Part 5 – Proposed clearing

See Part 8 of this form for more information.

5.2 Size

- If you propose to clear a patch(s) of vegetation, enter a hectare value for the total size of the area (mark number of trees as zero).
- If you propose to remove only individual trees from the area(s) (i.e. the shrubs, grasses, groundcover plants will remain intact), provide the number of trees (and mark total area as estimated hectares).
Note: If any shrubs, grasses, and/or groundcover plants MAY be damaged in the clearing process, add this to the total area.
- If you propose to clear an area of vegetation within a larger footprint, enter the hectare value for the total size of the area to be cleared (mark number of trees as zero) and the size of the footprint. For example, 5 hectares of clearing within a 10 hectare footprint. This option is only available for **purpose permit** applications.
- Enter values for BOTH number of trees and the size of the area if you are clearing individual trees in one area AND a patch of vegetation in a different area.
- Please note the following area conversions/calculations:

1 hectare = 10,000 m ²	Area of circle = 3.14 x radius ²
1 acre = 0.4 hectares / 4,000 m ²	Area of a rectangle = length x width
1 tree = 0.01 hectares / 100 m ²	Area of a triangle = ½ length x perpendicular height

Total area of clearing proposed (hectares)	40 ha
Footprint of clearing (hectares) (purpose permit only)	463.37 ha
Number of individual trees to be removed	0

Note: Calculate the area of a tree based on the area encompassed by the tree's drip line; that being the outermost circumference of the tree's canopy.

5.3 Purpose

Provide the reason for proposed clearing (e.g. road construction, grazing and pasture, hazard reduction, horticulture, timber harvesting etc.)	AGMC propose to expand mining activities in the Barren Lands Project Area to include underground mining operations and associated expansion of the Waste Rock Dump (WRD). This proposed expansion will require additional clearing of native vegetation up to 85 hectares within the approved boundary of CPS 9418/2.
Specify what the final land use will be after clearing	Expansion of mining activities for mineral production and associated activities such as WRD and underground mining operations expansions.

5.4 Method

Proposed method of clearing (i.e. burning, cutting, draining, flooding, grazing, mechanical clearing/bulldozing or other – specify)	Mechanical clearing
---	---------------------

5.5 Timeframe

Period within which you propose to do the clearing (e.g. 1/7/2022 to 30/8/2024)	Start date: 27/11/2021 End date: 31/08/2026
---	--

Note: The clearing referral process is not suitable for any clearing that is expected to take longer than two years.

5.6 Avoidance and mitigation

Explain how you have, or will, put avoidance and mitigation measures in place to eliminate, reduce, or otherwise mitigate the need for and scale of the proposed clearing of native vegetation.

Attach supporting documents to substantiate your explanation.

Your explanation should demonstrate you have planned the project so that the least clearing possible is to be undertaken. The following questions may help you frame your explanation:

- Why did you select this location and amount of clearing?
- What alternatives to clearing – e.g. engineering solutions – did you consider?
- What changes, if any, did you make to the location or amount of clearing to reduce the impacts of the clearing?

Note: If you do not demonstrate adequate efforts to avoid and mitigate clearing, we will ask you to do so during the validation of this form.

Provide the avoidance and mitigation details	<ul style="list-style-type: none"> • Prior to clearing and earthworks commencing, the area will be clearly demarcated to ensure that no excess clearing occurs, and all personnel will be made aware of the requirement to protect vegetation beyond permitted areas (where possible). • Existing cleared access tracks will be used where practicable and weed hygiene measures will be in place to minimise the risk of spread or introduction of new weed species. • AGMC will comply with the <i>Aboriginal Heritage Act 1972</i> and ensure that no Aboriginal Sites of Significance are damaged through the clearing process. • A buffer will be maintained between clearing and infrastructure and any water courses. • Where a watercourse is to be impacted by clearing, AGMC will construct a diversion bund to ensure the existing surface flow is maintained and diverted into an existing natural drainage line • Weed hygiene measures will be in place to minimise the risk of spread or introduction of new weed species in accordance with AGM-ENV-PR001 Weed Management Procedure. • Off-road vehicle use will be strictly controlled, with no driving permitted off designated routes. • Disturbed areas will be minimised, and any areas of disturbance will be rehabilitated to avoid colonisation by weed species. • All personnel will complete a site induction to reinforce awareness of the AGMC Weed Management Procedure to prevent the spread of weeds. • Natural drainage contours will be maintained as much as possible. • Where natural drainage is altered, surface water will be diverted via the abandonment bund into an adjacent tributary to the Scotty Creek.
