

## CLEARING REFERRAL DETERMINATION NOTICE

### Referral details

Referral number:	REF 11551/1
Referral submitted by:	Abby Blazic Jordan Blazic
Purpose of proposed clearing:	Hazard reduction
Location of proposed clearing:	Lot 142 on Deposited Plan 427752
Locality:	Ginginup
Clearing size:	0.215 hectares

### Referral determination:

The Department of Water and Environmental Regulation has considered the above referral and determined under section 51DA(3) of the *Environmental Protection Act 1986* (the EP Act) that a clearing permit **is required** for the proposed clearing of the cross-hatched orange area on the attached map detailed in Schedule 1 (the referral area).

The reason for this determination is that the proposed clearing does not satisfy all of the criteria specified in s.51DA(4) of the EP Act. Specifically:

- There are known or likely significant environmental values identified within the referral area;
- The state of scientific knowledge about vegetation within the region in which the referral area is situated is not adequate; and
- There are issues that would arise as a result of the proposed clearing that are likely to require conditions to manage or mitigate effects on the environment.
