

**JO 20250320: North Beach Jetty – Rock Armouring**

Refer to Drawing series D1975 and note the following:

- The red line on the image above represents the top of the rock armouring at 4.0 mAHD
- This will constitute the top of the works with no “Excess Material to be placed and stabilised” unless this is by hand to infill areas between, and devoid of, vegetation.
- Please refer to the related word document which identifies the extent and types of vegetation associated with the green ovals (numbers 1 to 5 from the left)

**Identification of species, by area, North Beach Jetty access rock armouring - JO 20250320 A**

**A:** Spinifex longifolia, Olearia axillaris, Facinia nodosa, Tetragonia decumbens (weed)

Approximate area of cover (including weed species) = 2.90 sq-m

**B:** Spinifex longifolia, Facinia nodosa, Tetragonia decumbens (weed)

Approximate area of cover (including weed species) = 4.11 sq-m

**C:** Spinifex longifolia, Threlkeldia diffusa, Tetragonia decumbens (weed)

Approximate area of cover (including weed species) = 6.69 sq-m

**D:** Spinifex longifolia, Scaevola crassifolia, Tetragonia decumbens (weed)

Approximate area of cover (including weed species) = 5.84 sq-m

**E:** Spinifex longifolia, Scaevola crassifolia

Approximate area of cover (including weed species) = 3.64sq-m

Total area of proposed clearing = 23.18 sq-m = **0.0023 Hectares**
