5.2 Size

- If you propose to clear a patch(es) of vegetation, enter a hectare value for the total size of the area (mark number of trees as zero). For example, “clearing of 5 hectares”.
- If you propose to clear only individual trees (i.e. the shrubs, grasses, groundcover plants will remain intact), provide the number of trees. For example, “clearing of 10 trees”. If any shrubs, grasses, and/or groundcover plants **may** be damaged in the clearing process, enter the total area only.
- If you propose to clear an area of native vegetation within a larger footprint, enter the hectare value for the total size of the area to be cleared (mark number of trees as zero) and the size of the footprint. For example, 5 hectares of clearing within a 10-hectare footprint. This option is only available for purpose permit applications.
- Enter values for **both** number of trees and the size of the area **only if** you are clearing individual trees in one area **and** a patch of vegetation in a different area.
- Please note the following area conversions/calculations:

1 hectare = 10,000 m²

1 acre = 0.4 hectares/4,000 m²

1 tree = 0.01 hectares/100 m²

Area of circle = 3.14 x radius²

Area of a rectangle = length x width

Area of a triangle = ½ length x perpendicular height

Total area of clearing proposed (hectares)	0.045 ha
Footprint of clearing (hectares) (purpose permit only)	
Number of individual trees to be cleared	

Note: Calculate the area of a tree based on the area encompassed by the tree’s drip line; that being the outermost circumference of the tree’s canopy.

5.3 Purpose

<p>Provide the reason for proposed clearing (e.g. road construction, grazing and pasture, hazard reduction, horticulture, timber harvesting etc.).</p> <p>If applicable, provide any additional project overview or explain in detail the activities on the property (e.g. provide context of work proposed and describe how clearing will contribute to overall work activities onsite etc.).</p>	<p>The proposed clearing is required to provide Western Power with access to replace and/or upgrade above-ground electrical power transmission infrastructure along Boys Home Road. Upgrades are required to support approved subdivision works within the adjacent Coolangatta industrial estate and are listed as a condition of subdivision.</p> <p>The proposed clearing is located within an existing road verge/ Western Power powerline transmission line easement.</p>
<p>Specify what the final land use will be after clearing</p>	<p>Road verge/ transmission line easement (no change).</p> <p>The greater lot is to be developed for general industrial use.</p>

5.4 Method

<p>Proposed method of clearing (i.e. burning, cutting, draining, flooding, grazing, mechanical clearing/bulldozing or other – specify)</p>	<p>Mechanical clearing</p>

5.5 Timeframe

<p>Period within which you propose to do the clearing (e.g. 1/7/2022 to 30/8/2024)</p>	<p>Start date: 17 March 2026 End date: 17 March 2027</p>
--	--

Note: The clearing referral process is not suitable for any clearing that is expected to take longer than two years.

5.6 Pre-application scoping

Historic clearing of native vegetation in the Swan Coastal Plain and Avon Wheatbelt [Interim Biogeographic Regionalisation for Australia](#) (IBRA) bioregions has been extensive.

DWER/DEMIRS strongly recommends a pre-application meeting if you propose to clear native vegetation within these bioregions.

<p>Do you propose to clear native vegetation within the Swan Coastal Plain or Avon Wheatbelt bioregions?</p>	<p><input type="checkbox"/> Yes – complete section below</p> <p><input type="checkbox"/> I have had a pre-application meeting with DWER/DEMIRS</p> <table border="1" data-bbox="488 1701 1380 1843"> <tr> <td data-bbox="493 1711 724 1843"> <p>Insert date of meeting and officer name(s):</p> </td> <td data-bbox="724 1711 1380 1843"></td> </tr> </table> <p><input type="checkbox"/> I have contacted DWER/DEMIRS in relation to a pre-application meeting and been advised that a meeting is unnecessary in this</p>	<p>Insert date of meeting and officer name(s):</p>

Part 6 – Mitigation hierarchy

6.1 Avoidance and mitigation

Explain how you have, or will, put avoidance and mitigation measures in place to eliminate, reduce, or otherwise mitigate the need for and scale of the proposed clearing of native vegetation.

Attach supporting documents to substantiate your explanation.

Your explanation should demonstrate you have planned the project so that the least clearing possible is to be undertaken. The following questions may help you frame your explanation:

- Why did you select this location and amount of clearing?
- What alternatives to clearing – e.g. engineering solutions – did you consider? (Attach design drawings where applicable)
- What changes, if any, did you make to the location or amount of clearing to reduce the impacts of the clearing?

Note: If you do not demonstrate adequate efforts to avoid and mitigate clearing, DWER/DEMIRS will ask you to do so during the validation of this application. Offsets will only be considered by DWER/DEMIRS as a last resort, once avoidance and minimisation measures have been clearly demonstrated.

<p>Provide the avoidance details (e.g. retention of vegetation on property)</p>	<p>Western Power have advised that all other constraints have been considered and clearing was deemed the most significant impact. Methods to avoid and minimise clearing during the design phase included:</p> <ol style="list-style-type: none"> 1. Placement of laydown areas, turnarounds etc. in previously cleared land 2. Utilisation of existing access tracks where possible 3. Restriction of works to existing maintenance zone where possible 4. Utilisation of pruning instead of clearing where possible 5. Utilisation of farmer’s paddocks and previously cleared areas where possible 6. Undergrounding of cables and drilling instead of trenching 7. Selection of joint and entry/exit hole locations to avoid clearing of (high value) vegetation 8. Helicopter installation instead of ground work 9. Early and continual engagement with Western Power environment team to highlight proposed risks and avoid where possible
---	---

	<p>10. Using larger line spans that can span over vegetation</p> <p>11. Using structures with smaller footprints</p> <p>12. Implementing lower impact clearing methodologies, for example hand clearing instead of mechanical clearing.</p> <p>Eco Logical Australia (ELA) personnel conducted a site visit on 16/02/2026 to assess the vegetation in the clearing area and identify any environmental values. Photos and a short letter detailing findings from this site visit are included in Attachment 3.</p> <p>ELA found that ecological values associated with the clearing area were low. All or most of the native vegetation appears to have been planted and no other significant environmental values were identified.</p>
Provide the mitigation details (e.g. management of weed spread, rehabilitation)	<p>Consideration of mitigation by Western Power is detailed above.</p> <p>The clearing area is partially cleared with a high existing weed presence, predominantly African lovegrass (<i>Eragrostis curvula</i>). Works are considered unlikely to significantly increase the existing weed burden.</p> <p>No fill will be brought into the clearing area, minimising Dieback risk.</p> <p>Due to the small scale of clearing, short timeframe, and presence within an existing cleared easement, dust and erosion are not considered likely to be an issue.</p>

6.2 Offsets

Do you want to submit a clearing offset proposal with your form?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
If 'Yes' – please complete and attach Appendix A of the Clearing of native vegetation offsets procedure guideline as a supporting document for your form.	<input type="checkbox"/> Appendix A attached

If you do not meet the IBSA requirements, DWER/DEMIRS will decline/return your form.

Please provide the IBSA number(s) – or submission number(s) if the IBSA number has not yet been issued – in the space provided. Note that a submission number is not confirmation that a biodiversity survey has been accepted and is not the same as an IBSA number. IBSA numbers are only issued once a survey has been accepted. Once an IBSA number is issued, please notify DWER/DEMIRS. Please note DWER/DEMIRS will suspend the assessment timeframes for your application until you provide the IBSA number(s).

Part 8 – Assessment bilateral agreement

The native vegetation clearing processes under Part V of the EP Act have been accredited by the Commonwealth of Australia under the EPBC Act and so can be assessed under an assessment bilateral agreement.

To be assessed this way, the proposed clearing action must have been referred to the Commonwealth under the EPBC Act and deemed a '**controlled action**' before you submit this form. DWER/DEMIRS will decline to deal with your application without the proposed clearing first being deemed a controlled action.

For further information, see DWER's [guidance on the assessment bilateral agreement](#).

Part 9 – Other approvals

9.1 Environmental impact assessment (Part IV of the EP Act)

Clearing may be referred to the EPA if it is considered to be part of a 'significant proposal', as defined by section 37B(1) of the EP Act, or will likely to be part of a larger development. An example is when the clearing is for a road to a future mine.

Section 37B(1) of the EP Act defines a 'significant proposal' as "a proposal likely, if implemented, to have a significant effect on the environment". If a decision-making authority (e.g. DWER/DEMIRS) considers the proposal in this form is likely to constitute a 'significant proposal', under section 38(5) of the EP Act they must refer the proposal to the EPA under Part IV, if such a referral has not already been made.
