### 5.2 Size

- If you propose to clear a patch(s) of vegetation, enter a hectare value for the total size of the area (mark number of trees as zero).
- If you propose to remove only individual trees from the area(s) (i.e. the shrubs, grasses, groundcover plants will remain intact), provide the number of trees (and mark total area as estimated hectares).  
Note: If any shrubs, grasses, and/or groundcover plants MAY be damaged in the clearing process, add this to the total area.
- If you propose to clear an area of vegetation within a larger footprint, enter the hectare value for the total size of the area to be cleared (mark number of trees as zero) and the size of the footprint. For example, 5 hectares of clearing within a 10 hectare footprint. This option is only available for **purpose permit** applications.
- Enter values for BOTH number of trees and the size of the area if you are clearing individual trees in one area AND a patch of vegetation in a different area.
- Please note the following area conversions/calculations:
 

1 hectare = 10,000 m <sup>2</sup>	Area of circle = 3.14 x radius <sup>2</sup>
1 acre = 0.4 hectares / 4,000 m <sup>2</sup>	Area of a rectangle = length x width
1 tree = 0.01 hectares / 100 m <sup>2</sup>	Area of a triangle = ½ length x perpendicular height

Total area of clearing proposed (hectares)	<b>0.0037</b>
Footprint of clearing (hectares) (purpose permit only)	<b>N/A</b>
Number of individual trees to be removed	<b>N/A</b>

Note: Calculate the area of a tree based on the area encompassed by the tree's drip line; that being the outermost circumference of the tree's canopy.

### 5.3 Purpose

<p>Provide the reason for proposed clearing (e.g. road construction, grazing and pasture, hazard reduction, horticulture, timber harvesting etc.)</p>	<p>Clearing will facilitate the removal and upgrade of the existing light pole and associated floodlights located within the landscaped area surrounding the eastern soccer field in Splendid Park, Yanchep (Attachment 3 - Clearing Plan, Attachment 4 - Clearing Area Shapefiles). These works are required as the City of Wanneroo intends to upgrade the floodlighting in the eastern and western playing fields in Splendid Park from current 50 lux to 100 lux, to allow the resident sporting clubs to access the playing fields for night-time match play and allow larger night community events on a casual basis.</p>
<p>Specify what the final land use will be after clearing</p>	<p>The proposed clearing area will be entirely revegetated using the same plant species to be removed (<i>Corymbia ficifolia</i>, <i>Hakea prostrata</i> and <i>Scaevola crassifolia</i>). As the new floodlight will be installed on the soccer field, there is in fact no need to keep the proposed area clear of vegetation.</p>

### 5.4 Method

<p>Proposed method of clearing (i.e. burning, cutting, draining, flooding, grazing, mechanical clearing/bulldozing or other – specify)</p>	<p>Removal of tree (if required) via mechanical means and removal of remaining vegetation by an excavator.</p>
--	--

### 5.5 Timeframe

<p>Period within which you propose to do the clearing (e.g. 1/7/2022 to 30/8/2024)</p>	<p>Start date: 01/03/2023 End date: 30/07/2023</p>
--	--

Note: The clearing referral process is not suitable for any clearing that is expected to take longer than two years.

### 5.6 Avoidance and mitigation

Explain how you have, or will, put avoidance and mitigation measures in place to eliminate, reduce, or otherwise mitigate the need for and scale of the proposed clearing of native vegetation.

Attach supporting documents to substantiate your explanation.

Your explanation should demonstrate you have planned the project so that the least clearing possible is to be undertaken. The following questions may help you frame your explanation:

- Why did you select this location and amount of clearing?

- What alternatives to clearing – e.g. engineering solutions – did you consider?
- What changes, if any, did you make to the location or amount of clearing to reduce the impacts of the clearing?

Note: If you do not demonstrate adequate efforts to avoid and mitigate clearing, we will ask you to do so during the validation of this form.

Provide the avoidance and mitigation details	<p>The proposed clearing is within an area that was previously landscaped with Carnaby's Black Cockatoo feeding species under subdivision condition approval (Attachment 9 - Yanchep City Structure Plan Vegetation and Fauna Management Strategy). Within the proposed clearing area, the City's Vegetation Assessment identified only one native plant (<i>Hakea prostrata</i>) which represents a Carnaby's Black Cockatoo feeding species (Attachment 5 - Vegetation Assessment - Site Photographs, Attachment 6 - Vegetation Assessment - Photograph Locations and Flora List). Consequently, the clearing of native vegetation will be minimal within the proposed clearing area. Given the small clearing requirement of 0.0037 ha of landscaped vegetation, the proposed clearing is not considered to be at variance of any of the Clearing Principles (Attachment 8 - City of Wanneroo Intramaps - Desktop Assessment Report for Native Vegetation Clearing NVC Application).</p> <p>The new floodlight pole will be installed on the soccer field area directly adjacent to the existing pole to be removed. This location has been chosen to minimise any additional clearing of the landscaped area and to utilise the cable pits, conduits, and other lighting connections already in place.</p> <p>The City has requested the Design Consultant to provide a solution to avoid having to conduct any clearing at all. If cabling and connections can be re-worked to avoid clearing, and this is a feasible and affordable option, then this option will be adopted.</p>
