Referral determination:

The Department of Water and Environmental Regulation has considered the above referral and determined under section 51DA(3) of the *Environmental Protection Act 1986* (the EP Act) that a clearing permit **is required** for the proposed clearing of the areas cross-hatched orange on the attached maps detailed in Schedule 1 (the referral area).

The reason for this determination is that areas within the proposed clearing do not satisfy all of the criteria specified in s.51DA(4) of the EP Act. Specifically:

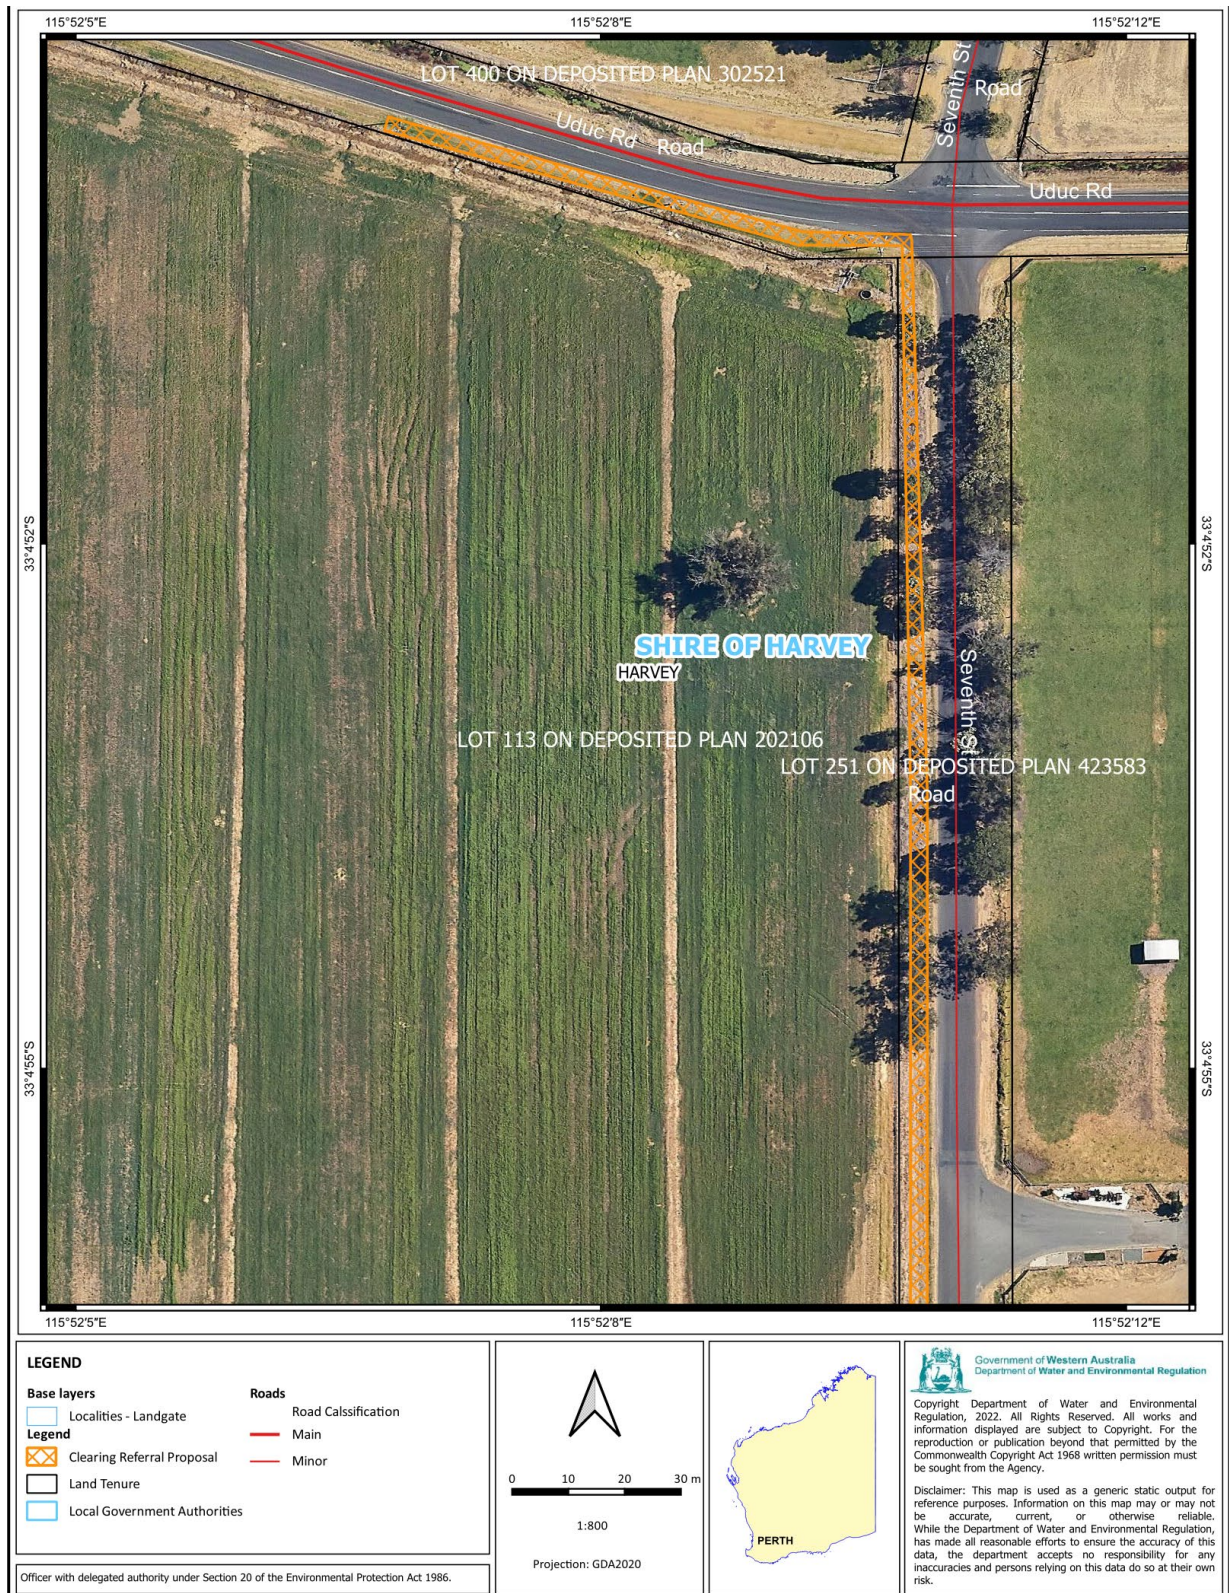

- the referral area is not small relative to the total remaining vegetation within the region in which the area is situated;
- there are issues that would arise as a result of the proposed clearing that are likely to require conditions to manage or mitigate effects on the environment.
