

Department of Energy, Mines, Industry Regulation and Safety

Application for new permit or referral to clear native vegetation

This is the form to submit a referral of proposed clearing or apply for a clearing permit under Part V of the *Environmental Protection Act 1986* (EP Act).

Before you submit this form, please check you have completed all the fields for the form type and fully prepared any required supporting documents (maps etc.). The Department of Water and Environmental Regulation (DWER) or Department of Energy, Mines, Industry Regulation and Safety (DEMIRS) will return/decline any forms that are not correctly completed.

To find out more about the stages of assessment for clearing permit forms, see the *Procedure: Native vegetation clearing permits*.

Part 1 - Form type

Select your <u>form type</u> . Note: Where appropriate in this form, and unless stated otherwise, the terms 'application'	☐ Application fo	oposed clearing (section 51DA of the EP Act) r an area permit (section 51E of the EP Act) r a purpose permit (section 51E of the EP Act)
and 'applicant' also mean 'referral' and 'referrer' respectively.		
Which department are you submitting this form to? If the clearing is for mineral and petroleum activitie authorised under the <i>Mining Act 1978</i> , the various petroleum Acts, and/or a State Agreement with		□ Department of Energy, Mines, Industry
petroleum Acts, and/or a State Agreement with areas covered by either mineral or petroleum tenure granted under one of the abovementioned Acts, select 'Department of Energy, Mines, Industry Regulation and Safety'.		Regulation and Safety Department of Water and Environmental Regulation
For all other clearing activities, select 'Department of Water and Environmental Regulation'.		

Part 2 – Applicant details

2.1 Applicant name

For area	☐ Applying as a	an individual – complete	e the following:
permits: If granted, the	Title	☐ Mr ☐ Mrs ☐ Ms	□ Other:
name(s) of (all) landowner(s) will be listed as	Name(s)		
'permit holders' on the permit.	△ Applying as a following:	a body corporate or oth	ner entity formed at law – complete the
For purpose permits:	Name	Serenitas Communiti	es Holdings Pty Ltd
If granted, the name(s) of (all)	Australian Con	mpany Number (ACN)	626 227 316
applicant(s) will go on the permit.		a government entity (e.q thority, or other statutor	g. government department, local ry body)
	Name		
			•

		l

Part 3 - Land details

- You must accurately describe the location of the land where your clearing is proposed.
- Provide copies of associated documents registered against the Certificate of Title (limitations, interests, encumbrances or notifications) where the clearing may impact them (i.e. caveats within freehold Lots).
- If you have a large number of properties, please provide the relevant details for each property in a separately attached supporting document.

I have a large number of properties and have given the relevant details in an attached supporting document.	□ Yes – skip to Part 4	⊠ No
11 3		

If 'No' - complete the following:

Land description Provide the following details, as applicable, for all properties: - volume and folio number - lot or location number(s) - crown lease or reserve number - pastoral lease number - mining tenement number	Mandurah Road Re Lot 1 (No. 851) Mar Volume: 1385, Folio Diagram #: 1/D2750	ndurah Road, Ba o: 81	
Street address – Line 1			
Street address – Line 2			
Suburb			
State		Postcode	
Local government area(s)	City of Rockingham		

Land zoning Lot 1 is 'Rural'	Land zoning	Mandurah Road Reserve is 'Other Regional Roads' Lot 1 is 'Rural'
-------------------------------	-------------	--

Part 4 – Relationship to landowner

Tell us which of the following options best describes you as the person completing and submitting this form. If you are filling out this form on behalf of the applicant, answer this question as though you are the applicant.

Proof of ownership may include:

- · a certificate of title
- · a pastoral or mining lease
- · public authority that has care, control or management of the land
- other form of lease, land tenure or specific arrangement.

Relationship to landowner (select one of the following options)	Complete the following
☐ I am the landowner	□ Attach proof of ownership
□ I am lodging a form on behalf of the landowner (e.g. a consultant)	
☐ I am acting on the landowner's behalf and will be jointly responsible for the clearing permit (i.e. joint form)	☐ Attach proof of ownership ☐ Attach a letter, in which the landowner authorises you to act on their behalf and acknowledge they will be jointly responsible for the clearing permit
☐ I am likely to become the landowner	☐ Attach evidence of the pending transfer of ownership, including details of current proprietor on certificate of title, and/or contract of sale ('offer and acceptance')
☐ I will undertake the clearing activities with the landowner's authority and will be the permit holder	☐ Attach proof of ownership ☐ Attach a letter, in which the landowner authorises you to access and clear native vegetation within the property(ies) as detailed in section 3.1 (if the applicant is not the landowner)
☐ I am a person with multiple land parcels within which clearing is proposed	☐ Attach proof of ownership and/or ☐ Attach letters, in which the landowner authorises you to access and clear native vegetation within the properties as detailed in section 3.1 (if the applicant is not the landowner)
☐ I will undertake the clearing activities through the exercise of power conferred by different legislation (e.g. the <i>Energy Operators (Powers) Act 1979</i>)	☐ Provide relevant legislative details:

Part 5 - Proposed clearing

5.1 Maps and/or spatial data

Select which map type(s) you will attach with your form.

Note: DWER/DEMIRS will decline/return forms (as applicable) if you do not provide sufficient information for this question.

☐ An ESRI shapefile with the following properties (preferred)

- Geometry type: polygon shape
- Coordinate system: Geocentric Datum of Australia (GDA) 2020 (geographic latitude/longitude)
- Datum: GDA 2020

☑ An aerial photograph or map with a north arrow, clearly marking the proposed clearing area

Note:

- An ESRI shapefile must use one of the following filename extensions: .shp, .shx, .dbf, and/or .prj
- You must provide an ESRI shapefile if the form requires an assessment under an Environment Protection and Biodiversity Conservation Act 1999 (Cth) (EPBC Act) accredited process. See Part 8 of this form for more information.

5.2 Size

- If you propose to clear a patch(es) of vegetation, enter a hectare value for the total size of the area (mark number of trees as zero). For example, "clearing of 5 hectares".
- If you propose to clear only individual trees (i.e. the shrubs, grasses, groundcover plants will remain intact), provide the number of trees. For example, "clearing of 10 trees". If any shrubs, grasses, and/or groundcover plants may be damaged in the clearing process, enter the total area only.
- If you propose to clear an area of native vegetation within a larger footprint, enter the
 hectare value for the total size of the area to be cleared (mark number of trees as zero)
 and the size of the footprint. For example, 5 hectares of clearing within a 10-hectare
 footprint. This option is only available for purpose permit applications.
- Enter values for **both** number of trees and the size of the area **only if** you are clearing individual trees in one area **and** a patch of vegetation in a different area.
- Please note the following area conversions/calculations:

1 hectare = 10,000 m² Area of circle = 3.14 x radius² 1 acre = 0.4 hectares/4,000 m² Area of a rectangle = length x width

1 tree = 0.01 hectares/100 m² Area of a triangle = ½ length x perpendicular height

Total area of clearing proposed (hectares)	Most likely none, but up to 230m2 revised to 0.077ha during asses	sment
Footprint of clearing (hectares) (purpose permit only)	Most likely none but up to 230m2	
Number of individual trees to be cleared	Most likely none	

Note: Calculate the area of a tree based on the area encompassed by the tree's drip line; that being the outermost circumference of the tree's canopy.

5.3 Purpose

Provide the reason for proposed clearing (e.g. road construction, grazing and pasture, hazard reduction, horticulture, timber harvesting etc.).

If applicable, provide any additional project overview or explain in detail the activities on the property (e.g. provide context of work proposed and describe how clearing will contribute to overall work activities onsite etc.). Western Power intends to install a new underground electricity conductor in the road reserve of Mandurah Road adjacent to the western boundary of Lot 1 (No. 851)

Mandurah Road, Baldivis, over a distance of approximately 260m, then for a further 30m into the south west corner of Lot 1. The purpose of the new conductor is to upgrade the power supply to the Tuart Lakes residential village located on Lot 1, which is in the ownership of Serenitas Communities Holdings Pty Ltd.

The intended installation method is to use underground drilling to install two conduits of 150mm diameter at a depth of approximately 750 mm below ground surface.

The Western Power alignment for this service has utilized the existing track area as much as possible. The central and northern portion consists of weeds and grasses with some low regrowth of Acacia saligna in scattered locations as well as common dead acacia trees. The condition of this area is degraded to completely degraded. The southern portion is a landscaped front entry to the lifestyle village (mostly grass & some shrubs) with one early mature Tuart tree, which is too young to have developed hollows.

The portion within Lot 1 comprises planted landscape shrubs, part of the entry statement to the development.

Installation of the underground conduits is not expected to harm the scattered low stature acacia trees.

Whilst Western Power applies vegetation clearing avoidance processes, in certain instances, unknown at this time, subsurface conditions may require limited areas of clearing. It is considered unlikely the Tuart tree would be cleared as part of these works.

Further, mature Tuart trees are known to rely on an extensive shallow root system which radiates away from the trunk and enables moisture and nutrient harvesting from the very shallow soil profile. Drilling to establish two 150mm conduits at a depth of 750mm in the vicinity of this single tree would not be expected to pose a risk to the health of this

		tree.
		There are no significant vegetation or flora values which could be lost by limited vegetation clearing.
Specify what the final land use will be after clearing		ng Road reserve and land within the Tuart Lakes Residential Village as per current land uses.
5.4 Method		
Proposed method of clearing (i.e. burning, cutting, draining, flooding, grazing, mechanical clearing/bulldozing or other – specify)		If required, any clearing will be done by mechanical clearing and or pruning.
5.5 Timeframe		
Period within which you propose to do the clearing (e.g. 1/7/2022 to 30/8/2024)		Start date: December 2025 or a few months later over an approximate 1-month installation period
		End date:
Note: The clearing referral process is not suitable for any clearing that is expected to take longer than two years.		
5.6 Pre-application	scopina

☐ I have not had a pre-application meeting with DWER/DEMIRS. I understand that this may increase the likelihood of requests for further information and/or delays in assessment.
□ No – proceed to next question.

Part 6 - Mitigation hierarchy

6.1 Avoidance and mitigation

Explain how you have, or will, put avoidance and mitigation measures in place to eliminate, reduce, or otherwise mitigate the need for and scale of the proposed clearing of native vegetation.

Attach supporting documents to substantiate your explanation.

Your explanation should demonstrate you have planned the project so that the least clearing possible is to be undertaken. The following questions may help you frame your explanation:

- Why did you select this location and amount of clearing?
- What alternatives to clearing e.g. engineering solutions did you consider? (Attach design drawings where applicable)
- What changes, if any, did you make to the location or amount of clearing to reduce the impacts of the clearing?

Note: If you do not demonstrate adequate efforts to avoid and mitigate clearing, DWER/DEMIRS will ask you to do so during the validation of this application. Offsets will only be considered by DWER/DEMIRS as a last resort, once avoidance and minimisation measures have been clearly demonstrated.

Provide the avoidance details (e.g. retention of vegetation on property)	Western Power applies a vegetation clearance avoidance strategy in the process of planning for infrastructure installation. The application of this approach has resulted in the decision to use underground tunnelling to install the new conductors. Also, the works alignment has utilized cleared tracks as much as possible. The installation of two 150mm diameter conduits at a depth of 750mm below ground level is not expected to cause any significant risk to existing flora and fauna as current values are negligible.
Provide the mitigation details (e.g. management of weed spread, rehabilitation)	

6.2 Offsets

Do you want to submit a clearing offset proposal with your form?	□ Yes ⊠ No
If 'Yes' – please complete and attach Appendix A of the <u>Clearing</u> of native vegetation offsets procedure guideline as a supporting	☐ Appendix A attached

document for your form.			
Part 7 – Surveys for assessments (IBSA and IMSA)			
Do you want to submit marine or biodiversity surveys in support of your form?	☐ Yes ⊠	No – skip to Part 8	
7.1 Biodiversity surveys			
If you want to submit any biodiversity surveys to support this form, you must follow the Environmental Protection Authority's (EPA) <u>Instructions for the preparation of data packages for the Index of Biodiversity Surveys for Assessments</u> (IBSA). If you do not meet the IBSA requirements, DWER/DEMIRS will decline/return your form.			
Please provide the IBSA number(s) – or submission number(s) if the IBSA number has not yet been issued – in the space provided. Note that a submission number is not confirmation that a biodiversity survey has been accepted and is not the same as an IBSA number. IBSA numbers are only issued once a survey has been accepted. Once an IBSA number is issued, please notify DWER/DEMIRS. Please note DWER/DEMIRS will suspend the assessment timeframes for your application until you provide the IBSA number(s).			
Have you submitted all the biodiversity surveys that support this form to the <u>Index of Biodiversity Surveys for Assessment</u> ?		s t applicable	
Provide an IBSA number (preferred) or a submission number(s)			
7.2 Marine surveys If you want to submit any marine surveys to support this form, you must follow the EPA's Instructions for the preparation of data packages for the Index of Marine Surveys for Assessments (IMSA). If you do not meet the IMSA requirements, DWER/DEMIRS will decline/return your form.			
Have you prepared all the marine surveys that support this form in accordance with the EPA's Instructions for the preparation of data packages for the Index of Marine Surveys for Assessments?		□ Yes ⊠ Not applicable	
Part 9 _ Assessment hilatoral agreement			

Part 8 – Assessment bilateral agreement

The native vegetation clearing processes under Part V of the EP Act have been accredited by the Commonwealth of Australia under the EPBC Act and so can be assessed under an assessment bilateral agreement.

To be assessed this way, the proposed clearing action must have been referred to the Commonwealth under the EPBC Act and deemed a 'controlled action' before you submit this form. DWER/DEMIRS will decline to deal with your application without the proposed clearing first being deemed a controlled action.

Do you want your proposed clearing action assessed in accordance with, or under, an EPBC Act Accredited Process, such as the assessment bilateral agreement or accredited assessment?	□ Yes ⊠ No – skip to P	°art 9
Is your proposed clearing a controlled action? If 'Yes', please make sure you have entered all the mandatory details in the Annex C7 form	*	m attached EMIRS cannot assess the an EPBC Act Accredited Process)
List the controlling provisions identified in the notification of the controlled action decision		

Part 9 – Other approvals

9.1 Environmental impact assessment (Part IV of the EP Act)

Clearing may be referred to the EPA if it is considered to be part of a 'significant proposal', as defined by section 37B(1) of the EP Act, or will likely to be part of a larger development. An example is when the clearing is for a road to a future mine.

Section 37B(1) of the EP Act defines a 'significant proposal' as "a proposal likely, if implemented, to have a significant effect on the environment". If a decision-making authority (e.g. DWER/DEMIRS) considers the proposal in this form is likely to constitute a 'significant proposal', under section 38(5) of the EP Act they must refer the proposal to the EPA under Part IV, if such a referral has not already been made.

Has the proposed clearing or any related matter been referred to	□ Yes Enter details:		
the EPA?	No − complete question below.		
If 'No' – do you intend to refer the proposal to the	☐ Yes – intend to refer (proposal is a 'significant proposal') ☐ Yes – intend to refer (proposal will require a section 45C amendment to		
EPA?	the current Ministerial Statement) No – a current valid Ministerial Statement applies		

Enter M	inisterial Statemer	nt number:			
□ No – not a significant proposal					
9.2 Other approvals – works approval, licence or registration (Part V Division 3 of the EP Act)					
Have you applied or do you into works approval, licence, registry amendment to any of the above Division 3 of the EP Act? It is an offence to perform any a cause a premises to become a premises of a type listed in Schene Environmental Protection Regulumless that action is done in action works approval, licence or regist guidance, see DWER's Proceed premises works approvals and Guideline: Industry regulation of	ation or an e, under Part V action that would prescribed ledule 1 of the lations 1987, cordance with a stration.
