

## CLEARING REFERRAL DETERMINATION NOTICE

### Referral details

REF number:	REF 9605/1
Referral submitted by:	EII Gas Transmission Service WA (Operations) Pty Ltd
Purpose of proposed clearing:	Gas pipeline maintenance
Size of Proposed Clearing	0.0015 hectares
Location of proposed clearing:	Pipeline Licence (PL) 60

### Referral determination

The Department of Mines, Industry Regulation and Safety has considered this referral and determined under section 51DA(3) of the *Environmental Protection Act 1986* (the EP Act) that:

a clearing permit is not required for the proposed clearing of the area cross-hatched green on the attached map detailed in Schedule 1.

The reason for this determination is that the proposed clearing satisfies all of the criteria specified in section 51DA(4) of the EP Act. Specifically:

- the area proposed to be cleared (the area) is small relative to the total remaining native vegetation —
  - within the region in which the area is situated, and
  - of the ecological community of which the native vegetation proposed to be cleared forms part, and
- there are no known or likely significant environmental values identified within the area
- the state of scientific knowledge about native vegetation within the region in which the area is situated is adequate, and
- there are no issues that would arise as a result of the proposed clearing that are likely to require conditions to manage or mitigate effects on the environment.

Please note that this determination is valid only until the expiration date specified above. After this date, you will need to submit a new clearing referral or apply for a clearing permit before undertaking further clearing of native vegetation.
