### 5.2 Size

- If you propose to clear a patch(s) of vegetation, enter a hectare value for the total size of the area (mark number of trees as zero).
- If you propose to remove only individual trees from the area(s) (i.e. the shrubs, grasses, groundcover plants will remain intact), provide the number of trees (and mark total area as estimated hectares).  
Note: If any shrubs, grasses, and/or groundcover plants MAY be damaged in the clearing process, add this to the total area.
- If you propose to clear an area of vegetation within a larger footprint, enter the hectare value for the total size of the area to be cleared (mark number of trees as zero) and the size of the footprint. For example, 5 hectares of clearing within a 10 hectare footprint. This option is only available for **purpose permit** applications.
- Enter values for BOTH number of trees and the size of the area if you are clearing individual trees in one area AND a patch of vegetation in a different area.
- Please note the following area conversions/calculations:
 

1 hectare = 10,000 m <sup>2</sup>	Area of circle = 3.14 x radius <sup>2</sup>
1 acre = 0.4 hectares / 4,000 m <sup>2</sup>	Area of a rectangle = length x width
1 tree = 0.01 hectares / 100 m <sup>2</sup>	Area of a triangle = ½ length x perpendicular height

Total area of clearing proposed (hectares)	<b>0.03 ha</b>
Footprint of clearing (hectares) (purpose permit only)	<b>N/A</b>
Number of individual trees to be removed	<b>0</b>

Note: Calculate the area of a tree based on the area encompassed by the tree's drip line; that being the outermost circumference of the tree's canopy.

### 5.3 Purpose

<p>Provide the reason for proposed clearing (e.g. road construction, grazing and pasture, hazard reduction, horticulture, timber harvesting etc.)</p>	<p>To develop the site for residential purposes in accordance with the Structure Plan, the clearing of native vegetation is required and would enable the following required activities:</p> <ul style="list-style-type: none"> <li>• Bulk earthworks, including cutting and filling of the land and the importation and/or exportation of clean construction fill where required.</li> <li>• Civil construction works, including the construction of residential lots, roads, public open space areas, services infrastructure (such as sewer, water, gas, electricity, communications) and all other associated construction works to establish a residential estate, to the point that completed residential lots are ready for individual dwellings to be built by home builders/lot purchasers.</li> </ul>
<p>Specify what the final land use will be after clearing</p>	<p>The final land use of Lot 805 (the site) will be for residential living. The site is part of the Hammond Quarter Structure Plan area which includes neighboring Lots 816, 803, 9001, 817 and 9002, with these lots including the site ultimately developed for residential purposes including a total of 294 residential lots of varying density, local road reserves, public open space areas and nature reserves.</p>

### 5.4 Method

<p>Proposed method of clearing (i.e. burning, cutting, draining, flooding, grazing, mechanical clearing/bulldozing or other – specify)</p>	<p>Mechanical clearing</p>
--	----------------------------

### 5.5 Timeframe

<p>Period within which you propose to do the clearing (e.g. 1/7/2022 to 30/8/2024)</p>	<p>Start date: 01/07/2023 End date: 01/10/2023</p>
--	--

Note: The clearing referral process is not suitable for any clearing that is expected to take longer than two years.

### 5.6 Avoidance and mitigation

Explain how you have, or will, put avoidance and mitigation measures in place to eliminate, reduce, or otherwise mitigate the need for and scale of the proposed clearing of native vegetation.

Attach supporting documents to substantiate your explanation.

Your explanation should demonstrate you have planned the project so that the least clearing possible is to be undertaken. The following questions may help you frame your explanation:

- Why did you select this location and amount of clearing?

- What alternatives to clearing – e.g. engineering solutions – did you consider?
- What changes, if any, did you make to the location or amount of clearing to reduce the impacts of the clearing?

Note: If you do not demonstrate adequate efforts to avoid and mitigate clearing, we will ask you to do so during the validation of this form.

Provide the avoidance and mitigation details	<p>Lot 805 Wattleup Road is considered an appropriate location for the residential development in accordance with the Hammond Quarter Structure Plan and the overarching Southern Suburbs District Structure Plan originally adopted in 2005. Additionally, the locality of Lot 805 comprises other large landholding currently under development subject to the Hammond Grove and Hammond West Structure Plan areas located to the north.</p> <p>The proponent has ensured that the least clearing of vegetation possible would be undertaken to enable the residential development of Lot 805, which commenced with understanding the flora and vegetation conditions and values within the site. The existing vegetation within the site was determined to be in ‘Completely Degraded’ condition, with most native vegetation occurring as natural regrowth and as small, scattered patches of shrubs and individual trees, with the majority of the site comprising non-native and planted trees with an understorey of non-native grasses. No threatened or priority flora species were identified within the site and are highly unlikely to occur due to the historical disturbance of the site. Furthermore, no threatened or priority ecological communities exist within the site.</p> <p>Based on the required bulk earthworks which will ultimately enable the development of the site for residential purposes, there are limited opportunities to avoid impacts of native vegetation within the site due to the scattered occurrence of the native vegetation. No mitigation measures were deemed necessary as any environmental values were determined to be highly limited and not material and/or critical in providing habitat for significant flora and fauna species such as black cockatoos. Landscape treatments within the site’s road reserves and proposed public open space areas will likely include the planting of native plant species.</p>

### 9.1 Environmental impact assessment (Part IV of the EP Act)

Clearing may be referred to the EPA if it is considered to be part of a 'significant proposal', as defined by s.37B(1) of the EP Act, or will likely to be part of a larger development. An example is when the clearing is for a road to a future mine.

Section 37B(1) of the EP Act defines a 'significant proposal' as 'a proposal likely, if implemented, to have a significant effect on the environment'. If a decision-making authority (e.g. DWER or DMIRS) considers the proposal in this form is likely to constitute a 'significant proposal', under s.38(5) of the EP Act they must refer the proposal to the EPA or for assessment under Part IV, if such a referral has not already been made.
