See Part 8 of this form for more information.

5.2 Size

- If you propose to clear a patch(s) of vegetation, enter a hectare value for the total size of the area (mark number of trees as zero).
- If you propose to remove only individual trees from the area(s) (i.e. the shrubs, grasses, groundcover plants will remain intact), provide the number of trees (and mark total area as estimated hectares).
Note: If any shrubs, grasses, and/or groundcover plants MAY be damaged in the clearing process, add this to the total area.
- If you propose to clear an area of vegetation within a larger footprint, enter the hectare value for the total size of the area to be cleared (mark number of trees as zero) and the size of the footprint. For example, 5 hectares of clearing within a 10 hectare footprint. This option is only available for purpose permit applications.
- Enter values for BOTH number of trees and the size of the area if you are clearing individual trees in one area AND a patch of vegetation in a different area.
- Please note the following area conversions/calculations:

1 hectare = 10,000 m ²	Area of circle = 3.14 x radius ²
1 acre = 0.4 hectares / 4,000 m ²	Area of a rectangle = length x width
1 tree = 0.01 hectares / 100 m ²	Area of a triangle = ½ length x perpendicular height

Total area of clearing proposed (hectares)	2.25 Hectares
Footprint of clearing (hectares) (purpose permit only)	Note: Application area has changed from 2.25ha to 3.01ha during validation
Number of individual trees to be removed	

Note: Calculate the area of a tree based on the area encompassed by the tree's drip line; that being the outermost circumference of the tree's canopy.

5.3 Purpose

Provide the reason for proposed clearing (e.g. road construction, grazing and pasture, hazard reduction, horticulture, timber harvesting etc.)	Horticulture – Olive Trees Plantation
Specify what the final land use will be after clearing	Olive Trees Plantation

5.4 Method

Proposed method of clearing (i.e. burning, cutting, draining, flooding, grazing, mechanical clearing/bulldozing or other – specify)	Mechanical Clearing
---	---------------------

5.5 Timeframe

Period within which you propose to do the clearing (e.g. 1/7/2022 to 30/8/2024)	Start date: Feb 2023 End date: Mar 2023
---	--

Note: The clearing referral process is not suitable for any clearing that is expected to take longer than two years.

5.6 Avoidance and mitigation

Explain how you have, or will, put avoidance and mitigation measures in place to eliminate, reduce, or otherwise mitigate the need for and scale of the proposed clearing of native vegetation.

Attach supporting documents to substantiate your explanation.

Your explanation should demonstrate you have planned the project so that the least clearing possible is to be undertaken. The following questions may help you frame your explanation:

- Why did you select this location and amount of clearing?
- What alternatives to clearing – e.g. engineering solutions – did you consider?
- What changes, if any, did you make to the location or amount of clearing to reduce the impacts of the clearing?

Note: If you do not demonstrate adequate efforts to avoid and mitigate clearing, we will ask you to do so during the validation of this form.

Provide the avoidance and mitigation details	<p>Property bought in November 1999 by Keith and Tanuja Sanders. Please see attached aerial photos labelled Attachment 2 and Attachment 3, which shows that the currently proposed location of olive trees plantation for which this application is being made, as shown in the aerial map labelled Attachment 1, was effectively a clear land with very few trees at the time when property was purchased.</p> <p>There was an extensive bushfire on our property on 24th December 1999, which led to many trees on the property being burnt down. Please see Attachments 4, 5 and 6 that shows the extent of the damage. Since the bushfire, there has been many re-growths of trees that have actively sprouted and have grown as can be seen in the current property aerial</p>
--	--

	<p>map. As these are re-growths, the trees that will be impacted by this clearing permit are no greater than 10 to 15 cms in diameter. There will be no more than 50 trees that are greater than 25 cms in diameter that will be impacted by this clearing permit, and the species of all trees are 75% of peppery trees and 25% being Jarrah trees.</p> <p>The reason for our selection of this real estate to expand our plantation of olive trees to make a financially viable business is because this would have the least impact to the native vegetation. We propose to plant over 100 native trees on our property elsewhere to compensate for any trees that we will remove through this clearing permit in order to ensure that native vegetation of the region is preserved.</p> <p>Besides, we are making this application to plant more trees, which will make positive impact to the local economy. Through this olive tree cultivation, we are positive that it will provide better protection to the environment from bushfires.</p>

If you do not meet the IBSA requirements, DWER/DMIRS (as applicable) may decline/return your form.

Please provide the IBSA number(s) – or submission number(s) if the IBSA number has not yet been issued – in the space provided. Note that a submission number is not confirmation that a biodiversity survey has been accepted and is not the same as an IBSA number. IBSA numbers are only issued once a survey has been accepted. Once an IBSA number is issued, please notify DWER / DMIRS (as applicable). Please note DWER / DMIRS will suspend the assessment timeframes for your form until you provide the IBSA number(s).

9.1 Environmental impact assessment (Part IV of the EP Act)

Clearing may be referred to the EPA if it is considered to be part of a 'significant proposal', as defined by s.37B(1) of the EP Act, or will likely to be part of a larger development. An example is when the clearing is for a road to a future mine.

Section 37B(1) of the EP Act defines a 'significant proposal' as 'a proposal likely, if implemented, to have a significant effect on the environment'. If a decision-making authority (e.g. DWER or DMIRS) considers the proposal in this form is likely to constitute a 'significant proposal', under s.38(5) of the EP Act they must refer the proposal to the EPA or for assessment under Part IV, if such a referral has not already been made.
