5.2 Size

- If you propose to clear a patch(s) of vegetation, enter a hectare value for the total size of the area (mark number of trees as zero).
- If you propose to remove only individual trees from the area(s) (i.e. the shrubs, grasses, groundcover plants will remain intact), provide the number of trees (and mark total area as estimated hectares).
Note: If any shrubs, grasses, and/or groundcover plants MAY be damaged in the clearing process, add this to the total area.
- If you propose to clear an area of vegetation within a larger footprint, enter the hectare value for the total size of the area to be cleared (mark number of trees as zero) and the size of the footprint. For example, 5 hectares of clearing within a 10 hectare footprint. This option is only available for **purpose permit** applications.
- Enter values for BOTH number of trees and the size of the area if you are clearing individual trees in one area AND a patch of vegetation in a different area.
- Please note the following area conversions/calculations:

$$1 \text{ hectare} = 10,000 \text{ m}^2$$

$$1 \text{ acre} = 0.4 \text{ hectares} / 4,000 \text{ m}^2$$

$$1 \text{ tree} = 0.01 \text{ hectares} / 100 \text{ m}^2$$

$$\text{Area of circle} = 3.14 \times \text{radius}^2$$

$$\text{Area of a rectangle} = \text{length} \times \text{width}$$

$$\text{Area of a triangle} = \frac{1}{2} \text{ length} \times \text{perpendicular height}$$

Total area of clearing proposed (hectares)	less than 0.001 ha
Footprint of clearing (hectares) (purpose permit only)	No physical clearing proposed. Incidental damage may occur to individual plants covering a total area of less than 0.001 ha (<10 m ³), due to directional drilling or installation of new (replacement) power

NOTE: Proposed clearing area revised to 0.2494 hectares during validation. Rounded to 0.25ha

	poles.
Number of individual trees to be removed	N/A

Note: Calculate the area of a tree based on the area encompassed by the tree's drip line; that being the outermost circumference of the tree's canopy.

5.3 Purpose

Provide the reason for proposed clearing (e.g. road construction, grazing and pasture, hazard reduction, horticulture, timber harvesting etc.)	<p>Albemarle has identified specific locations along Arber Road in Wellesley where overhead powerlines pose a risk to the safe transport of large modules to the Albemarle Kemerton Plant. To address this risk, Western Power is seeking to remove the overhead powerlines and replace them with underground powerlines at the Marriott Road/Arber Road intersection (Construction Area A) and at Lot 251 Arber Road crossing (Construction Area B).</p> <p>The construction works are not expected to require the clearing of native vegetation, however some individual plants may be damaged during the construction phase due to vehicle movements, the use of drill rigs and the removal of existing power lines.</p> <p>The relevant works areas (Construction areas A and B) have been inspected by Western Power who will be undertaking all works. Western Power have indicated no clearing is planned, however some minor or incidental damage to individual trees/vegetation or parts thereof may occur.</p>
Specify what the final land use will be after clearing	No change – power supply

5.4 Method

Proposed method of clearing (i.e. burning, cutting, draining, flooding, grazing, mechanical clearing/bulldozing or other – specify)	N/A – no physical clearing is proposed.
---	---

5.5 Timeframe

Period within which you propose to do the clearing (e.g. 1/7/2022 to 30/8/2024)	<p>Start date: Mid June 2023</p> <p>End date: End September 2023</p>
---	--

Note: The clearing referral process is not suitable for any clearing that is expected to take longer than two years.

5.6 Avoidance and mitigation

Explain how you have, or will, put avoidance and mitigation measures in place to eliminate, reduce, or otherwise mitigate the need for and scale of the proposed clearing of native vegetation.

Attach supporting documents to substantiate your explanation.

Your explanation should demonstrate you have planned the project so that the least clearing possible is to be undertaken. The following questions may help you frame your explanation:

- Why did you select this location and amount of clearing?
- What alternatives to clearing – e.g. engineering solutions – did you consider?
- What changes, if any, did you make to the location or amount of clearing to reduce the impacts of the clearing?

Note: If you do not demonstrate adequate efforts to avoid and mitigate clearing, we will ask you to do so during the validation of this form.

Provide the avoidance and mitigation details	<p>As described in Section 5.3, the location of the works has been chosen to avoid the physical clearing of native vegetation, instead targeting previously cleared areas such as the existing tracks and access road and the existing cleared area on the Marriott Road formation.</p> <p>Works will be undertaken with a focus on minimising damage to native vegetation, including accessing the site via existing tracks, and parking on cleared areas. Care will be taken when removing and replacing power poles to minimise the potential for damage to nearby plants.</p> <p>The area has been inspected and surveyed by Western Power to ensure that risks of damage to vegetation can be minimised and to ensure that use of existing disturbed areas is optimised.</p> <p>An example of this is that for Area B, a “dog-leg” is required and has been sited to avoid impacting upon a mature tree present in the vicinity of the existing overhead powerline. No mature trees are anticipated to be cleared as part of this work. However, it is possible that some minor vegetation damage (such as to branches) may inadvertently occur during the works.</p> <p>There is no known <i>Phytophthora</i> dieback in the specific works areas applicable to this referral, however the broader region has occurrences of <i>Phytophthora</i> dieback. Standard dieback management measures will be adhered to by Western Power to avoid the potential spread of <i>Phytophthora</i> Dieback in the work areas. This includes that soil or plant matter will not be transferred to / from the areas via vehicles, machinery, tools and footwear. Vehicles, machinery, tools and footwear will be clean before accessing the area and vehicle movements will be limited only to those required to undertake activities within the areas. The term ‘clean’ means that vehicles, machinery, footwear, and tools are not carrying any clods and/or slurry of soil or plant material. A thin, dry layer of dust or grime is not considered to present a risk and does not need to be removed.</p>

9.1 Environmental impact assessment (Part IV of the EP Act)

Clearing may be referred to the EPA if it is considered to be part of a ‘significant proposal’, as defined by s.37B(1) of the EP Act, or will likely to be part of a larger development. An example is when the clearing is for a road to a future mine.

Section 37B(1) of the EP Act defines a ‘significant proposal’ as “a proposal likely, if implemented, to have a significant effect on the environment”. If a decision-making authority (e.g. DWER or DMIRS) considers the proposal in this form is likely to constitute a ‘significant proposal’, under s.38(5) of the EP Act they must refer the proposal to the EPA or for assessment under Part IV, if such a referral has not already been made.
