INTRODUCTION

Marputu Aboriginal Corporation (**Marputu**) is the Registered Native Title Body Corporate (**RNTBC**) that holds the native title rights and interests on trust for the Gingirana Native Title holders.

On 16 December 2022, a Letter Agreement for heritage monitoring of Project Horizon was fully executed between Vocus Pty Ltd (**Vocus**) and Marputu (**Letter Agreement**). The activities outlined in the Letter Agreement fall within both the Gingirana Determined area (WAD6002/2003) and the Gingirana #4 Claim area (WAD230/2020) (collectively **Gingirana Area**). Marputu is acting as the agent for the Gingirana #4 Native Title Claimants, regarding the matters outlined in the Letter Agreement.

Central Desert Native Title Services (**Central Desert**) provides anthropological, archaeological and administrative services to Marputu and Gingirana #4 in relation to the Letter Agreement. On 14 July 2022 Vocus submitted a Cultural Heritage Field Survey Notice Form (**Work Program**) for Fibre Optic Cable Alignment (**Work Area**) to Central Desert. Subsequently, Central Desert organised a Work Area Survey (**Survey**), in conjunction with Marputu and Gingirana #4 representatives, for the proposed Work Program.

The survey was conducted over two trips. Trip 1 was conducted from 26 to 31 of July 2022 by Consultant Archaeologist Ben Pentz, Consultant Anthropologist Leighton Dudenhoeffer, and nominated Gingirana Representatives. Trip 2 was conducted from 13 to 19 February 2023 by Consultant Archaeologists Jacob Lambert and Matthew Walsh, Consultant Anthropologist Leighton Dudenhoeffer, and nominated Gingirana Representatives.

This report documents the methods and results of the Survey. The Survey was conducted, and this report prepared, in accordance with the Letter Agreement.

COORDINATE PROJECTION AND DATUM

All coordinates provided in this report are in GDA2020 MGA Zone 50. Please note that an error margin of up to 5 metres should be allowed.

PROPOSED WORK PROGRAM

In the Work Program Notification (see APPENDIX 1), Vocus have proposed to undertake Activities within the area outlined in Figure 1. Vocus plans to access the Work Area for the purpose of installing a fibre optic cable with a total lineal length of approximately 146km within the Gingirana Area, as follows:

- Approximately 9km of fibre optic cable will fall within the Gingirana #4 Claim area; and
- Approximately 137km of fibre optic cable will fall within the Gingirana Determined area.

The fibre optic cable will be laid by ploughing a slot into the ground and placing the cable in the slot. Where required, the cable may be laid by trenching or directional drilling.

Equipment, Infrastructure and Vehicles

Not specified in the Work Program provided by Vocus.

Access and Campsite

Not specified in the Work Program provided by Vocus.

Water, Biological or Other Materials

Not specified in the Work Program provided by Vocus.

Timing and Personnel

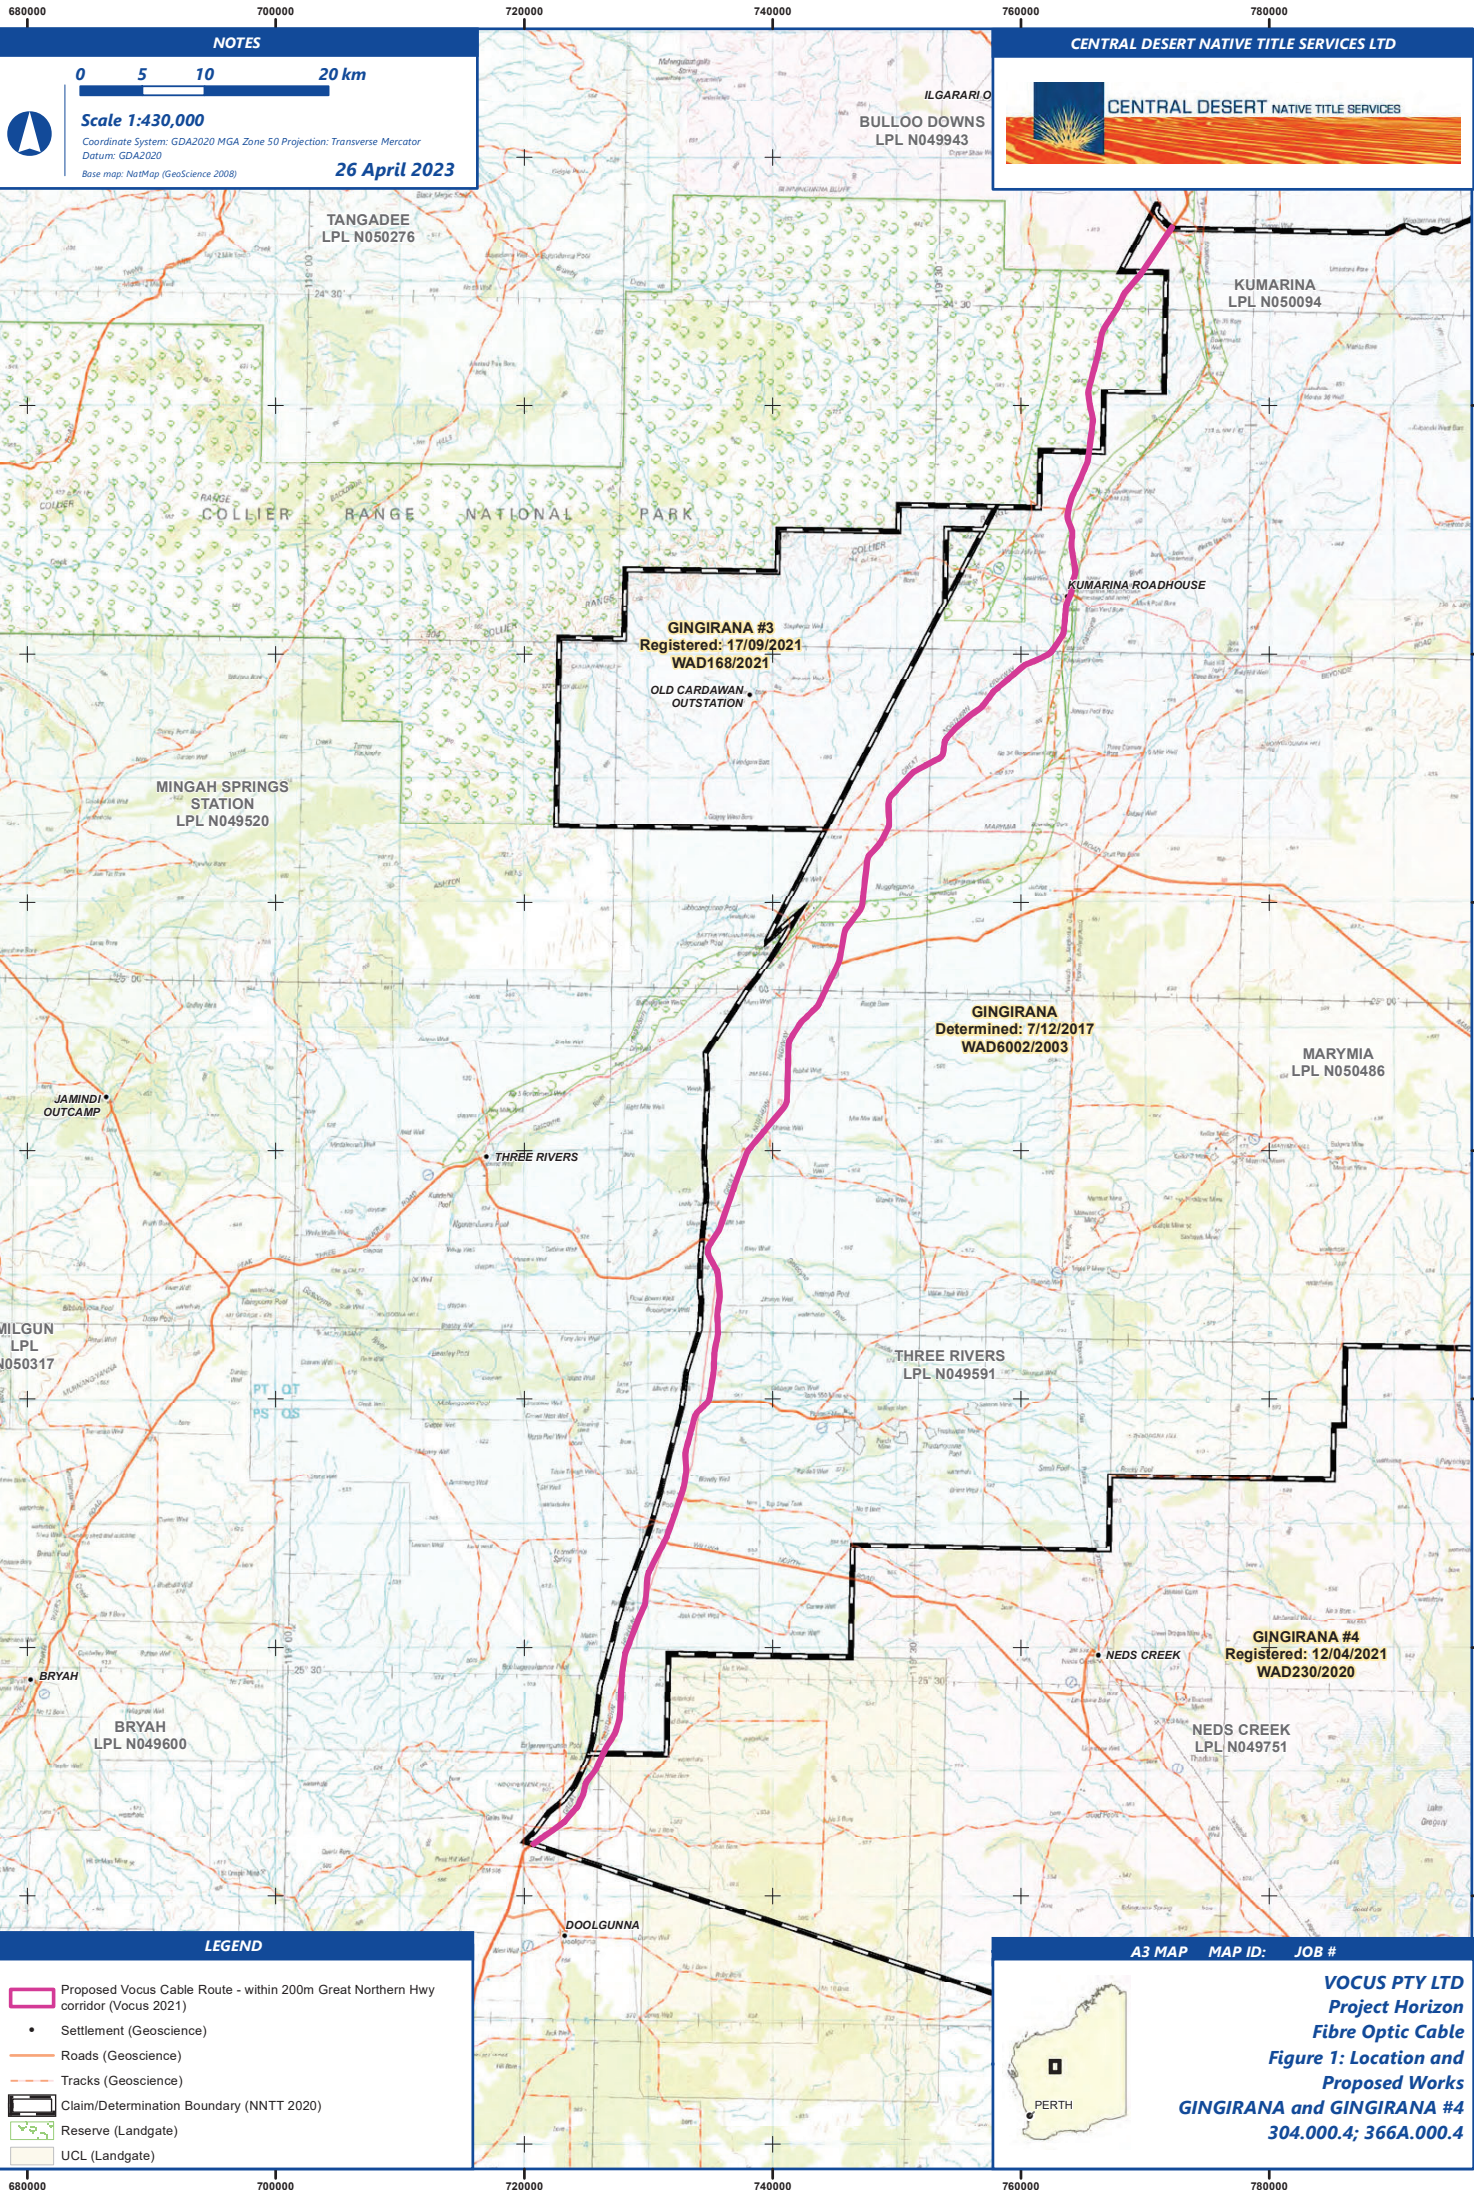

Not specified in the Work Program provided by Vocus.

Restrictions to Access

Transportation arrangements for activity: for safety & land access reasons ensure Traditional Owner Survey Team and Vocus Field team travel together to and from site – Vocus Field team take lead on access.

LOCATION OF PROPOSED WORKS

The Project Area is located along the Great Northern Highway, located approximately 120 km to 250 km south and southwest of Newman, in the Mid-West region of Western Australia (see Figure 1). The Project Area is located within the Gingirana Native Title Determined area (WAD6002/2003) and the Gingirana #4 (WAD230/2020) Native Title Claim area.

SURVEY TEAM

The Survey Team consisted of the following people.

Central Desert

Trip 1

Ben Pentz	Consultant Archaeologist (male); 5 days
Leighton Dudenhoeffer	Consultant Anthropologist (male); 5 days

Trip 2

Jacob Lambert	Consultant Archaeologist (male); 7 days
Matthew Walsh	Consultant Archaeologist (male); 7 days
Leighton Dudenhoeffer	Consultant Anthropologist (male); 7 days

Gingirana Native Title Representatives

Three (3) Representatives of the Gingirana Area, on each trip.

The Survey Team was assisted by:

Vocus

Trip 1

Nick Geyer (male), 4 days
Rod Leemon (male), 5 days

Trip 2

Nick Geyer (male); 7 days

SURVEY METHOD

Introduction

The purpose of the Survey was to identify those areas of the Work Program that are CLEAR areas (i.e., areas that *do not* contain Aboriginal heritage sites and are clear for the proposed activities to occur) and NOT CLEAR areas (i.e., areas that *do* contain Aboriginal heritage sites and are not clear for the proposed activities to occur).

The Survey was undertaken using a Work Area Clearance method. The survey method required the Survey Team to identify any NOT CLEAR areas within the proposed Work Area and determine the extent of any NOT CLEAR area, in order to amend the proposed Work Area and record an agreed alignment for the Activity that avoids the NOT CLEAR areas.

The datum used for all coordinates during this Survey was GDA2020, MGA 50.

Archaeological

The proposed Work Area comprises a 200 m wide corridor, for a length of 146 km, either side of the Great Northern Highway. The archaeological component of the Survey was designed to focus on assessing the portion of the Work Program on the western side of the Great Northern Highway, as this was the preferred location for the fibre optic alignment based on discussions between the Survey Team and Vocus. Pedestrian transects and vehicular inspection were used to survey the western portion of the proposed Work Area. The Survey Team targeted areas for pedestrian transects and inspections that were considered to have high potential for archaeological material. Pedestrian transects were conducted by the consultant archaeologist and/or anthropologist, with two to three Gingirana representatives spaced up to 25 metres apart. Areas considered unlikely to contain archaeological material were assessed from a vehicle, with any areas of potential interest inspected on foot.

Any areas identified by the Survey Team as containing heritage and/or cultural values (i.e., NOT CLEAR areas) were discussed with the Vocus representative/s, in order to determine viable options for installing the fibre optic cable while minimising potential impacts to the heritage and cultural values. In some cases, this involved surveying areas within the eastern portion of the Work Area (i.e., on the other side of the Great Northern Highway), in order to avoid NOT CLEAR areas. In other cases, where NOT CLEAR areas extended across the entire width of Work Area, discussions focused on mitigative measures, such as the use of underground directional drilling (as opposed to trenching) to install the cable.

There are two (2) previously identified Aboriginal heritage sites on the DPLH Register that intersect the Work Area. These two sites were recorded as NOT CLEAR and information was recorded in detail, during the Survey, in order to determine the accurate extent of the sites.

Any other Aboriginal heritage sites identified during the Survey were recorded as NOT CLEAR areas and the information was recorded to a standard sufficient for the places to be avoided and/or for management strategies to be developed.

Ethnographic

Prior to the commencement of the Survey the members of the Survey Team were briefed on the proposed Work Program. The anthropologist and archaeologist explained the

proposed activity and maps of the proposed Work Area were also provided and discussed with the Survey Team, along with a discussion of the archaeological and ethnographic survey methods. The Survey Team agreed to the western side of the proposed 200 m wide corridor for the proposed fibre optic cable.

The survey team travelled together to the southern end of the Work Area. While driving down the Great Northern Highway the anthropologist discussed any potential ethnographic values within the corridor. Given the small size of the Survey Team during trip 1, the anthropologist and archaeologist did not split up and the group remained together, in order to survey some areas on foot and assess others from the vehicles. The Survey Team also visited specific locations within the Work Area that were identified by the Gingirana representatives as having, or potentially having, cultural or heritage values.

The Survey Team regularly discussed the proposed alignment of the fibre optic cable and reviewed the progress and results of the survey throughout the course of each day and in detail at the completion of the survey. Any amendments to the alignment of the fibre optic cable were discussed and agreed with the Survey Team, with input from the Vocus representative/s. During the detailed debrief at the end of the Survey, the Gingirana Native Title Holders stated their satisfaction with the conduct and results of the Survey.

SURVEY PROGRAM RESULTS

Surveyed Areas

The portion of the Work Area on the western side of the Great Northern Highway has been ethnographically and archaeologically surveyed with the Gingirana Native Title Representatives using the methods detailed above (see Figure 3 and the GIS data provided in APPENDIX 2).

Not Cleared Areas

During the Survey, there were twelve (**12**) locations deemed **NOT CLEARED** by the Gingirana Representatives (see Table 1 and Figure 3).

During the Survey, it was agreed that the method for installing the fibre optic cable through any **NOT CLEARED** Areas would be sub-surface directional drilling, in order to avoid any surface ground disturbance within the **NOT CLEARED** Areas.

Unless specified below, or otherwise advised, all pits for the directional drilling through **NOT CLEARED** Areas are to be located in the **CLEARED** Area corridors. For the larger **NOT CLEARED** Areas where this is not possible, specific locations for the pits are provided below and detailed in Table 2 and Figure 3.

Not Surveyed and Cleared with Conditions

During the Survey, the majority of the Work Area on the eastern side of the Great Northern Highway was not surveyed. Several small sections were surveyed when it was necessary to avoid Not Clear areas in the western portion of the Work Area (see Figure 3).

The following areas are **CLEARED with CONDITIONS** (see Figure 3 and Table 2):

- Pits 1 to 5 and associated access tracks, adjacent to Noonyereena Pool;
- Pit 6, on the southern side of the Gascoyne River and Pit 9, on the northern side of the Gascoyne River; and
- Pits 7 and 8 and associated access tracks, adjacent to archaeological heritage sites 23-008 and 23-009

These specific pit locations are within **NOT CLEARED** areas. However, the pits have been approved by the Gingirana representatives for the purpose of directional drilling. This will allow the fibre optic cable to be installed underground and negate the need for trenching, thereby minimising disturbance and impact to the **NOT CLEARED** areas.

Cleared Areas

Subject to the results outlined above, the remainder of the Work Area has been ethnographically and archaeologically **CLEARED**, as per Figure 3, Table 1, Table 2, Table 3 and the GIS data provided in APPENDIX 2.

CONCLUSIONS AND RECOMMENDATIONS

As a result of the Survey, Vocus are advised that:

1. The Work Area has been partially surveyed ethnographically and sampled archaeologically;
2. The majority of the Work Area on the eastern side of the Great Northern Highway was **NOT SURVEYED**;
3. There are twelve **(12) NOT CLEARED** areas as a result of the Survey and these should be avoided by Vocus;
4. There are nine **(9)** pits located within **NOT CLEARED** Areas 4, 6 and 7, that have been **CONDITIONALLY CLEARED** for directional drilling activities, in order to minimise impacts during the installation of the fibre optic cable;
5. Any other pits for directional drilling through the remaining **NOT CLEARED** Areas must be located in the **CLEARED** Areas provided;
6. As outlined in the Results section above and Figure 3a, 3b, 3c: Results (North, Central, South), Table 1, Table 2, Table 3 and APPENDIX 2 the remainder of the Work Program is **CLEARED** for the proposed activities to proceed;
7. In accordance with the Agreement Vocus must confine all Ground Disturbance Activities, to the **CLEARED** and **CONDITIONALLY CLEARED** locations defined in this report and the accompanying spatial data; and
8. The Gingirana Representatives requested that a Heritage Monitoring Team be present during any ground disturbing activities.

APPENDIX 1: Proposed Work Program

Cultural Heritage Field Survey Notice Form

FINAL - CULTURAL HERITAGE PROGRAM BRIEF- INFIELD SURVEY PLANNING NOTICE

In Accordance with – Signed Letter Agreement for heritage monitoring of Project Horizon between Vocus Fibre Pty Ltd (ABN 40 150 260 156) (“Vocus”) and Marputu (Aboriginal Corporation) RNTBC (ICN: 8085) (“Marputu AC”) and Gingirana #4 Native Title Claim Group (WAD 230 of 2020) (“Gingirana #4 Claim Group”) – (the Agreement)

Date Issued: 26th July 2022 (by email) to Agreement Implementation Officer - Central Desert Native Title Services

Start Date for Infield CH Survey:

- **Travel Day for Gingirana CH Team** - 26th July 2022 Travel Day
- **Survey Days** - 27th July to 02nd August 2022

Duration of CH Survey:

- As indicated in CDNTS Invoice:

Traditional Owner Representative Numbers:

- **3 x TO Reps - 2 x Consultant Specialists - 1 x Liaison Officer Total = 6**

Activities:

- **Refer to Schedule 1**

(Description of activities (i.e., clearing of vegetation etc.), Clarify if monitoring/assessment. Identify the location: Proposed construction alignment section (Pilbara/EG/MW))

LOGISTICAL ARRANGEMENTS

Resources that Vocus will coordinate:

- Responsible for the land access and permits to enter the Heritage Assessment Area.
- Provide the following refer to Attachments:

1. *ESRI Shape Files*
2. *Hard Copy Map*

- Ensure the following areas are addressed as a minimum and ensure as much detail is pre-arranged and included in this section:
- Transportation arrangements for activity: for safety & land access reasons ensure Tradition Owner CH Survey Team and Vocus Field team travel together to and from site – Vocus Field team take lead
- Activity location and timings: location and daily in-field rendezvous points
- Weed hygiene – if required (refer to Environmental Management requirements)
- PPE requirements (including First Aid Kit)
- Water requirements subject to environmental conditions for each car
- Communication requirements (Sat phone, UHF SPOT/EPIRB etc.)

MOBILISATION/DEMOBILISATION LOCATION/S PRIOR TO GOING TO SITE:

- **Communication:** Nick Geyer Vocus Rep to Liaise with Murphy Williams (Snr) regarding best daily mobilization points.
- **Date:** 27JUL-02Aug2022 (as per approved invoice)
- **Time:** To be agreed infield.

Inductions infield

- **Safety Briefing:**
 - Vocus Field Team to conduct - Daily Site JSEA/briefing on program and alignment and as required particulars for each day.
- **Cultural Heritage Daily debrief:**
 - At end of each survey field day.

Vehicles, Meals, and approved incidentals:

- In accordance with LTR Agreement –
- Vocus have approved Central Desert Native Title Services detailed quote and invoice
- CDNTS have organized all logistical elements for Gingiranna CH field Team.

Schedule 1 Cultural Heritage Survey of Project Study Area -

The primary objectives of the Heritage Assessment are to:

NB: Conduct Job safety analysis prior to starting each survey day.

Conduct Cultural Heritage Survey and Assessment over the proposed project area:

- Identify, collate, and document information about Aboriginal Cultural Heritage within the Study Area.
- Identify the impacts of Vocus' proposed project related activities on Aboriginal Cultural Heritage in the Study Area.
- Develop management options to avoid, minimise or mitigate the identified impacts in a culturally appropriate requirement; and
 - confirm and record an agreed alignment for the fibre optic cable within the Study Area.
 - Where cultural heritage management is required during construction the management requirement and its details will be confirmed with the Vocus' infield representatives.

Methodology:

- In-field heritage survey work will be undertaken by the Gingiranna Survey Team by way of a foot and/or vehicle method, as agreed by parties.

A comprehensive and systematic heritage survey by the Survey Team to:

- Identify the presence of any Aboriginal Cultural Heritage.
- Assess the likelihood of subsurface cultural material being present in areas where project related activities may take place in the Study Area; and
- Confirm and record a recommended alignment for the fibre optic cable within Study Area.

If in doubt refer to Letter Agreement between Vocus and Gingiranna & Gingiranna # 4 dated: 14th June 2022 (refer to Attachment 2)

ATTACHMENTS

1. *Hard Copy Map*
2. *Letter Agreement date 14th June 2022*
3. *Vocus Field Form*

(ESRI Shape Files (Data) – have been issued to CDNTS)
