be made more than 90 working days prior to the existing permit expiring to ensure there is adequate time to assess the amendment.

Part 4: Proposed amendments			
<p>Additional information to support the assessment of your application to amend may be attached.</p> <p>Please ensure you have included the following as part of your application:</p> <ul style="list-style-type: none"> a photocopy of the granted clearing permit, with proposed changes highlighted, and payment of the prescribed fee. <p>When providing details of the proposed change(s), if any additional clearing is proposed, include details of:</p> <ul style="list-style-type: none"> the proposed method of the clearing; the purpose of the clearing; the period within which the clearing is proposed to be undertaken (taking note of the published minimum assessment timeframes for DWER / DMIRS, as applicable); and the final land use. 	<p>Indicate the types of proposed change(s) to your clearing permit by selecting the relevant box(es):</p>		
	<input type="checkbox"/>	Extend the duration of the clearing permit.	
	<input type="checkbox"/>	Vary / add / remove a permit condition relating to a matter other than the size or boundary of the area to be cleared.	
	<input checked="" type="checkbox"/>	Amend the size of the area permitted to be cleared, or add / remove a land parcel on the clearing permit.	
	<input type="checkbox"/>	Redescribe the boundary of the area authorised to be cleared [for an area permit only]	
	<input type="checkbox"/>	Make a correction to the clearing permit.	
	<input type="checkbox"/>	Other.	
<p>Provide details of the proposed change(s), and the rationale(s) for it / them.</p> <p>The applicant is requesting that the area permitted to be cleared be increased by up to 1.22ha (0.69 ha + 0.53 ha). The changes are proposed around the leachate containment pond and western and southern boundaries of the landfill cell. Please see Figure 1 of the attached supporting document for more information.</p> <p>At the time of the initial NVCP application, the Project was in the concept design stage. Now that the Proposal has advanced to the detailed design stage, it has become apparent that the initial disturbance footprint is not large enough to cater for the infrastructure requirements set out in the WMF's Works Approval, particularly the requirements associated with the size of the leachate containment pond and the stormwater diversion drains along the toe of the landfill cells. These requirements are critical for the management and mitigation of environmental impacts and the longevity of the WMF. Increasing the clearing area to cater for these requirements ultimately decreases the need for clearing later in the construction and operation stages. Further information is provided in the attached Clearing Amendment Supporting Document.</p>			
<p>For an application to amend the size of the area permitted to be cleared, or add a land parcel to the clearing permit, you must have the authority of the landowner to access the land and undertake the clearing.</p>	<p>State the nature of the applicant's authority to access the land to be cleared. Evidence of authority can include e.g. a copy of the certificate of title or a letter of authority signed by the landowner or other person with authority to give legal land access permission.</p> <p><i>[Attach evidence of authority. Note that a letter of authority must explicitly state the applicant has authority to clear on the land.]</i></p> <p>The applicant is the registered proprietor on the certificate of title. See Clearing Amendment Supporting Document Attachment 2.</p>		
<p>Provide additional property details if required – if applying to extend the size of the area to be cleared into another land parcel.</p>	<p>Land description: volume and folio number, lot or location number(s), Crown lease or reserve number, pastoral lease number, or mining tenement number of all properties.</p> <p>Lot 7546 on Deposited Plan 186612. Crown Reserve 23969.</p>		
<p>You must provide evidence that avoidance and mitigation options have been pursued to eliminate, reduce or otherwise mitigate the need for, and scale of, the proposed clearing of native vegetation.</p>	<p>Have alternatives that would avoid or minimise the need for clearing been considered and applied?</p>	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No	
<p>If yes, provide details:</p> <p>The design of the leachate containment pond includes a vegetation buffer of well-established Jarrah that will be actively avoided during construction to limit the impacts on potential Black Cockatoo habitat.</p> <p>Previously cleared or disturbed areas have been utilized to minimize the need for new clearing.</p>			

Part 4: Proposed amendments	
	GHD did advance designs for a leachate containment pond to meet the current smaller approved disturbance footprint and the modelling showed that it only provide sufficient storage capacity for the Shire for 3-5 years, at which point the pond would risk overtopping or another pond (including more clearing) would need to be constructed. This revised design and pond sizing would ensure that there is sufficient leachate holding capacity to service the landfill to closure.

Biodiversity surveys submitted to support this application must meet the requirements of the EPA's Instructions for the preparation of data packages for the Index of Biodiversity Surveys for Assessments (IBSA) . If these requirements are not met, DWER / DMIRS (as applicable) may decline to deal with the application. Please provide the IBSA number(s) (or submission number(s) if IBSA number has not yet been issued) in the space provided. Note that a submission number is not confirmation of acceptance of a biodiversity survey and is not the same as an IBSA number. IBSA numbers are only issued once a survey has been accepted. Once an IBSA number is issued, please notify DWER / DMIRS (as applicable). Please note the assessment timeframes for your application will be suspended until the IBSA number(s) is provided to DWER / DMIRS (as applicable).
