### 5.2 Size

- If you propose to clear a patch(es) of vegetation, enter a hectare value for the total size of the area (mark number of trees as zero). For example, “clearing of 5 hectares”.
- If you propose to clear only individual trees (i.e. the shrubs, grasses, groundcover plants will remain intact), provide the number of trees. For example, “clearing of 10 trees”. If any shrubs, grasses, and/or groundcover plants **may** be damaged in the clearing process, enter the total area only.
- If you propose to clear an area of native vegetation within a larger footprint, enter the hectare value for the total size of the area to be cleared (mark number of trees as zero) and the size of the footprint. For example, 5 hectares of clearing within a 10-hectare footprint. This option is only available for purpose permit applications.
- Enter values for **both** number of trees and the size of the area **only if** you are clearing individual trees in one area **and** a patch of vegetation in a different area.
- Please note the following area conversions/calculations:

1 hectare = 10,000 m <sup>2</sup>	Area of circle = 3.14 x radius <sup>2</sup>
1 acre = 0.4 hectares/4,000 m <sup>2</sup>	Area of a rectangle = length x width
1 tree = 0.01 hectares/100 m <sup>2</sup>	Area of a triangle = ½ length x perpendicular height

Total area of clearing proposed (hectares)	<b>0.0246</b>
Footprint of clearing (hectares) (purpose permit only)	
Number of individual trees to be cleared	<b>15 trees - confirmed during validation</b>

Note: Calculate the area of a tree based on the area encompassed by the tree’s drip line; that being the outermost circumference of the tree’s canopy.

### 5.3 Purpose

Provide the reason for proposed clearing (e.g. road construction, grazing and pasture, hazard reduction, horticulture, timber harvesting etc.).  If applicable, provide any additional project overview or explain in detail the activities on the property (e.g. provide context of work proposed and describe how clearing will contribute to overall work activities onsite etc.).	To facilitate the construction of underground electrical infrastructure connection by Western Power, for a new property subdivision.
Specify what the final land use will be after clearing	Residential / Electricity Easement

### 5.4 Method

Proposed method of clearing (i.e. burning, cutting, draining, flooding, grazing, mechanical clearing/bulldozing or other – specify)	Cutting / Mechanical Clearing
---	-------------------------------

### 5.5 Timeframe

Period within which you propose to do the clearing (e.g. 1/7/2022 to 30/8/2024)	Start date: 1/6/2026 End date: 14/6/2026
---	---

Note: The clearing referral process is not suitable for any clearing that is expected to take longer than two years.

### 5.6 Pre-application scoping

Historic clearing of native vegetation in the Swan Coastal Plain and Avon Wheatbelt [Interim Biogeographic Regionalisation for Australia](#) (IBRA) bioregions has been extensive.

DWER/DMPE strongly recommends a pre-application meeting if you propose to clear native vegetation within these bioregions.

Do you propose to clear native vegetation within the Swan Coastal Plain or Avon Wheatbelt bioregions?	<input type="checkbox"/> Yes – complete section below	
	<input type="checkbox"/> I have had a pre-application meeting with DWER/DMPE	
	Insert date of meeting and officer name(s):	
	<input type="checkbox"/> I have contacted DWER/DMPE in relation to a pre-application meeting and been advised that a meeting is unnecessary in this case.	
	Insert date of conversation and officer name(s):	

	<input type="checkbox"/> I have not had a pre-application meeting with DWER/DMPE. I understand that this may increase the likelihood of requests for further information and/or delays in assessment.  <input checked="" type="checkbox"/> No – proceed to next question.

## Part 6 – Mitigation hierarchy

### 6.1 Avoidance and mitigation

Explain how you have, or will, put avoidance and mitigation measures in place to eliminate, reduce, or otherwise mitigate the need for and scale of the proposed clearing of native vegetation.

Attach supporting documents to substantiate your explanation.

Your explanation should demonstrate you have planned the project so that the least clearing possible is to be undertaken. The following questions may help you frame your explanation:

- Why did you select this location and amount of clearing?
- What alternatives to clearing – e.g. engineering solutions – did you consider? (Attach design drawings where applicable)
- What changes, if any, did you make to the location or amount of clearing to reduce the impacts of the clearing?

Note: If you do not demonstrate adequate efforts to avoid and mitigate clearing, DWER/DMPE will ask you to do so during the validation of this application. Offsets will only be considered by DWER/DMPE as a last resort, once avoidance and minimisation measures have been clearly demonstrated.

Provide the avoidance details (e.g. retention of vegetation on property)	<p>Clearance restricted only to required underground cable path and construction zone / access required</p> <p>Keeping alignment of cable path to existing disturbed track as much as possible may reduce clearance area further – dependent on Western Power requirements.</p> <p>Other vegetation will be retained in the vicinity.</p>
Provide the mitigation details (e.g. management of weed spread, rehabilitation)	<p>Alignment of the underground electrical infrastructure along an existing disturbed track may allow for a further reduction of the proposed clearing area – the 0.0246 ha is the maximum area anticipated.</p> <p>Works will be undertaken as per an Environmental Management Plan (EMP) developed for the subdivision project – see Appendix F of Exemption Letter.</p>

### 6.2 Offsets

Do you want to submit a clearing offset proposal with your form?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No

If you do not meet the ISA requirements, DWER/DMPE will decline/return your form.

Please provide the ISA number(s) in the space provided. Please note DWER/DMPE will suspend the assessment timeframes for your application until the biodiversity or marine surveys are accepted by ISA.

If 'Yes' – please provide the ISA number(s) and/or any relevant existing IBSA/IMSA numbers	

## Part 8 – Assessment bilateral agreement

The native vegetation clearing processes under Part V of the EP Act have been accredited by the Commonwealth of Australia under the EPBC Act and so can be assessed under an assessment bilateral agreement.

To be assessed this way, the proposed clearing action must have been referred to the Commonwealth under the EPBC Act and deemed a '**controlled action**' before you submit this form. DWER/DMPE will decline to deal with your application without the proposed clearing first being deemed a controlled action.

For further information, see DWER's [guidance on the assessment bilateral agreement](#).

## Part 9 – Other approvals

### 9.1 Environmental impact assessment (Part IV of the EP Act)

Clearing may be referred to the EPA if it is considered to be part of a 'significant proposal', as defined by section 37B(1) of the EP Act, or will likely to be part of a larger development. An example is when the clearing is for a road to a future mine.

Section 37B(1) of the EP Act defines a 'significant proposal' as "a proposal likely, if implemented, to have a significant effect on the environment". If a decision-making authority (e.g. DWER/DMPE) considers the proposal in this form is likely to constitute a 'significant proposal', under section 38(5) of the EP Act they must refer the proposal to the EPA under Part IV, if such a referral has not already been made.
