Referral determination:

The Department of Water and Environmental Regulation has considered this referral and determined under section 51DA(3) of the *Environmental Protection Act 1986* (the EP Act) that a clearing permit is required for the proposed clearing of the areas cross-hatched orange on the attached maps A-K detailed in Schedule 1.

The reason for this determination is that the proposed clearing does not satisfy all of the criteria specified in s.51DA(4) of the EP Act. For example:

- the area proposed to be cleared (the area) is **not** small relative to the total remaining vegetation within the region in which the area is situated,
- there are known or likely significant environmental values identified within the area, and
- there are issues that would arise as a result of the proposed clearing that are likely to require conditions to manage or mitigate effects on the environment.
